HUMAN GENITAL PAPILLOMA VIRUS IN CERVICAL CARCINOMA VERSUS NON MALIGNANT CONDITIONS

THESIS

Submitted for Partial Fulfillment of
the MD Degree in
Clinical & Chemical Pathology

By

Dina Abdou Badawi

M.B., B.Ch., M. Sc.

Supervised By

Ibrahim Khalil
Prof. Dr.

Ibrahim Khalil Ali

Prof. of Clinical & Chemical Pathology
Faculty of Medicine
Ain Shams University

AG El-Mesiri
Prof. Dr.

Adel Mohammed El-Mesiri

Director of Medical & Bilharzial
Research Center (M.R.C.)
Ain Shams University

Dr. Magda Salah El-Din Gabr

Assist. Prof. of Clinical & Chemical Pathology
Faculty of Medicine
Ain Shams University

Dr. Nevine Nabil Kassem

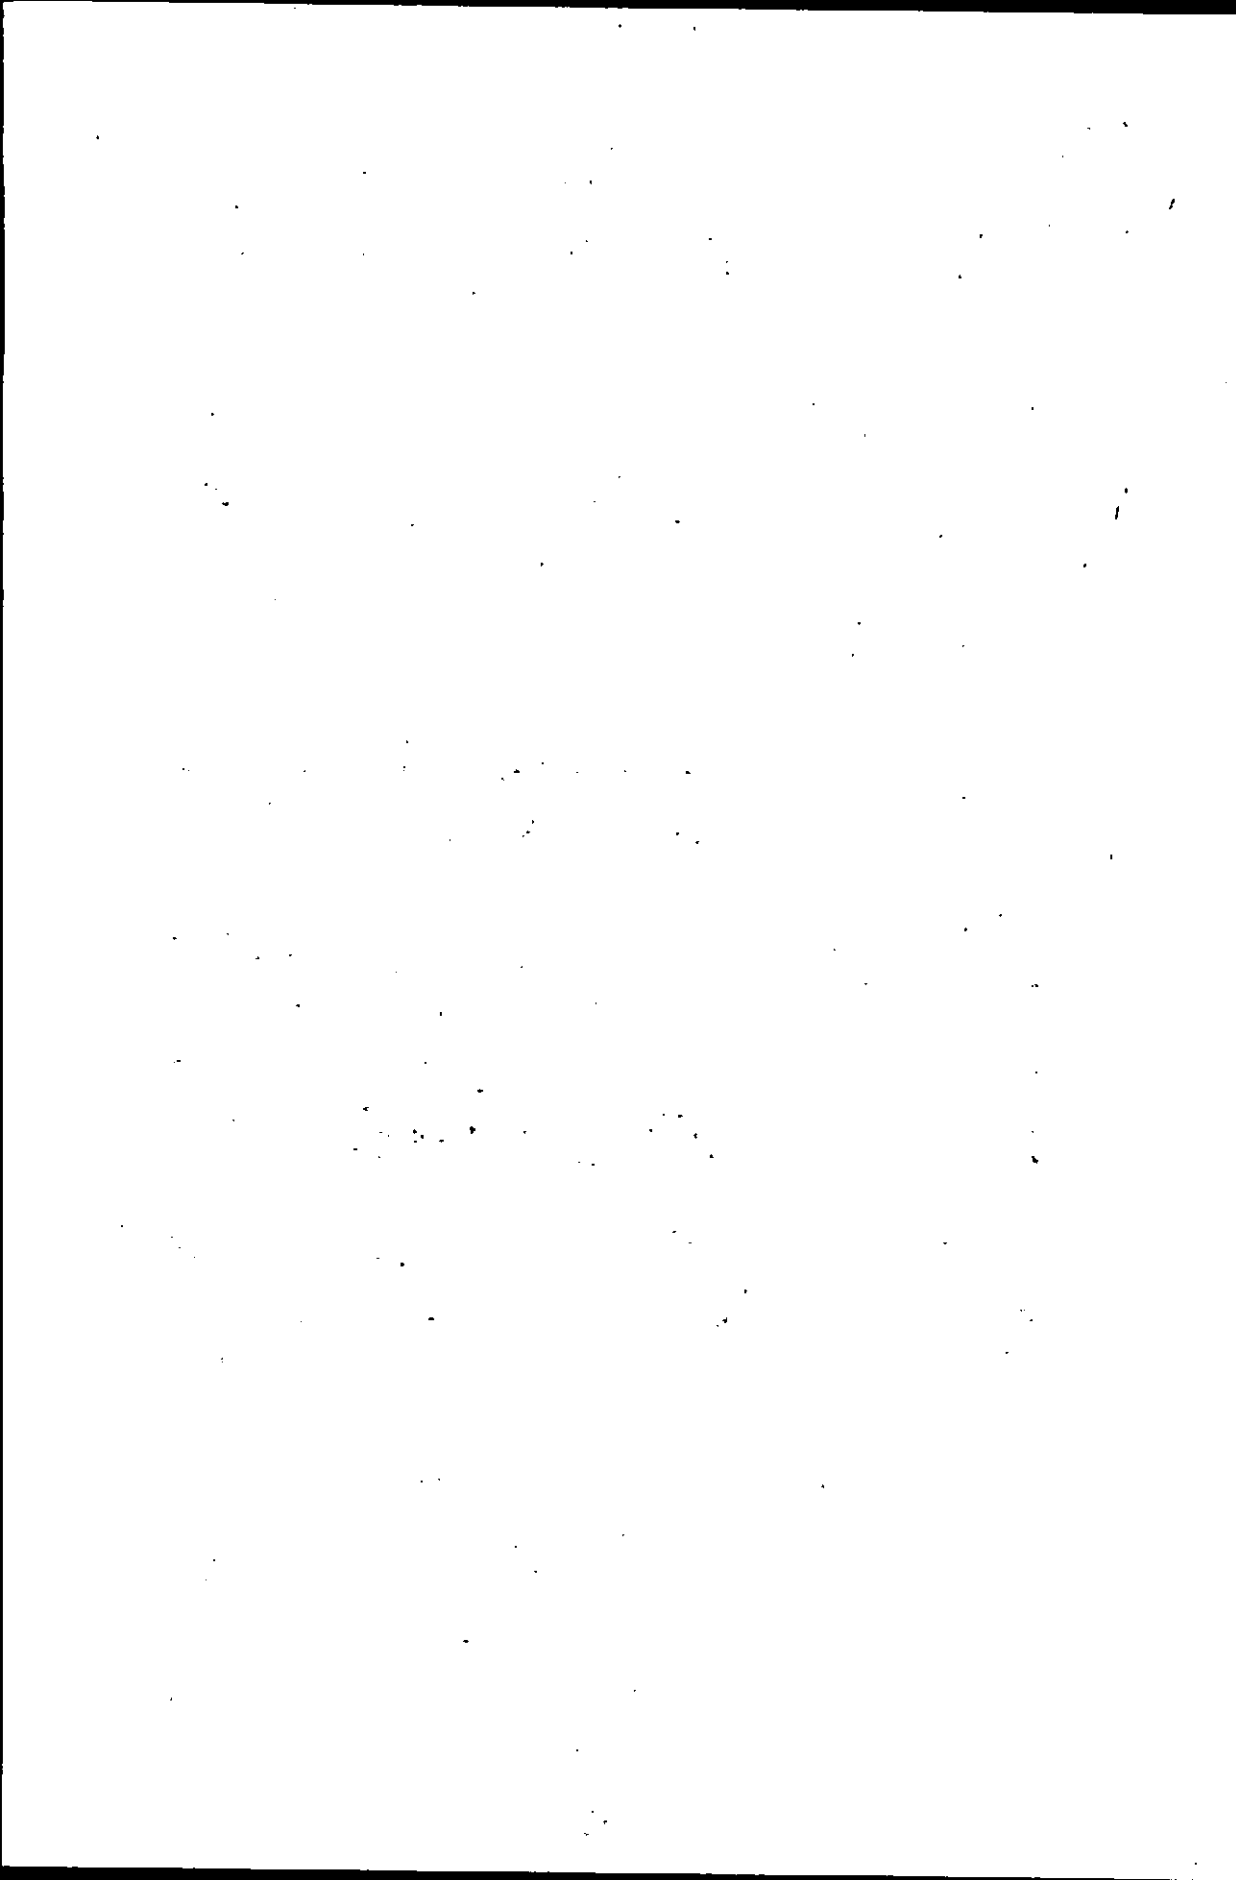

Assist. Prof. of Clinical & Chemical Pathology
Faculty of Medicine
Ain Shams University

Dr. Omnia Abo El Makarem Shaker

Assist Prof. of Clinical & Chemical Pathology
Faculty of Medicine
Ain Shams University

Acknowledgement

First and foremost, thanks to God.

I would like to express my deepest appreciation and gratitude to Prof. Dr. Ibrahim Khalil, Prof. of Clinical and Chemical Pathology, Ain Shams University, for his continuous support, constructive criticism, and continual encouragement throughout the work.

I am very grateful to Dr. Adel El-Mesiri, Director of MRC, Ain Shams University, for his great effort and continuous guidance and encouragement through out the preparation of this work.

I would like also to express my deep gratitude and thanks to Dr. Magda Salah El-Din Gabr, Assistant Prof. of Clinical and Chemical Pathology, Ain Shams University, for her sincere supervision, encouragement and energetic help in the details of this work.

I wish to give my warmest regards and gratitude to Dr. Nevine Nabil Kassem, Assistant Prof. of Clinical and Chemical Pathology, Ain Shams University, for her sincere directions meticulous supervision and giving much of her valuable time.

I am greatly indebted to Dr. Omnia Abo El Makarem Shaker, Assist Prof. of Clinical and Chemical pathology, Ain Shams University, for her inspiring supervision constructive advice and valuable guidance.

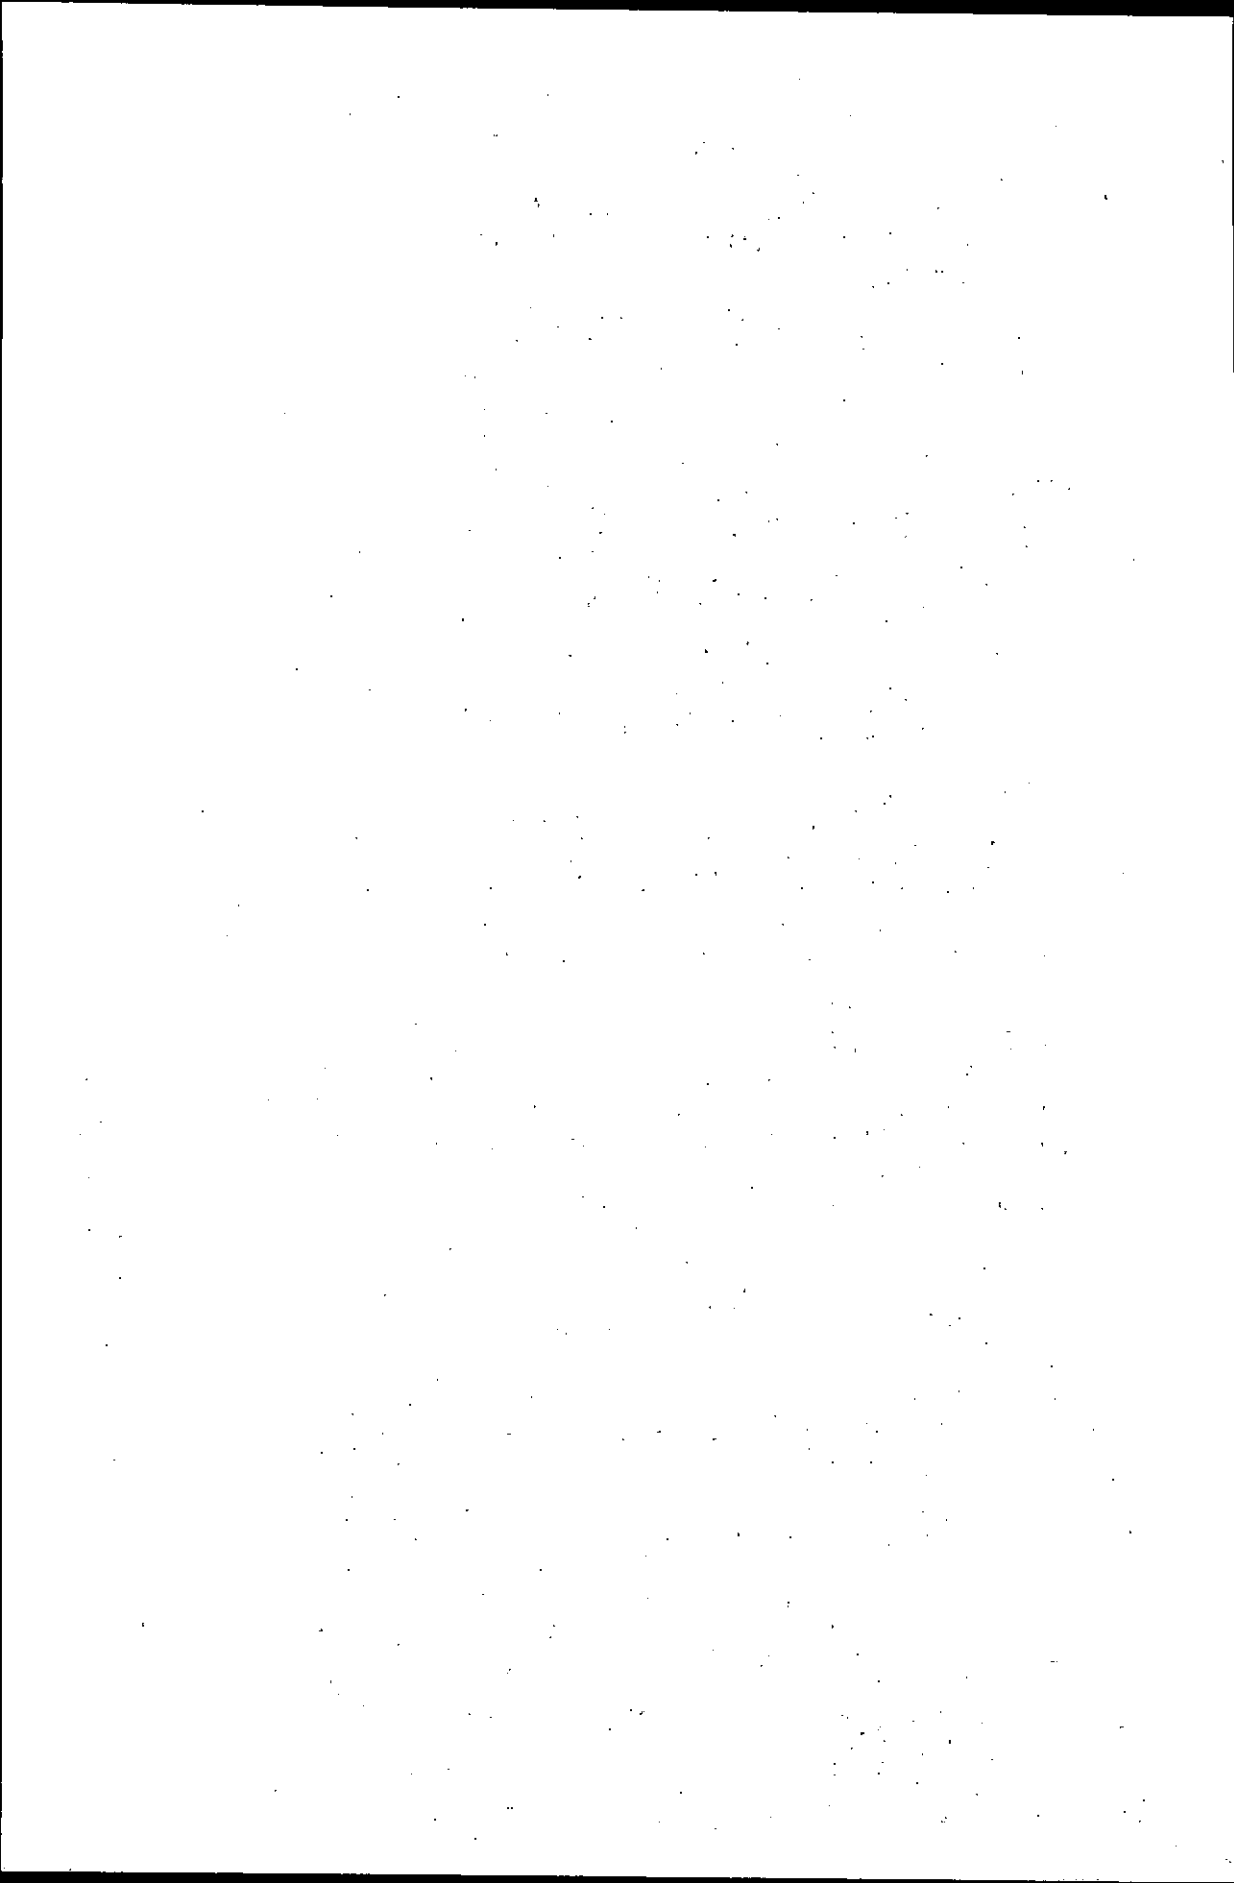

I am deeply thankful to Dr. Mahmoud El-Sorbagy, Professor of Obstetrics and Gynecology Department, Ain Shams University for his valuable suggestions and generous co-operation during the accomplishment of this thesis.

I would like to extend my thanks to Dr. Magda Abd El-Salam, Professor of Pathology, Ain Shams University, for her sincere advice and the precious time she offered me.

Also special thanks to Dr. Essam Zaki, Assistant Prof. of Molecular Biology, Mubarak City, for his sincere supervision scientific support encouragement and energetic help in the details of this work.

LIST OF TABLES

No.	Title	Page
1	Functions assigned to the papilloma virus open reading frames	8
2	The predominant site of HPV	16
3	Major clinical association of genital tract	23
4	Master mix components	
5	Results of HPV-DNA and typing in patients and control	101
6	Clinical data of patients and control examined for detection of HPV DNA by PCR	104
7	Results of HPV DNA by PCR in patients and control groups	104
8	Results of HPV-DNA by PCR in benign group	105
9	Results of HPV-DNA by PCR in malignant group	105
10	Comparison between benign and malignant groups regarding HPV -DNA by PCR.	106
11	Results of HPV-DNA by PCR in flat condyloma and control group	107
12	Results of HPV-DNA by PCR in CIN and control group	107
13	Results of HPV-DNA by PCR in cancer cervix and control group	107

14	Comparison between CIN and cancer cervix as regard HPV-DNA	107
15	Results of different genotype of HPV among the patients group and control group	108
16	Comparative evaluation between different HPV genotype within the group of flat condyloma and control group	109
17	Comparative evaluation between different HPV genotype within the group of CIN and control group.	109
18	Comparative evaluation between different HPV genotype within the group of cancer cervix and control group.	110
