*Experimental Study of the Possible
Hepatoprotective Effects of Some Agents
Against Liver Damage Induced by
Paracetamol or Paraquat*

Thesis Submitted for the Degree of
Doctor of Philosophy in Pharmaceutical Sciences
(Pharmacology & Toxicology)

by

Hala Ahmed Fahmy Zaki
B. Pharm. Sc. M. Sc.

Assistant Lecturer of Pharmacology & Toxicology
Faculty of Pharmacy
Cairo University

Under Supervision of

Prof. Dr. Afaf A. Ain Shoka
Professor of Pharmacology
& Toxicology
Faculty of Pharmacy
Cairo University

Prof. Dr. Hekma A. Abd El-Latif
Professor of Pharmacology
& Toxicology
Faculty of Pharmacy
Cairo University

Prof. Dr. Azza M. Agha
Professor of Pharmacology
& Toxicology
Faculty of Pharmacy
Cairo University

Faculty of Pharmacy
Cairo University
2002

زادني علماً بجوالي

الإمام الشافعي

Approval Sheet

1. **Prof. Dr. Afaf Abd El-Moneim Ain Shoka,**
Professor of Pharmacology & Toxicology,
Faculty of Pharmacy, Cairo University.

Afaf Ain-Shoka

2. **Prof. Dr. Hekma Abd El-Latief Abd El-Tawab**
Professor of Pharmacology & Toxicology,
Faculty of Pharmacy, Cairo University.

Hekma A. Abd El-Latief

3. **Prof. Dr. Azza Mounir Agha**
Professor of Pharmacology & Toxicology,
Faculty of Pharmacy, Cairo University.

Azza Mounir Agha

4. **Prof. Dr. Sanaa Abd El-Baky Kenawy**
Professor of Pharmacology & Toxicology,
Faculty of Pharmacy, Cairo University.

Sanaa

5. **Prof. Dr. Farid Ahmed Hamada**
Professor & Head of Pharmacology &
Toxicology Dept., Faculty of Pharmacy
(Boys), Al-Azhar University.

Farid Hamada

12/10/2002

Acknowledgments

*I wish to express my sincere gratitude and profound thanks to **Prof. Dr. Afaf A. Ain Shoka**, Professor of Pharmacology & Toxicology, Faculty of Pharmacy; Cairo University for her kindness, exemplary, indispensable remarks and continuous encouragement throughout the work.*

*It also gives me a pleasure to express my appreciation to **Prof. Dr. Hekma A. Abd El-Latif**, Professor of Pharmacology & Toxicology, Faculty of Pharmacy; Cairo University for her excellent technical advices, generous assistance and sincere help during all stages of this work.*

*I'm heavily indebted to **Prof. Dr. Azza M. Agha**, Professor of Pharmacology & Toxicology, Faculty of Pharmacy, Cairo University for her tremendous effort, deep experience and the valuable time that she sacrificed for me during the exhaustive process of organizing, revising and proof reading this thesis.*

*My cordial thanks are expressed to **Prof. Dr. Nadia Moustafa**, Professor of Histology, Faculty of Medicine; Cairo University for her professional aid and meticulous guidance in the histopathological aspect of this thesis.*

*Special gratefulness goes to **Assist. Prof. Dr. Laila G. Mahran**, Assistant Professor of Pharmacology & Toxicology, Faculty of Pharmacy, Cairo University and **Dr. Mohamed Raafat Abdullah**, Lecturer of Pharmacology & Toxicology, Faculty of Pharmacy, Cairo University for their valuable technical advices and generous support during the in vitro stage of this work.*

My gratitude should be extended to include all senior staff members and my colleagues in Department of Pharmacology & Toxicology, Faculty of Pharmacy, Cairo University for their continuous cooperation and support.

Hala 

To My Parents...

Who brought me to life

To My Husband ...

Who shares my life

To My Kids... Nour & Yahia

Who brighten my life

EXPERIMENTAL DESIGN	43

METHODS

I-	Induction of paracetamol or paraquat hepatotoxicity <i>in vivo</i>	48
II-	Treatment of blood samples	48
III-	Preparation of liver samples	49
IV-	Histological examination	49
V-	Isolation and preparation of hepatocyte suspensions	50
VI-	Determination of alanine aminotransferase	52
VII-	Determination of aspartate aminotransferase	55
VIII-	Determination of alkaline phosphatase	58
IX-	Determination of total and direct bilirubin	59
X-	Determination of lactate dehydrogenase	61
XI-	Determination of lipid peroxides	63
XII-	Determination of protein thiols	67
XIII-	Determination of glutathione	68
XIV-	Determination of glutathione peroxidase	76
XV-	Determination of superoxide dismutase	77
XVI-	Determination of haemoglobin	81
XVII-	Determination of total protein	82
XVIII-	Determination of albumin	84
XIX-	Determination of adenosine triphosphate	87
XX-	Statistical analysis	89

ARABIC SUMMARY		

List of Tables

Table	Page
1. Effects of different dose levels of paracetamol or paraquat on serum alanine aminotransferase and serum aspartate aminotransferase activities as well as on liver adenosine triphosphate content	91
2. Effects of single doses of different drugs treatment on serum alanine aminotransferase, aspartate aminotransferase and alkaline phosphatase activities as well as serum total and direct bilirubin levels in rats subjected to paracetamol-induced hepatotoxicity	94
3. Effects of single doses of different drugs treatment on serum lactate dehydrogenase activity, serum thiobarbituric acid reactive substances and protein thiols levels, blood glutathione level as well as blood glutathione peroxidase and superoxide dismutase activities in rats subjected to paracetamol-induced hepatotoxicity ..	98
4. Effects of single doses of different drugs treatment on the levels or activities of lactate dehydrogenase, thiobarbituric acid reactive substances, protein thiols, glutathione, glutathione peroxidase and superoxide dismutase in liver of rats subjected to paracetamol-induced hepatotoxicity	102
5. Effects of single doses of different drugs treatment on the serum levels of total protein, albumin, globulin and albumin/globulin in rats subjected to paracetamol-induced hepatotoxicity	105
6. Effects of single doses of different drugs treatment on the levels of total protein, albumin, globulin and albumin /globulin in liver homogenate of rats subjected to paracetamol-induced hepatotoxicity	108
7. Effects of single doses of different drugs treatment on serum alanine aminotransferase, aspartate aminotransferase and alkaline phosphatase activities as well as serum total and direct bilirubin levels in rats subjected to paraquat-induced hepatotoxicity	111

8.	Effects of single doses of different drugs treatment on serum lactate dehydrogenase activity, serum thiobarbituric acid reactive substances and protein thiols levels, blood glutathione level as well as blood glutathione peroxidase and superoxide dismutase activities in rats subjected to paraquat-induced hepatotoxicity	114
9.	Effects of single doses of different drugs treatment on the levels or activities of lactate dehydrogenase, thiobarbituric acid reactive substances, protein thiols, glutathione, glutathione peroxidase and superoxide dismutase in liver of rats subjected to paraquat-induced hepatotoxicity	118
10.	Effects of single doses of different drugs treatment on the serum levels of total protein, albumin, globulin and albumin/globulin in rats subjected to paraquat-induced hepatotoxicity	121
11.	Effects of single doses of different drugs treatment on the levels of total protein, albumin, globulin and albumin/globulin in liver homogenate of rats subjected to paraquat-induced hepatotoxicity ..	124
12.	Effects of repeated doses (2 weeks) of different drugs treatment on serum alanine aminotransferase, aspartate aminotransferase and alkaline phosphatase activities as well as serum total and direct bilirubin levels in rats subjected to paracetamol-induced hepatotoxicity	127
13.	Effects of repeated doses (2 weeks) of different drugs treatment on serum lactate dehydrogenase activity, serum thiobarbituric acid reactive substances and protein thiols levels, blood glutathione level as well as blood glutathione peroxidase and superoxide dismutase activities in rats subjected to paracetamol-induced hepatotoxicity	130
14.	Effects of repeated doses (2 weeks) of different drugs treatment on the levels or activities of lactate dehydrogenase, thiobarbituric acid reactive substances, protein thiols, glutathione, glutathione peroxidase and superoxide dismutase in liver of rats subjected to paracetamol-induced hepatotoxicity	134
15.	Effects of repeated doses (2 weeks) of different drugs treatment on the serum levels of total protein, albumin, globulin and albumin/globulin in rats subjected to paracetamol-induced hepatotoxicity	137
16.	Effects of repeated doses (2 weeks) of different drugs treatment on the levels of total protein, albumin, globulin and albumin/globulin in liver homogenate of rats subjected to paracetamol-induced hepatotoxicity	140

17.	Effects of repeated doses (2 weeks) of different drugs treatment on the level of adenosine triphosphate in liver homogenate of rats subjected to paracetamol-induced hepatotoxicity	143
18.	Effects of repeated doses (2 weeks) of different drugs treatment on serum alanine aminotransferase, aspartate aminotransferase and alkaline phosphatase activities as well as serum total and direct bilirubin levels in rats subjected to paraquat-induced hepatotoxicity	146
19.	Effects of repeated doses (2 weeks) of different drugs treatment on serum lactate dehydrogenase activity, serum thiobarbituric acid reactive substances and protein thiols levels, blood glutathione level as well as blood glutathione peroxidase and superoxide dismutase activities in rats subjected to paraquat-induced hepatotoxicity	150
20.	Effects of repeated doses (2 weeks) of different drugs treatment on the levels or activities of lactate dehydrogenase, thiobarbituric acid reactive substances, protein thiols, glutathione, glutathione peroxidase and superoxide dismutase in liver of rats subjected to paraquat-induced hepatotoxicity	154
21.	Effects of repeated doses (2 weeks) of different drugs treatment on the serum levels of total protein, albumin, globulin and albumin/globulin in rats subjected to paraquat-induced hepatotoxicity	157
22.	Effects of repeated doses (2 weeks) of different drugs treatment on the levels of total protein, albumin, globulin and albumin/globulin in liver homogenate of rats subjected to paraquat-induced hepatotoxicity	160
23.	Effects of repeated doses (2 weeks) of different drugs treatment on the level of adenosine triphosphate in liver homogenate of rats subjected to paraquat-induced hepatotoxicity	163
24.	Effects of different drugs treatment on cellular glutathione depletion induced by paracetamol using isolated suspended rat hepatocytes	166
25.	Effects of different drugs treatment on thiobarbituric acid reactive substances formation induced by paracetamol using isolated suspended rat hepatocytes	169
26.	Effects of different drugs treatment on lactate dehydrogenase leakage induced by paracetamol using isolated suspended rat hepatocytes	172
