ACKNOWLEDGMENT

At first and forever I thank *ALLAH* who help me greatly to achieve this work. I want to express my thanks to *Prof. Dr. ABD-ELHAY SALLAM* and *Prof. Dr. SALAH ELHAWY* for their efforts to support me. Great thanks to my parents, my wife, and all peoples who try to help me.

Finally I do not know what I could write to properly express how much I thank *MR WAFIK HUSSIN* who is always supportive no matter the difficulties.

CONTENTS

List of figures	IV
List of tables	VI
Summary	VII

Chapter 1

Introduction

1.1 Motivation	2
1.2 Gas Sensors And Systems	4
1.3 Types Of Gas Sensors	5
1.3.1 Electrochemical Sensors	6
1.3.2 Infrared Detectors + Analyzers	7
1.3.3 Photo Ionization Detectors	9
1.3.4 Flame Ionization Detectors	9
1.3.5 Thermal Conductivity Sensors	10
1.3.6 Gas Chromatography	10
1.3.7 Colorimetric Devices	12
1.4 Types of Monitoring	14
1.4.1 Continuous Monitoring	14
1.4.2 Portable Monitors	16
1.5 Installation And Maintenance	16
1.6 Gas Sensors Applications	17
1.7 Objectives Of The Thesis	20

Chapter 2

Neural Networks

2.1	Introduction	21
2.2	Historical Review	22
2.3	Neural Network Vs. Traditional Computer	24
2.4	Fundamentals Of Neural Networks.....	26
2.4.1	The Biological Prototype	26
2.4.2	The Artificial Neuron	27
2.4.3	Characteristics Of Artificial Neural Networks	28
2.5	Artificial Neural Networks Models	31
2.6	Activation Functions And Learning Types	33
2.7	Practical Considerations	37
2.8	Types Of Artificial Neural Networks	41
2.8.1	Feed-Forward Neural Network	41
2.8.1.1	Adaline And Madaline	41
2.8.1.2	Backpropagation	43
2.8.2	Feed-Back Networks	47
2.9	Integrated Neural Network	49
2.10	Future Outlook	49

Chapter 3

The System Physical Model

3.1	The Environment	52
3.2	The Gas Sensor	53
3.2.1	Gas Detection Mechanism	54
3.2.2	Structural And Mechanical Specifications	54
3.2.3	The Sensor's Circuit Specifications	56
3.2.4	Sensor Characteristic Specifications	57

3.3	The Analog To Digital Converter	59
3.4	The Used P.C.	63
Chapter 4		
Design Of Neural Network		
For Automatic Gas Recognition		
4.1	Introduction	65
4.2	Data Selection And Evaluation	67
4.2.1	Subset Selection	69
4.2.2	Subsets Selections Of Gases Data	75
4.3	Neural Network Simulation	80
4.4	The Effect of The Temperature and Humidity	86
Chapter 5		
Application Of The K-L Transformation		
To Gases Recognition		
5.1	Introduction	93
5.2	The K-L Transform Procedure	94
5.3	Gas Classification Using K-L Transform	96
5.4	Comparison Between The Neural Networks	
	And The K-L Transform Methods	99
Chapter 6		
Conclusions		
6.1	Conclusions	103
6.2	Suggestion For Future Work	105
	References	108

LIST OF FIGURES

1.1	The Different Types Of Gas Sensors	6
2.1	An Artificial Neuron Model	28
2.2	A Simple Multi-Layer Network	31
2.3	Different Activation Functions	34
2.4	Training Techniques Used With Neural Network	35
2.5	The Major Phases Of Classifier Development	37
2.6	The Adaline (Perceptron)	43
2.7	Single-Layer Feedback Network	48
3.1	Block Diagram Of Automatic Gas Recognition System	52
3.2	The TGS816 Detection Mechanism	55
3.3	The Sensor Structure And Configuration.....	55
3.4	The TGS816 Basic Measuring Circuit	56
3.5	The TGS816 Sensitivity Characteristics	58
3.6	The TGS816 Temperature And Humidity Characteristics	58
3.7	Block Diagram Representation Of A/D	60
4.1	Pattern Classification Approaches	67
4.2	Data Samples For Calm Air	71
4.3	Data Samples For Smoke	71
4.4	Data Samples For Alcohol	72
4.5	Data Samples For All Gases	72
4.6	FFT Component For Calm Air Data	79
4.7	FFT Component For Smoke Data	79
4.8	FFT Component For Alcohol Data	79
4.9	Number For Hidden Nodes Vs. The Training Time	82

4.10	Backpropagation Architecture For Automatic Gas Recognition	81
4.11	Flowchart Of The Backpropagation Algorithm	83
4.12	The Sensor Resistance at Overlapped Region	92
4.13	Neural Network For Covering The Effect of the Temperature and Humidity	92
5.1	Flowchart Of The K-L Transformation Method	95
5.2	Flowchart Of The K-L Transform Test Procedure	97

LIST OF TABLES

1.1 Sensors Capability Comparison	13
2.1 Comparison Of Conventional And Neural Network Computation	25
3.1 I/O Addressing Setting	62
3.2 D-Type Connector Pin Assignment	62
4.1 Statistical Data Analysis Of The Studied Gases	73
4.2 The Magnitude Of The First 16 Component Of FTT For Different Air Data Files	77
4.3 The Magnitude Of The First 16 Component Of FTT For Different Smoke Data Files	78
4.4 The Magnitude Of The First 16 Component Of FTT For Different Alcohol Data Files	78
4.5 The Results Of The Network Testing	85
4.6 Calm Air Data Calculated From Sensitivity curves	88
4.7 Smoke Data Calculated From Sensitivity curves	89
4.8 Alcohol Data Calculated From Sensitivity curves	89
5.1 Numerical Data Of The Distances Between The Target Vectors Of The Different Classes And Gasses Outputs Using The K-L Transform	98

SUMMARY

The economic realities of productivity, quality, and reliability for the industrial societies of the 21st century are placing major demands on existing manufacturing technologies. To meet both present and anticipated requirements, new and improved methods are needed. It is now recognized that these methods must be based on the powerful techniques employing computer-assisted systems. Full computer compatibility of all components and system must be aimed for.

With the widespread use of the artificial neural networks, a complex problems such as image, voice, pattern, and signal processing are ideally done.

Application of the artificial neural network on gas recognition is investigated in this thesis, trying to offer more powerful, and accurate monitoring and recognition system for improving work safety and reducing the downtime.

A complete automatic gas recognition system was designed. The system include electrochemical gas sensor, A / D card, and the digital computer, beside the necessary circuits for installation and interfacing. Software programs have been designed and implemented to perform the tasks of data collecting, and the neural network simulation, training, and testing. Also many software packages are used.
