**Diagnosis of Solid Objects underwater
Using Laser Induced Plasma Spectroscopy Technique**

A THESIS
SUBMITTED BY

ر. ص. ع. د. ح. م.

Hatem Salah El-Din Abdel-Hamied

B.Sc. In Electrical Engineering
Opto-Electronics and Automatic Control Department
Military Technical College
1994

For the fulfillment of requirements of M. Sc. Degree in Laser Sciences from the
Department of Laser Engineering Applications

**NATIONAL INSTITUTE OF LASER ENHANCED SCIENCES
(NILES),
CAIRO UNIVERSITY
EGYPT
2010**

**Diagnosis of Solid Objects underwater
Using Laser Induced Plasma Spectroscopy Technique**

A THESIS
SUBMITTED BY

Hatem Salah El-Din Abdel-Hamied

B.Sc. In Electrical Engineering
Opto-Electronics and Automatic Control Department
Military Technical College
1994

SUPERVISING COMMITTEE:

Prof. Mohy Saad Mansour

*Dean of faculty of Engineering, Bani Sweif University, Beni Sweif, Egypt
Prof. of Mechanical Engineering, Faculty of Engineering,
Cairo University, Egypt.*

Dr. Hisham Imam Mahmoud

Lecture of Laser Physics, NILES, Cairo University, Egypt.

Dr. Khaled Abdelsabour Elsayd

Physics Dept., Faculty of Science, Cairo University, Egypt.

Acknowledgements

I'm deeply grateful to all the people who have supported and helped me towards the successful completion of this dissertation.

I wish to express my profound gratitude and sincere appreciation to **Professor Dr. Mohy Saad Mansour**, who all have been most generous with his supervision, guidance, advice, and encouragement throughout the preparation of this thesis.

I would like to express my gratitude to **Dr. Hisham Imam Mahmoud**, Assistant Professor of laser physics at NILES, Cairo University for his guidance, advice, generous help and scientific support in setting and analyzing the results of LIBS experiment.

Many thanks to **Dr. Khaled Abdel-Sabour El-Sayed** Assistant Professor of laser physics at Niles for his support and fruitful discussions, kind help and scientific support.

Many thanks to Lt.Eng. Ragae Ahmed Rateb, Armed Forces Technical Research Center, for his assistance in doing the programming works.

I would like to thank my parents, brother Yasser and sister Rasha for being the best family any kid could wish for. Their love, support, and guidance have made me who I am today.

Last but not least, I wish to convey my deepest appreciation and utmost gratitude to my wife and beautifully children Farah and Amr for their meticulous encouragement and support, I adore to say here "they are all my life and love".

Above all, thank god

Contents

List of Tables	I
List of Figure	II
Abstract	X
<u>Chapter I: Introduction</u>	1
1.1 Common types of spectroscopy	1
1.2 Laser induced plasma spectroscopy(LIBS)	4
1.3 Significant milestones in the development of LIBS	5
1.4 The advantages and drawbacks of LIBS technique:	7
1.4.1 The Advantages of LIBS Technique Over Conventional Methods	7
1.4.2 The Drawbacks of LIBS Technique	7
1.5 Laser induced plasma	8
1.6 Spectral lines and line profiles	9
1.7 Factors affecting laser plasma production:	11
1.7.1 Laser characteristics:	11
1.7.1.1 Wavelength and pulse duration	11
1.7.1.2 Irradiance	14
1.7.1.3 Directionality	15
1.7.1.4 Monochromaticity	16
1.7.2 Physical proprieties of the target material	16
1.7.3 Ambient condition:	17
1.7.3.1 Effect of liquid	18
1.8 Laser material interaction:	20
1.8.1 Absorption of laser radiation	21
1.8.2 Vapor Expansion and Recoil Pressures	25
1.9 Factors affecting laser ablation on solids	27
1.10 Single pulse LIBS	30
1.11 Double pulse LIBS	31
<u>Chapter II: Laser Induced Breakdown Spectroscopy</u>	37
2.1 Introduction	37
2.2 Mechanism of laser induced breakdown	38
2.3 Breakdown on solids surfaces	41
2.4 Plasma parameters:	42
2.4.1 Line broadening	42
2.4.2 Plasma temperature	44
2.4.3 Electron density	49
2.5 Plasma properties:	50
2.5.1 Complete thermo dynamic equilibrium	51
2.5.2 Plank's radiation law	51

2.5.3	Kirchhoff's law of radiation	51
2.5.4	Boltzman formula	52
2.5.5	Saha equation	53
2.5.5.1	The physical meaning of saha equation	54
2.5.6	Local Thermal Equilibrium	55
2.6	Self-absorption	56
2.7	Aim of work	57
<u>Chapter III: Experimental setup</u>		58
3.1	Basic LIBS Apparatus:	58
3.1.1	The excitation source	59
3.1.2	Focusing and light collection	60
3.1.3	Fiber optic cables	63
3.1.4	Wavelength selector	63
3.1.5	The radiant power detector	66
3.1.6	The computer	67
3.2	Experimental setup	67
<u>Chapter IV: Results and Discussion :</u>		72
4.1	Introduction	72
4.2	Qualitative analysis:	73
4.2.1	Spectral Emission:	73
4.2.1.1	Effect of Gate Time Delay on spectra emission lines	74
4.2.1.2	Effect of Gate Time Delay on Air Measurements	78
4.2.1.3	Effect of Gate Time Delay on Underwater Measurements	81
4.2.1.4	Comparison between air and underwater measurements	87
4.2.1.5	Effect of Inter-pulse Delay on the Emission Spectra of Underwater LIBS measurements	90
4.2.2	Electron Density	94
4.2.3	Plasma Temperature	100
4.3	Quantitative analysis:	113
4.3.1	Calibration curves and limit of detection	114
<u>Chapter V: Conclusion</u>		128
References		131
Appendix		137

List of Tables

Table (1-1)	The most used laser types in LIBS technique	
Table (1-2)	Some Fluencies measurements reported by Vadillo et al,1999	
Table (2.1)	Some measured breakdown thresholds on solids	
Table (3-1)	List of LBS components	
Table (4-1)	Selected spectral lines of Fe I and Zn I and corresponding spectroscopic data.	
Table 4.2	Available spectroscopic data for LOD measured lines	
Table 4.3	Certified composition of the samples	
Table 4.3	Limits of detection and relative standard deviation values
