

Postoperative Mediastinitis

An Essay

Submitted for partial fulfillment of the master degree in general surgery

By

Ahmed Samir Hassan

M.B.B.Ch.

Supervised by

Professor.Dr.Tarek mouhamed Farid El Bahar

Professor of General Surgery

Faculty of Medicine, Ein shams University

Dr.Tarek Youssef Ahmed

Lecturer of General Surgery

Faculty of Medicine, Ein shams University

2012

List of contents

01	Introduction	01
02	Aim of the work	02
03	Anatomy and development	03
04	Risk factors&pathophysiology	06
05	Classifications of mediastinitis	09
06	Diagnosis	17
07	Management	29
08	Summary	106
09	References	109

List of Figures

01	Anterior surface of sternum and costal cartilages	04
02	Posterior surface of sternum and costal cartilages	05
03	Bimanual alternating chest compressions are used for diagnosing sternal stability	20
04	Sternal dehiscence	25
05	Axial CT images of Sternal Dehiscence	26
06	CT showing sternal nonunion	27
07	MRI scan shows mediastinal abscess	28
08	A visual comparison of wire	33
09	Collagen sponges	35
10	The effect of HBO therapy on sternal wound	45
11	The preoperative view of the defect in the exposed sternum and the wires are visible	46
12	Chest wall reconstructed with pectoralis major myocutaneous flap	52
13	:Chest wall reconstructed with right unilateral pectoralis major muscle flap for sternal wound closure .	52
14	The neurovascular anatomy of the pectoralis major myocutaneous flap	54
15	Split pectoral muscle flap for sternal wound coverage	57
16	The intraoperative view of the pectoralis major muscle flap	57
17	Intraoperative view after unilateral advancement of pectoralis major flap	57
18	Postoperative view after 12 th months	58
19	Rectus abdominus muscle flap and eighth intercostal perforator for coverage of sternal defects.	59
20	Vascular supply of rectus abdominis muscle and its sheath.	60
21	Paramedian incision for harvesting rectus abdominis muscle	60
22	Coverage of sternal wound by rectus abdominus muscle	61
23	Surgical technique for of Pectoralis major–rectus abdominis bipedicle muscle flap	62
24	Diagrammatic presentation of surgical technique of latissimus dorsi	66

	muscle flap	
25	Preparation and transposition of the latissimus dorsi muscle flap	67
26	Arcs of rotation of latissimus dorsi flaps	68
27	Schematic representation of the extended V-Y latissimus dorsi design and operative procedure	69
28	Surgical Technique of the “ V-Y” advancement flap in obese female patient	72
29	Elevation of the breast musculo- cutaneous flap	75
30	Surgical technique for Elevation of the breast musculo- cutaneous flap	75
31	A schematic diagram of 2 perforator flaps	77
32	Dual blood supply of the omentum	79
33	The arc of rotation of the omentum	80
34	Intraoperative demonstration of omental flap technique	81
35	How to lengthen omental flaps for cephalad defects	82
36	Repair with omentum and skin graft	83
37	New prosthetic bone	87
38	Model of transverse sternal fixation with synthetic locking	89
39	View of transverse application of titanium plates with temporary sternal wires	89
40	Stainless steel reconstruction plates are tailored and secured vertically to each side of the sternum	90
41	A transmanubrial dynamic compression plate	90
42	The sponges	94
43	The vaccum	94
44	Infected sternal wound	94
45	Granulation tissue in sternal wound	94
46	Management algorithm for deep sternal wound infections	97
47	Algorithm for management of infected sternotomy wound using VAC and followed with plating	99
48	Shows a wound infection and dehiscence and its management by VAC followed by sternal plating	100

List of tables

01	Pairolero classification of chest wall defects and infections	10
02	El Oakley and Wright classifications of mediastinitis	12
03	Jones classification of sternal wound infection	15
