METABOLIC AND IMMUNOLOGICAL RESPONSES AFTER HEAD INJURY

THESIS

Submitted for Partial Fulfillment of the MD DEGREE
in ANAESTHESIOLOGY

By

Hany Kamal Mickhael

M.B.B.Ch., M.Sc.

**Ass. Lecturer of Anaesthesiology
Faculty of Medicine, El-Minia University**

Supervisors

Prof. Dr. Ibrahim Abbas Youssef

**Professor and Head of Anaesthesiology and
Intensive Care Department**

Prof. Dr. Ahmad Abdel-Samie Omran

Professor of Clinical Pathology

Dr. Salah Nagib Ahmed El-Tallawy

Assistant Professor of Anaesthesiology and Algesiology

Dr. Nagy Sayed Aly

Assistant Professor of Anaesthesiology and Algesiology

**ANAESTHESIOLOGY AND INTENSIVE CARE DEPARTMENT
FACULTY OF MEDICINE - EL-MINIA UNIVERSITY**

2004

B 12c9

ACKNOWLEDGEMENT

ACKNOWLEDGEMENT

First and above all, thanks to **ALLAH**, the source of all knowledge and wisdom, who enabled me to complete this work.

I would like to express my sincere thanks and deep gratitude to *Prof. Dr. Ibrahim Abbas Youssef*, Professor and Head of Anaesthesiology and Intensive Care unit, Faculty of Medicine, El-Minia University, for his kind supervision and wise guidance during the progress of this study. He has provided me with valuable information and influenced the work.

I am greatly thankful to *Dr. Ahmed Abdel-Samie Omran*, Professor of Clinical Pathology Dept., Faculty of Medicine, El-Minia University, for his great help in the laboratory work of this thesis, useful revision and support precious advises.

Many thanks to *Prof. Dr. Salah Nagib Ahmed El-Tallawy*, Assistant Professor of Anaesthesiology and Algology, Faculty of Medicine, El-Minia University, Faculty of Medicine, El-Minia University, he was from the start helping, directing, encouraging and supporting in the true meanings of the words. I can not thank him enough for his time and for his efforts.

Many thanks to *Dr. Nagy Sayd Ali*, Lecturer Anaesthesiology and Algology, Faculty of Medicine, El-Minia University, for his valuable supervision, scientific support and his great efforts to complete this work.

Finally, I wish to extend my great thanks and feelings of gratitude to all staff members of Anaesthesiology Dept., Faculty of Medicine, El-Minia University, for their support and helpful participation.

CONTENTS

	PAGES
LIST OF TABLES	i-ii
LIST OF FIGURES	iii
LIST OF ABBREVIATIONS	iv-vi
INTRODUCTION AND AIM OF THE WORK.....	1 – 2
REVIEW OF LITERATURE	3 – 73
* Head trauma	3
* Intensive care management of patients with head trauma	30
* Cytokines	45
* S-100 protein	68
PATIENTS AND METHODS	74-90
RESULTS	91-116
DISCUSSION	117-142
SUMMARY AND CONCLUSIONS	143-146
RECOMMENDATIONS	147

REFERENCES 148-176

ARABIC SUMMARY ٣-١

LIST OF TABLES

TABLE	SUBJECT	PAGE
(1)	Sites of brain hemiation, structures involved and resulting clinical signs	29
(2)	Glasgow Coma Scale score.....	77
(3)	Patient's characters.....	91
(4)	Haemodynamic changes.....	93
(5)	Correlation between GCS score versus mean arterial blood pressure, pulse rate and central venous pressure.....	94
(6)	Changes in Glasgow Coma Scale score.....	96
(7)	Comparison between control, arterial and venous concentrations of S-100 protein β (ug/L).....	99
(8)	Correlation between GCS score versus arterial and venous concentrations and transcranial gradient of S-100 protein.....	100
(9)	Correlation between GCS score at 96 hour (end of the study) versus admission transcranial gradient of S-100 protein interleukin- 1β and 6 and tumour necrosis factor- α	100
(10)	Comparison between control, arterial and venous concentrations of interleukin- 1β (pg/ml).....	103
(11)	Correlation between GCS score versus arterial and venous concentrations and transcranial gradient of interleukin- 1β	103
(12)	Comparison between control, arterial and venous concentrations of interleukin-6 (pg/ml).....	106

LIST OF TABLES (CONTINUED)

TABLE	SUBJECT	PAGE
(13)	Correlation between GCS score versus arterial and venous concentrations and transcranial gradient of interleukin-6 (pg/ml)	106
(14)	Comparison between control, arterial and venous concentrations of tumour necrosis factor- α (pg/ml)	109
(15)	Correlation between GCS score versus arterial and venous concentrations and transcranial gradient of tumour necrosis factor- α	109
(16)	Changes in random blood sugar (mg/dL) and serum triglyceride (mg/dL).....	111
(17)	Correlation between GCS score versus blood sugar and serum triglyceride.....	112
(18)	Changes in arterial blood gases.....	114
(19)	Changes in serum sodium and potassium (meq/dL).....	115

LIST OF FIGURES

FIGURE	SUBJECT	PAGE
(1)	Pulse rate	94
(2)	Mean arterial blood pressure	95
(3)	Changes in the central venous pressure	95
(4)	Glasgow coma scale score	97
(5)	Comparison between control, arterial and venous concentrations of S-100 protein beta	101
(6)	Comparison between control, arterial and venous concentrations of of interleukin-1	104
(7)	Comparison between control, arterial and venous concentrations of interleukin-6	107
(8)	Comparison between control, arterial and venous concentrations of tumour necrosis factor	110
(9)	Changes in random blood sugar	113
(10)	Changes in serum triglycerides	113
(11)	Changes in serum sodium	116
(12)	Changes in serum potassium	116

LIST OF ABBREVIATIONS

ADH	anti-diuretic hormone
AIDS	acquired immunodeficiency syndrome
APC	antigen presenting cell
cm	centimeter
CPB	cardiopulmonary by pass
CSF	cerebrospinal fluid
CT	Computed tomography
CVP	central venous pressure
DI	diabetes insipidus
DNA	deoxyribonucleic acid
EGF	endothelial growth factor
EGF	epidermal growth factor
ELISA	enzyme linked immuno-sorbant assay
GCS	Glasgow Coma Scale
g/kg	gram/kilogram
GM-CSF	granulocyte/macrophage colony-stimulating factor
gp	glycoprotein
h	hour
HIV	human immunodeficiency virus
ICAM-1	intracellular adhesion molecules-1
IGE	immunoglobulin E
IFN. _α	interferon. _α
IFN. _β	interferon. _β
IFN-γ	interferon-γ

LIST OF ABBREVIATIONS (CONTINUED)

IFNR	interferon receptor
IL-1 _α	interleukin-1 _α
IL-1 _β	interleukin-1 _β
IL-1ra	interleukin-1 receptor antagonist
IL-2	interleukin-2
IL-3	interleukin-3
IL-4	interleukin-4
IL-5	interleukin-5
IL-6	interleukin-6
IL-7	interleukin-7
IL-9	interleukin-9
IL-10	interleukin-10
IL-11	interleukin-11
IL-12	interleukin-12
IL-15	interleukin-15
IL-14	interleukin-14
IL-16	interleukin-16
IL-17	interleukin-17
LAK	lymphokine activated killer
LCF	lymphocyte chemoattractant factor
MCSF	macrophage colony stimulating factor
mEq	millequivalent
mg/dL	milligram per deciliter
MHC	major histocompatibility complex
min	minute
MIP-1 _β	macrophage inflammatory protein-1 _β
