

بِسْمِ اللَّهِ الرَّحْمَنِ الرَّحِيمِ
قُلْ إِنْ صَلَاتِي وَنُسُكِي وَمَحْيَايَ وَمَمَاتِي
لِلَّهِ رَبِّ الْعَالَمِينَ ﴿١﴾
لَا شَرِيكَ لَهُ، وَبِذَلِكَ أُمِرْتُ
وَأَنَا أَوَّلُ الْمُسْلِمِينَ ﴿٢﴾

Bending and torsional behavior of three rotary NiTi files and stress distribution during instrumentation of curved root canals (Finite Element Study)

Thesis submitted to the Faculty of Dentistry-Ain Shams
University for partial fulfillment of the requirements for the
Doctor's degree in Endodontics

By

Amira Ibrahim Mohamed Ibrahim

B.D.S, Cairo University

M.Sc., Cairo University

Assistant Researcher

Restorative and Dental Material Department

National Research Center

Faculty of Dentistry-Ain Shams University

2016

Supervisors

Prof.Dr. Salma Hassan El Ashry

Professor of Endodontics

Endodontic Department

Faculty of Dentistry-Ain Shams University

Dr. Shehab Eldin Mohamed Saber

Associate Professor of Endodontics

Endodontic Department

Faculty of Dentistry-Ain Shams University

Dr. Dalia Yehia Ibrahim Zaki

Associate Professor Researcher

Restorative and Dental Material Department

National Research Center

Dr. Tamer Mounair Nassef

Associate Professor

Computer and Software Engineering Department

Faculty of Engineering

Misr University for Science and Technology

Dedication

To my Great Father and Mother

To my Dear Husband

To my lovely girls

Acknowledgement

First and foremost thanks to Allah the most merciful for unlimited and continuous blessing on me.

I would like to express my deep gratitude to Prof. Dr. Salma Hassan El Ashry for her kind guidance, extraordinary supervision and valuable time and effort during this study.

I would like to express my deep appreciation to Dr. Shehab Eldin Mohamed Saber for his excellent advice, stimulating guidance and help throughout my academic and clinical work.

Deep thank to Dr. Dalia Yehia Ibrahim Zaki for her kind guidance, valuable advice, help and support.

My sincere gratitude to Dr. Tamer Mouneir Nassef for his excellent advice, valuable guidance, supervision and help during this study.

I would like to thank DR. Maram Khallaf for her help and cooperative spirit.

I would like to thank all members of Endodontic department, Faculty of Dentistry, Ain Shams University and Restorative and Dental Material Department, National Research Center for their valuable help and cooperation.

List of Contents:

List of Figures.....	ii
List of Tables.....	xiii
Introduction.....	1
Review of literature.....	3
I. Finite element analysis.....	3
II. Bending and Torsional properties of NiTi instruments.....	26
III. Effect of Instrumentation motions on mechanical behavior of endodontic files.....	35
Aim of the study.....	47
Materials and methods.....	48
Results.....	80
Discussion.....	137
Summary and Conclusions.....	152
References.....	156

List of Figures:

Figure 1:	Stereomicroscopic images of WaveOne primary file.....	51
Figure 2:	Stereomicroscopic images of Twisted File size 25taper 8%.....	52
Figure 3:	Stereomicroscopic images of ProTaper F2 file.....	53
Figure 4:	Protaper F2 file cross section.....	54
Figure 5:	Protaper F2 File 2D cross section geometry.....	55
Figure 6:	Protaper F2 File 3D cross section geometry.....	55
Figure 7:	Building of the 3D model.....	55
Figure 8:	Steps of Matlab processing.....	58
Figure 9:	3D model of the files, A)WaveOne primary file model, B)Twisted file size 25 taper 8% model, C)Protaper F2 file model.....	59
Figure 10:	Stress–strain behavior of the NiTi material.....	61
Figure 11:	Bending simulated conditions.....	62
Figure 12:	Torsion simulated condition.....	63
Figure 13:	Canals models. A) Canal model with curvature angle 30°. B) Canal model with curvature angle 45 °.....	65
Figure 14:	Teeth during C.T imaging.....	68
