CATHEPSIN D EXPRESSION IN EGYPTIAN BLADDER CANCER.

Thesis

Submitted for partial fulfilment of master degree.

In Pathology

By

Asmaa Gaber Abdou Mohammed

M.B., B.Ch. Menoufiya University.

Supervisors

Prof. Dr. Kawther Amin Amer

Professor Pathology

Faculty of Medicine, Menoufiya University.

Prof. Dr. Hassan Nabil Tawfik

Professor of Pathology

National Cancer Institute, Cairo University.

Prof. Dr. Mamdouh Mohammed Radwan

Professor and head of Pathology Departement

Faculty of Medicine, Menoufiya University.

Dr. Nancy Youssef Asaad

Lecturer of pathology

Faculty of Medicine, Menoufiya University.

Faculty of Medicine

Menoufiya University

2002

1. The first part of the paper is devoted to the study of the

properties of the function $f(x)$ defined by

$$f(x) = \sum_{n=0}^{\infty} \frac{a_n}{n!} x^n$$

where a_n are the coefficients of the power series

$$A(x) = \sum_{n=0}^{\infty} a_n x^n$$

$$A(x) = \sum_{n=0}^{\infty} a_n x^n$$

and $f(x)$ is the function defined by the series

$$f(x) = \sum_{n=0}^{\infty} \frac{a_n}{n!} x^n$$

It is known that

$$f(x) = \sum_{n=0}^{\infty} \frac{a_n}{n!} x^n = \sum_{n=0}^{\infty} \frac{a_n}{n!} x^n$$

$$f(x) = \sum_{n=0}^{\infty} \frac{a_n}{n!} x^n$$

where a_n are the coefficients of the power series

$$A(x) = \sum_{n=0}^{\infty} a_n x^n$$

$$A(x) = \sum_{n=0}^{\infty} a_n x^n$$

and $f(x)$ is the function defined by the series

$$f(x) = \sum_{n=0}^{\infty} \frac{a_n}{n!} x^n = \sum_{n=0}^{\infty} \frac{a_n}{n!} x^n$$

$$f(x) = \sum_{n=0}^{\infty} \frac{a_n}{n!} x^n = \sum_{n=0}^{\infty} \frac{a_n}{n!} x^n$$

$$f(x) = \sum_{n=0}^{\infty} \frac{a_n}{n!} x^n = \sum_{n=0}^{\infty} \frac{a_n}{n!} x^n$$

$$f(x) = \sum_{n=0}^{\infty} \frac{a_n}{n!} x^n = \sum_{n=0}^{\infty} \frac{a_n}{n!} x^n$$

where

$$f(x) = \sum_{n=0}^{\infty} \frac{a_n}{n!} x^n$$

$$f(x) = \sum_{n=0}^{\infty} \frac{a_n}{n!} x^n = \sum_{n=0}^{\infty} \frac{a_n}{n!} x^n$$

Acknowledgement

First and most, my sincere indebtedness and deep gratefulness are to ALLAH who helped me a lot to complete this work.

I would like to express my deep appreciation and real gratitude to Prof. **Dr. Kawther Amin Amer**, Professor of Pathology, Faculty of Medicine, Menoufiya University, for her kind supervision, valuable advises and great encouragement she offered me through this research.

I present my great acknowledgement to Prof. **Dr. Hassan Nabil Tawfik**, Professor of Pathology, National Cancer Institute, Cairo University, for his instructive advises, valuable suggestions and continuous guidance that were of great help to me in preparing this thesis.

I am really indebted to Prof. **Dr. Mamdouh, Mohammed Radwan** Professor and Head of Pathology Department, Faculty of Medicine, Menoufiya University, for his limitless cooperation and great support he gave me through the accomplishment of this study.

I shall always be thankful to **Dr. Nancy Yossef Asaad** lecturer of pathology, Faculty of Medicine, Menoufiya University, for her wise planning, objective guidance and patience that generously offered me making the completion of this work possible.

It delights me to express my sincere gratitude and thanks to all staff members, colleagues and workers in Pathology Department, Faculty of

Medicine, Menoufiya University. Who gave me a hand through the performance of this study.

Abbreviations.

AJCC-UICC	American Joint Committee on Cancer-Union Internationale Contre le Cancer.
BFGF	basic fibroblast growth factor.
BM	basement membrane.
CAM	cellular adhesion molecule.
CD	Cathepsin D.
CDS	Cathepsin D expression by host stroma cells.
CDT	Cathepsin D expression by tumor cells.
DNA	Deoxy ribonucleic acid.
E-cadherin	epithelial cadherin.
ECM	extracellular matrix.
HGF/SF	hepatic growth factor/scatter factor.
HNPCC	Hereditary non polyposis colon cancer.
HPV	human papilloma virus.
IGFII	Insulin Like Growth Factor II.
IGFBP	Insulin Like Growth Factor binding protein.
ISUP	International Society of Urological Pathology.
KD	Kilodalton.
M6P	mannose 6 phosphate.
MVD	microvessel density.
NOC	N-nitroso compound.
N- cadherin	neuronal cadherin.
PBS	phosphate buffer saline.
P-cadherin	Placental cadherin.
PSA	Prostatic specific antigen.
RB	Retinoblastoma
SCC	Squamous cell carcinoma.

TCC-----	Transitional cell carcinoma.
TGF Beta-----	transforming growth factor beta.
TSH-----	thyroid stimulating hormone.
UPA-----	Urokinase Plasminogen Activator.
WHO-----	World Health Organization.

List of tables.

Age distribution of the studied cases-----	Table 1
Gender distribution of the studied cases-----	Table 2.
Histopathological variables in the studied cases-----	Table 3.
Comparison between normal urothelium and malignant cells regarding CD expression-----	Table 4
Relationship between age of patients and CD expression-----	Table 5.
Relationship between gender and CD expression-----	Table 6
CD expression in TCC-----	Table 7.
CD expression in SCC-----	Table 8.
CD expression in adenocarcinoma-----	Table 9.
CD expression in the total studied cases-----	Table 10.
The relationship between CDT and CDS in the studied cases---	Table 11.
Survival analysis in TCC-----	Table 12.
Survival analysis in SCC-----	Table 13
Survival analysis in the total group-----	Table 14.
The correlation of CDT and CDS to overall survival in the total studied patients-----	Table 15.
