LIST OF TABLES

No.	Title	Page#
I. 1.1	Rectal cancer clinical staging (Mohiuddin, 1993)	10
I. 2.2	Overall cure rates and local failure following surgery alone for resectable rectal cancer: Selected single institution studies.	22
I. 2.3	ACS survey of rectal cancer in 20371 patients: Distribution of tumor extent and 5-year cancer-free survival rate (American College of Surgeons, 1979).	23
I. 2.4	Series of local excision alone (Breen, 1997).	25
I. 2.5	Location and incidence of tumor treatment failure by stage after potential curative surgery (Stevens, 1994).	27
I. 2.6	Staging distribution, five-year survival and incidence of pelvic recurrence by stage (Pilipshen, 1984).	28
I. 3.7	Preoperative radiation regimen in the University of Florida (Mendenhall, 1993).	37
I. 3.8	Local failure rates in MGH series (Tepper, 1987).	40
I. 3.9	The 5-year NED survival in MGH series (Tepper, 1987).	41
III. 1.1	Patients' characteristics in the two treatment groups.	86
III. 1.2	Distribution of acute cutaneous reactions.	91
III. 1.3	The distribution of the 7 cases in Group I with distant metastases according to site and pathology.	93
III. 1.4	The distribution of DM according to the various variables.	94

LIST OF FIGURES

No.	Title	Page
I. 1. 1	Clinical staging combining tumor mobility / fixation and level in rectum (Mohiuddin, 1993).	9
I. 1. 2	Schematic representation of the 5 echodensity, rectal wall layers, showing the mucosa (mu), and muscularis propria (mc) of the rectal wall (Glaser, 1992).	10
II. 1. 1	The simulator posteroanterior film illustrating the irradiation field.	79
II. 1. 2	The simulator lateral film illustrating the irradiation field.	79
III. 1. 1	Accuracy of TRUS in comparison with pathological findings.	87
III. 1. 2	Response to peroperative irradiation.	89
III. 1. 3	Actuarial survival of all the patients.	97
III. 1. 4	Actuarial survival of the patients in each treatment group.	98
III. 1. 5	Actuarial survival and pathologic cell type.	99
III. 1. 6	Actuarial survival and tumor grade.	100
III. 1. 7	Actuarial survival according to DNA ploidy.	101
III. 1. 8	Actuarial survival and nodal involvement.	102
III. 1. 9	Actuarial survival and pathologic stage.	103
III. 1. 10	Actuarial survival according to the clinical response to radiotherapy.	104
III. 1. 11	Actuarial survival according to compliance with the systemic therapy.	105
III. 1. 12	DFS of all the patients.	106
III. 1. 13	DFS of patients in each treatment group.	107
III. 1. 14	DFS and pathologic cell type.	108

ACKNOWLEDGMENT

oooooooooooooooo

Thank God for his generous blessings, which I received through the fabulous human and scientific support from my superiors and colleagues at The National Cancer Institute, Cairo University, and from my beloved family; which enabled me to accomplish this study.

All the time, I have been working on this thesis, I felt the need to express my gratitude to Prof. Dr. Somaya Ezzat, Professor of Radiation Oncology, National Cancer Institute, Cairo University, for pursuing her interest and enthusiasm in the the topic of this essay, without which this work would not have been accomplished and would not have been possible in the first place. Thus, I greatly appreciate the support she gave me among her various tasks and major responsibilities and commitments.

I am also grateful for Prof. Dr. Mohamed Reda Hamza, Professor of Medical Oncology, National Cancer Institute, Cairo University, for the precious scientific advise and superb clinical experience that he so willingly invested in this work.

The same esteem is far deserved by Prof. Dr. Nadia Mokhtar, Professor of Pathology, National Cancer Institute, Cairo University, for her efficient pursuit of the histopathological aspect of this study so meticulously and thoroughly as is always her attitude.

I am also deeply in debt to Prof. Dr. Ahmed Morssi Mostafa, Assistant Professor of Surgery, National Cancer Institute, Cairo University, for that much of his time, effort, personal support and encouragement he presented to me.

As for Prof. Dr. Maha Helal, Assistant Professor of Radiodiagnosis, National Cancer Institute, Cairo University, I feel that my appreciation and
