The study of **T**axonomy in its broadest sense is probably the oldest branch of biology or natural history as well as the basis for all the other branches, since the first step in obtaining any knowledge of things about us is to discriminate between them and to learn to recognize them.

Richard E. Blackwelder

Dedication

"They say that the dedication is one of the most exquisite acts of love one can perform.

*I would argue that it is even more beautiful to dedicate this work to **you** without saying your name"*

Special Dedication

This work is dedicated to the soul of

**Prof. Dr. Abd El-Salam Mohamed Al-Nowaihi
&
Prof. Dr. Sayed Farag Khalifa**

*may Allah, forgive and have mercy on them,
grant them ease and respite. Make their
resting place a noble one, and facilitate their
entry. Cleanse them with water, snow and
coolness, and purify them of wrongdoings as a
white cloth is purified of grime. Grant them
an abode finer than their worldly one, and
grant them entrance to Paradise and protect
them from the chastisement of the grave, and
protect them from the chastisement of the
Fire*

ACKNOWLEDGEMENTS

Foremost, I would like to express the deepest appreciation and gratitude to **late Prof. Dr. Abd El-Salam Al-Nowaihi**, it's an honor to be his last student and this was the final thesis under his supervision.

I've always felt so grateful to **Prof. Dr. Mohamed El-Sayed Tantawy Khalifa**, I would like to express my sincere gratitude to him, his guidance helped me in all the time of research and writing of this thesis and I could not have imagined having a better advisor and mentor for my work.

I am heartily thankful to **Prof. Dr. Magdy Mohamed Mourad Hussein** for his valuable and generous encouragement on the personal and academic level.

Special thanks with a sense of gratitude to **Dr. Usama Kamal Abdel-Hameed** for his patience, motivation, enthusiasm, continuous support and follow up, collection, identification and description of the studied taxa.

Many thanks to Prof. **Dr. Maher Mohamed Shehata** (Head of Botany Department, Faculty of Science, Ain Shams University).

Warm thanks goes to my friends, colleges and professors in the taxonomy unite for their great support and warm feelings.

I am indebted to the staff members and colleagues of Botany Department, Faculty of Science, Ain Shams University.

Special Thanks

I am so thankful to my parents specially to the greatest women in my life, my beloved *Mother*, her unconditional love and support at each time of my life, she made me the woman that I am today. Her deep faith, her prayers, and absolute trust are always the most efficient motivation to accomplish my ultimate goal. No words can describe what you have done for me. Thank you for your generous and endless love.

Warm thanks goes to my lovely brother *Ahmed* and the prettiest sister ever *Marwa* for their love, support and withstanding me.

Words can't describe how thankful I am to my brother *Mohamed*

I will never be able to repay him for his absolute backing and supporting, meeting my needs before I knew I needed them. He has a special place in my heart.

I would like to express my gratitude to *Mai & Nermeen*, for there great influence in keeping me motivated throughout this PhD journey, when things made no sense, they gave the taste to life, when all the scene went black, they made the PhD life looks brighter and gave me the extra push when I needed one.
