CEPHALOMETRIC EVALUATION OF PATIENTS

WITH UNILATERAL TEMPOROMANDIBULAR

JOINT ANKYLOSIS

Thesis

Submitted to the Faculty of Oral

and Dental Medicine,

Cairo University,

in Partial Fulfillment of the Requirements

for Master's Degree in

Oral Surgery

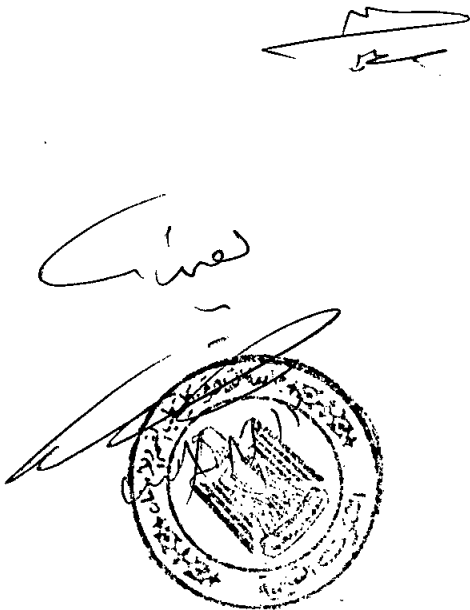

By

Ashraf Abdalla Fouda

B.D.S., H.D.D.

(Cairo)

2000

SUPERVISORS

Prof. Dr. Sherif El-Mofty

Professor of Oral Surgery

Faculty of Oral and Dental Medicine

Cairo University

Dr. Emad Tawfik Mahmoud

Lecturer of Oral Surgery

Faculty of Oral and Dental Medicine

Cairo University

Dedicated to memory of
my uncle

ACKNOWLEDGMENTS

ACKNOWLEDGMENTS

I would like to express my deep appreciation and gratitude to **Professor Dr. Sherif El-Mofty**, Department of Oral Surgery, Faculty of Oral and Dental Medicine, Cairo University, for his continued encouragement and support.

I am indebted to **Dr. Emad Tawfik**, Lecturer of Oral Surgery, Faculty of Oral and Dental Medicine, Cairo University, for his scrupulous supervision during the course of this study.

Special thanks to **Dr. Amr Abo El-Ezz**, Lecturer of Orthodontics, Faculty of Oral and Dental Medicine, Cairo University, for his valuable advice and for explaining the different aspects related to the cephalometric analysis.

I wish to thank **Dr. Amany El-Basmy**, for carrying out the statistical analysis of the data.

Special thanks to **Dr. Basma Gamal**, Lecturer of Oral Surgery, Faculty of Oral and Dental Medicine, Cairo University, for her Advice and Support.

I am deeply grateful to members of the Department of Oral Radiology, Faculty of Oral and Dental Medicine, Cairo University, for their continuous support.

CONTENTS

Introduction	1
Review of literature	2
-Anatomy and physiology of temporomandibular joint.---	2
-Ankylosis of temporomandibular joint.-----	9
-Roentgenographic cephalometric analysis.-----	13
Aim of the study	18
Materials and Methods	19
Results	41
Discussion	54
Summary and conclusions	61
References	63
Appendix	68
Arabic Summary	- -

LIST OF TABLES

	Page
Table (1): linear measurements of upper face region in postero-anterior cephalograph of ankylosed patients.	44
Table (2): linear measurements of lower face region in postero-anterior cephalograph of ankylosed patients.	46
Table (3): Angular measurements in postero-anterior cephalograph of ankylosed patients.	47
Table (4): linear measurements of lateral cephalograph of ankylosed patients.	51
Table (5): Angular measurements of lateral cephalograph of ankylosed patients.	53

LIST OF FIGURES

	Page
Fig.(1a): Front and profile photographs of case no. 10 with unilateral ankylosis of T.M.J.	20
Fig.(1b): A view of the occlusion of case no. 10 with unilateral ankylosis of T.M.J.	21
Fig.(2): A photograph of the device used for cephalometric radiography.	23
Fig.(3a,b): Case no. 1 using head holding device during lateral and postero-anterior cephalographs.	25
Fig.(4): A tracing of postero-anterior cephalometric landmarks .	27
Fig.(5): A tracing showing lateral cephalometric landmarks .	29
Fig.(6): A tracing showing linear postero-anterior cephalometric measurements.	31
Fig.(7): A tracing showing linear postero-anterior cephalometric measurements.	33

	Page
Fig.(8): A tracing showing linear and angular postero-anterior cephalometric measurements.	34
Fig.(9): A tracing showing angular postero-anterior cephalometric measurements.	35
Fig.(10): A tracing showing linear lateral cephalometric measurements.	37
Fig.(11a,b): A tracing of the inferior border of the mandible showing linear lateral measurements MG1,...MG4 to evaluate the curvature of the inferior border of the mandible in the unaffected and affected sides.	38
Fig.(12): A tracing showing angular lateral cephalometric measurements.	40
Fig.(13): distribution of studied cases according to etiology.	42
Fig.(14): linear measurements of upper face region in postero-anterior cephalograph of ankylosed patients.	44
Fig.(15): linear measurements of lower face region in postero-anterior cephalograph of ankylosed patients.	46

	Page
Fig.(16): Angular measurements in postero-anterior cephalograph of ankylosed patients.	47
Fig.(17): linear measurements of lateral cephalograph of ankylosed patients.	52
Fig.(18): linear measurements of lateral cephalograph of ankylosed patients.	52
Fig.(19): angular measurements of lateral cephalograph of ankylosed patients.	53
Fig.(20): Increased gonial angle on the affected side in comparison to the contralateral side.	58
