**EVALUATION OF STRESSES TRANSMITTED TO THE
PRINCIPAL ABUTMENTS IN SUBJECTS WITH CLASS
IV KENNEDY'S CLASSIFICATION**

THESIS

*Submitted to the Faculty of Oral and Dental Medicine,
Cairo University in Partial Fulfillment of the Requirements
For the Master Degree in Prosthodontics*

Handwritten signature and initials.

By

SAMER MOUSTAFA AHMED ALI

B.D.S Cairo

2003

Handwritten signature and initials, including "Ugi" and "23/5/03".

UNDER THE SUPERVISION OF

Prof. Dr.

EZZAT. M. SABET

*Department of Prosthodontic
Faculty Of Oral and Dental Medicine
Cairo University.*

Dr.

AMAL F. KADDAH

*Associate Professor
Department of Prosthodontic
Faculty Of Oral and Dental Medicine
Cairo University.*

Dr.

ABD ELHAY MOHAMED

*Associate Professor
Department of Mechanical Engineering
Faculty Of Engineering
Helwan University.*

بِسْمِ اللَّهِ الرَّحْمَنِ الرَّحِيمِ

﴿ وَأَنْزَلَ اللَّهُ عَلَيْكَ الْكِتَابَ وَالْحِكْمَةَ وَعَلَّمَكَ مَا لَمْ

تَكُن تَعْلَمُ وَكَانَ فَضْلُ اللَّهِ عَلَيْكَ عَظِيمًا ﴾

صدق الله العظيم

الآية رقم ١١٣

من سورة النساء

ACKNOWLEDGMENT

First of all I would like to thank Allah who paved the way and only by his will every thing can be achieved.

Words are not enough to express how deeply I am grateful to Prof. Dr. Ezzat Sabet I owe him a sincere appreciation, due thanks and gratitude for his human concern, superb devotion, immeasurable support and continuous encouragement.

I would like to express my heartfelt thanks and sincere appreciation to Associate Professor. Dr. Amal Kaddah for her immense support and encouragement for making facilities possible to carry this work forward. This book wouldn't have been brought into being without her infinite patience and understanding for the time and effort required.

I would like to express my thanks, deepest appreciation and sincere gratitude to Associate Professor. Dr. Abd Elhay Mohamed, for his great assistance in the preparation of this work. I will remain indebted to him and never forget his kind help, patience, which facilitate my task.

I am deeply grateful to Prof. Dr. Essam EL Ghamrawey for his immeasurable help, wonderful and cooperative assistant and for scarifying much of his time for pre-editing the manuscript.

I am gratefully acknowledging Associate Professor. Dr. Azza Hussein for her great assistance and precious guide in the preparation of this work. I will remain indebted to her and always remember her superb cooperation and effort in the development of this work.

My deeply and hearty acknowledgement to all my family members whom really supported me and made it possible to work up this work.

I wish also to acknowledge all the members of the Prosthodontic Department whom have been of great help with their valuable suggestions for improvements.

My thanks are also to all Professors, Publishers, and Editors for their permissions to utilize passages and illustrations from their books and papers.

LIST OF CONTENTS

	PAGE
List of figures	vi
List of tables	ix
Introduction	1
Review of literature	2
Removable Partial Denture	2
Problems of support in removable partial Denture	2
Forces acting on removable partial denture	3
Vertical forces	3
Tissueward forces	4
Dislodging forces	4
Lateral forces	4
Antro-posterior and postro-anterior forces	4
Rotational forces	5
Management of free end saddle removable partial denture	5
Design consideration in the control of stress and load distribution	6
Direct retainers in removable partial dentures	7
Positioning the occlusal rest on the abutment teeth	8
Precision attachments	9
Classification of precision attachments	10
I - Ray 1978, classification according to the type of articulation	10

	PAGE
II- Baker and Goodkind 1981, classification according to their uses in removable partial dentures	10
III- According to the attachment shape	11
VI- Becerra and MacEntee 1987, according to their location	12
V- Jenkins 1987, according to their behavior during function	13
VI- Fedrickson et al 1995, classified the overdenture precision attachment according to the relation of fixtures to each other .	14
Indications and limitation of precision attachments	14
Intracoronaral attachments	17
Extracoronaral attachments	18
Types of extracoronaral attachments	18
1-Dalbo attachment	18
2-Stabilex attachment	18
3-Conex attachment	19
4-ERA attachment	19
5-Ceka attachment	20
Evaluation of intracoronaral and extracoronaral precision attachment for use in distal extension bases	22
Splinting	23
Stress analysis	24
In-Vivo Versus In-Vitro studies	25
Stress Analysis Techniques	26
1- brittle lacquer coating method	26

	PAGE
2- holographic Interferrometry	27
3- Stereophotogrammetric analysis	27
4- Photoelasticity	28
A- photoelastic coating technique	29
B- two dimensional model analysis	29
C- three dimensional model analysis	29
5- finite element analysis	30
Limitation Of finite element	30
Types of the finite element analysis	31
Application of finite element in dentistry	32
Finite element method versus	
Photoelasticity	32
6- strain gauge technology	33
Types Of Strain Gauges	33
A) Vibrating wire gauges	33
B) De Leiris pneumatic strain gauge	33
C) Dial gauges	34
D) Mechanical Strain Gauges	34
1- Short gauge length with high magnification	34
2- Long gauge length with low magnification	34
E) The Transducer	34
F) Electrical Strain Gauges	35
Theory Of Strain Gage	35
The Wheatstone Bridge	36
Application Of Strain Gauges In Prosthetic Research	37

	PAGE
Aim of the study	38
Material and method	39
Case selection	39
Impression procedure	39
Construction Of the teeth	40
Construction of the model	40
Master model replication	40
Periodontal ligament simulation	42
Simulation of the mucosa covering the ridge	43
Stone index	43
Construction of the full coverage splinted metal crowns for the abutments	47
for the I bar clasp assembly	47
For the anchora attachment assembly	48
Partial denture framework design	50
Design with an extracoronal I bar direct retainer	50
Design with the anchora attachment	51
Construction of the acrylic base	54
Construction of the load recipient appliance	54
Installation of the strain gauge	56
Specification of the strain gauges	56
Site	57
Preparation	57
Bonding The strain gauges	57
The loading device	59
Connection of the wheatstone bridge	62
