ACKNOWLEDGEMENT

First of all, thanks to GOD whose magnificent help was the main factor in completing this work.

I wish to express my deepest thanks and sense of gratitude to Professor Dr. El Sayed A. Al Mahrakawy, Professor of General Surgery, Faculty of Medicine, Ain Shams University, for his generous advises and supervision during this work. His continuous help and fatherly support have done a great deal for me to complete this work.

Words cannot express how much I am grateful to Prof. Dr. Hisham H. Wagdy, Professor of General Surgery, Faculty of Medicine, Ain Shams University. He gave me a lot of his precious time and effort from the start to the end of this work. I feel markedly indebted to him for his continuous stimulation, unlimited help,

vital observations and very close supervision. For me, he was the backbone of this work. Indeed, if he was not supporting me, this work would have never came to the light.

I am particularly grateful to Dr. Amr K. El-Fekky, lecturer of General Surgery, Faculty of Medicine, Ain Shams University, for his kindness and guidance. His continuous stimulation, supervision and support cannot be appreciated. He paid me a lot of valuable advises that have a great deal towards the completion of this work.

My deepest thanks go to Dr. Dalia M. Dalam, Assistant Professor of Radiology, Faculty of Medicine, Ain Shams University, for the efforts and time spent in performing the radiological part of this work.

Lastly but not the least, I want to express my profound gratitude to all members of the General Surgery Department, Faculty of Medicine, Ain Shams University, for grateful help and cooperation in completing this work.

List of Figures

Figure		Page
(1)	Metabolic pathways in cholesterol and bile acid homoeostasis.	27
(2)	Venn diagram of the principal defects required for cholesterol to crystallize on an accelerated time-scale in bile.	30
(3)	Proposed schema for the pathogenesis of black pigment gallstones	37
(4)	Proposed mechanism of pigment gallstone formation by bacteria.	39
(5)	Distribution of age and BMI among controls and calcular and non-calicular groups.	77
(6)	Distribution of sex among controls and calcular and non-calicular groups.	78
(7)	Ultrasonogram of a control.	81
(8)	Distribution of age and BMI among controls and contractor and non-contractor of calcular group.	85
(9)	Distribution of sex among controls and contractor and non-contractor of calcular group.	86
(10)	Ultrasonogram of a Chronic calcular case (Contractor).	89
(11)	Ultrasonogram of a Chronic calcular case (Non-contractor)	90

Figure**Page**

(12)	Distribution of age and BMI among controls and contractor and non-contractor of non-calicular group.	93
(13)	Distribution of sex among controls and contractor and non-contractor of non-calicular group.	94
(14)	Ultrasonogram of a Chronic non-calicular case (Contractor).	97
(15)	Ultrasonogram of a Chronic non-calicular case (Non-contractor).	98

List of Tables

Table		Page
(I)	Gall bladder motility parameters among controls and calcular and non-calicular	80
(II)	Gall bladder motility parameters between contractor and non-contractor calcular.	87
(III)	Gall bladder motility parameters among controls and contractor and non-contractor of calcular.	88
(IV)	Gall bladder motility parameters between contractor and non-contractor of non-calicular.	95
(V)	Gall bladder motility parameters among controls and contractor and non-contractor of non-calicular.	96
(VI)	Pre-operative severity and frequency scores of calcular cases.	100
(VII)	Pre-operative severity and frequency scores of non-calicular cases.	102
(VIII)	Pre-operative severity and frequency scores of contractor calcular.	104
(IX)	Pre-operative severity and frequency scores of non- contractor calcular.	106
(X)	The mean pre operative severity and frequency score of contractor and non-contractor calcular.	107
(XI)	Pre-operative severity and frequency scores of contractor non-calicular.	110

Table	Page
(XII) Pre-operative severity and frequency scores of non- contractor non- calcular.	111
(XIII) The mean preoperative severity and frequency score of contractor and non-contractor non-calicular.	112
(XIV) Post-operative severity and frequency scores of calcular cases.	116
(XV) The mean pre and post operative severity and frequency score of calcular cases.	117
(XVI) Post-operative severity and frequency scores of non-calicular cases.	120
(XVII) The mean pre and post operative severity and frequency score of non-calicular cases.	121
(XVIII) Post-operative severity and frequency scores of contractor calcular.	124
(XIX) The mean pre and post operative severity and frequency score of contractor calcular.	125
(XX) Post-operative severity and frequency scores of non- contractor calcular.	130
(XXI) The mean pre and post operative severity and frequency score of non-contractor calcular.	131
(XXII) The mean post operative severity and frequency score of contractor and non-contractor calcular.	132
(XXIII) Percent reduction in the mean severity and frequency symptomatic scores among the contractor and non-contractor calcular cases.	133

Table	Page
(XXIV) Post-operative severity and frequency scores of contractor non-calicular.	136
(XXV) The mean pre and post operative severity and frequency score of contractor non-calicular.	137
(XXVI) Post-operative severity and frequency scores of non- contractor non- calicular.	142
(XXVII) The mean pre and post operative severity and frequency score of non-contractor non-calicular.	143
(XXVIII) The mean post operative severity and frequency score of contractor and non-contractor non-calicular.	144
(XXIX) Percent reduction in the mean severity and frequency symptomatic scores among the contractor and non-contractor non-calicular cases.	145
