**BIOCHEMICAL EFFECT OF SOME
ANTIOXIDANTS AND THIAMINE ON
EXPERIMENTALLY INDUCED DIABETIC RATS**

**A Thesis
Presented to the Graduate School
Faculty of Veterinary Medicine, Alexandria University
In Partial fulfillment of the
Requirements for the Degree**

Of

Philosophy of Doctor In Veterinary Sciences

In

(Biochemistry)

By

Kadry Mohamed Ibrahim Sadek

Alexandria

**BIOCHEMICAL EFFECT OF SOME ANTIOXIDANTS AND
THIAMINE ON EXPERIMENTALLY INDUCED DIABETIC
RATS**

Presented by
Kadry Mohamed Ibrahim Sadek
For the Degree of
Doctor of Philosophy In Veterinary science

In
(Biochemistry)

Examiners' Committee:

Approved

PROF.DR. SAMI AHMED ABDEL AZIZ.

Professor of Biochemistry,
Faculty of Veterinary Medicine,
Cairo University.

S. A. Abdel Aziz

PROF.DR. NEHAD MOHAMED ABDEL MONEM.

Professor of Biochemistry,
Faculty of Science,
Alexandria University.

Nihad

PROF.DR. NABIL MOHAMED TAHA.

Professor and Head of the Department of Biochemistry,
Faculty of Veterinary Medicine,
Alexandria University.

Taha

PROF. DR. MAHDY ABD EL HAMID KORSHOM.

Professor of Biochemistry,
Faculty of Veterinary Medicine,
Alexandria University.

Korshom

PROF. DR ABD EL-WAHAB ALI MANDOUR.

Professor of Biochemistry,
Faculty of Veterinary Medicine,
Alexandria University.

Mandour

Advisors' Committee:

PROF.DR. NABIL MOHAMED TAHA.

Professor and Head of Biochemistry Department,
Faculty of Veterinary Medicine, Alexandria University.

Taha

PROF. DR. MAHDY ABD EL HAMID KORSHOM.

Professor of Biochemistry,
Faculty of Veterinary Medicine, Alexandria University.

M. Korshom

PROF. DR. ABD EL-WAHAB ALI MANDOUR.

Professor of Biochemistry,
Faculty of Veterinary Medicine, Alexandria University.

Mandour

بِسْمِ اللَّهِ الرَّحْمَنِ الرَّحِيمِ

قَالَ اَسْبِحَانِكَ
يَا عَلَمَ لَنَا يَا
مَا عَلَّمَنَا إِنَّكَ أَنْتَ
الْعَلِيمُ الْحَكِيمُ

البقرة ٣٢

ACKNOWLEDGMENT

My foremost and greatest gratitude and indebtedness go to ALLAH who is a constant support and guidance in my life at all times. I pray that I will be able to use my experiences and knowledge to help others and in doing so glorify ALLAH through all my actions and deeds. I believe that without ALLAH's support nothing would have been accomplished.

I owe a warm and deep thanks to Prof. Dr. Nabil Mohamed Taha, Professor and head of department of biochemistry, Faculty of Veterinary Medicine, Alexandria University, Egypt, for his choice of the research point, kind encouragement, great support, fruitful direction during supervision and the final revision of the manuscripts.

I am appreciated and grateful to Prof. Dr. Mahdy Abdel Hamid Korshom, Professor of Biochemistry, Faculty of Veterinary Medicine, Alexandria University, Egypt, for his continuous advice, excellent follow-up and assistance during all periods of his supervision, current discussion and extensive effort given throughout the present study including the revision and criticism of the manuscript.

In particular I am greatly indebted to Prof. Dr. Abdel Wahab Ali Mandour, Professor of Biochemistry, Faculty of Veterinary Medicine, Alexandria University, Egypt, for her kind encouragement, providing the facilities necessary to complete this work, continuous scientific guidance and the final revision of the present point.

My warmest and intimate cordial thanks go to all of my colleagues in Department of Biochemistry, Faculty of Veterinary Medicine, Alexandria University, Egypt, for their help.

TABLES OF CONTENTS

Title	Page
Acknowledgement	I
Table of contents	II
List of tables	IV
List of figures	V
List of abbreviations	VII
Introduction	1
Review of Literature	3
Diabetes Mellitus definition and prevalence	3
Aetiopathology of Type I Diabetes.....	3
Acute complications of DM.....	4
Insulin.....	4
Pathogenesis of chronic complications.....	5
Experimental diabetes mellitus.....	10
DM and dysfunctional endothelium.....	10
DM and Oxidative stress.....	11
Mechanisms of oxygen free radicals production by hyperglycemia.....	11
Effect of DM on lipid peroxidation.....	16
Effect of DM on antioxidant enzymes.....	18
Effect of DM on glutathione.....	20
Effect of DM on liver functions.....	20
Effect of DM on kidney functions.....	22
Effect of DM on lipid profiles.....	22
Effect of DM on blood glucose and insulin.....	24
Constituents of green tea.....	26
Effect of green tea on lipid peroxidation.....	26
Effect of green tea on antioxidant enzymes and GSH.....	27
Effect of green tea on liver fuctions.....	27
Effect of green tea on kidney functions.....	28
Effect of green tea on lipid profiles.....	28
Effect of green tea on blood glucose and insulin.....	29
Effect of lipoic acid on lipid peroxidation.....	30
Effect of lipoic acid on antioxidant enzymes and GSH.....	32
Effect of lipoic acid on liver fuctions.....	33
Effect of lipoic acid on kidney functions.....	34
Effect of lipoic acid on lipid profiles.....	34
Effect of lipoic acid on blood glucose and insulin.....	35
Effect of thiamine on lipid peroxidation.....	38
Effect of thiamine on antioxidant enzymes and GSH.....	39
Effect of thiamine on liver fuctions.....	39
Effect of thiamine on kidney functions.....	39
Effect of thiamine on lipid profiles.....	40
Effect of thiamine on blood glucose and insulin.....	40
Material and Methods	42
Materials.....	42
Animals.....	42
Diabetogenic agent.....	42
Chemicals.....	42
Instruments.....	43
Experimental design.....II.....	43

Collection of samples..... 43

Methods..... 44

Determination of lipid peroxidation in tissue..... 44

Determination of glutathione peroxidase activity in tissues..... 45

Determination of glutathione S- transferase activity in tissues..... 46

Determination of glutathione in tissues..... 47

Determination of liver function tests..... 48

Determination of total serum protein level..... 48

Determination of serum albumin level..... 49

Determination of serum transaminases..... 49

Determination of kidney function tests..... 52

Determination of serum urea level..... 52

Determination of serum uric acid level..... 53

Determination of serum creatinine level..... 54

Determination of total serum cholesterol..... 55

Determination of serum triglycerides concentration..... 57

Determination of serum high density lipoprotein level..... 59

Determination of serum low density lipoprotein concentration..... 61

Determination of serum glucose..... 61

Statistical analysis..... 63

Results..... 64

Discussion..... 95

Conclusion..... 114

English summary..... 115

References..... 119

Arabic summary

LIST OF TABLES

No.	Title	Page
1	Effect of STZ (45mg/kg i.p.), green tea (10g/kg diet), lipoic acid (500mg/kg diet) and thiamine (50mg/kg diet) on lipid peroxidation, GPx activity, GST activity and G-SH of rats liver.	65
2	Effect of STZ (45mg/kg i.p.), green tea (10g/kg diet), lipoic acid(500mg/kg diet) and thiamine (50mg/kg diet) on total protein, albumin and globulin of rats.	74
3	Effect of STZ (45mg/kg i.p.), green tea (10g/kg diet), lipoic acid(500mg/kg diet) and thiamine (50mg/kg diet) on serum glucose, ALT and AST activities of rats.	75
4	Effect of STZ (45mg/kg i.p.), green tea (10g/kg diet), lipoic acid(500mg/kg diet) and thiamine (50mg/kg diet) on kidney functions of rats.	81
5	Effect of STZ (45mg/kg i.p.), green tea (10g/kg diet), lipoic acid(500mg/kg diet) and thiamine (50mg/kg diet) on serum cholesterol, triglyceride and CVR of rats.	85
6	Effect of STZ (45mg/kg i.p.), green tea (10g/kg diet), lipoic acid(500mg/kg diet) and thiamine (50mg/kg diet) on serum VLDL-c, HDL-c and LDL-c of rats.	86

LIST OF FIGUERS

Title	Page
Fig. (1:1): Synthesis of nitric oxide from arginine	8
Fig. (1:2): pathways involved in the genesis of the late complications of DM	9
Fig. (1:3): Involvement of polyol pathway in diabetic complications	13
Fig. (1:4): High glucose flux through constitutive glucose transporters on endothelial cell	14
Fig.(1:5): Pathogenesis of hyperoxidative stress in diabetes	15
Fig.(1:6): Pathways of hyperglycemia-induced oxidative stress	16
Fig. (1:7): Inhibitors include enzymes such as catalase, and peroxidases	19
Fig. (1:8): Metabolic basis of lipoprotein in diabetes mellitus	24
Fig. (1:9): Metabolic mechanism for the suppression by thiamine of hepatic lipogenesis in diabetes	40
Fig. (2): Effect of STZ (45mg/kg i.p.), green tea (10g/kg diet), lipoic acid (500mg/kg diet) and thiamine (50mg/kg diet) on lipid peroxidation (nmol MDA/gm) of rats liver.	66
Fig. (3): Effect of STZ (45mg/kg i.p.), green tea (10g/kg diet), lipoic acid (500mg/kg diet) and thiamine (50mg/kg diet) on GPx activity (i.u/gm) of liver of rats.	68
Fig. (4): Effect of STZ (45mg/kg i.p.), green tea (10g/kg diet), lipoic acid (500mg/kg diet) and thiamine (50mg/kg diet) on GST activity (mol CDNB/min/gm) of liver of rats.	70
Fig. (5): Effect of STZ (45mg/kg i.p.), green tea (10g/kg diet), lipoic acid (500mg/kg diet) and thiamine (50mg/kg diet) on G-SH (μ mol/gm) of liver of rats.	72
Fig. (6,7): Effect of STZ (45mg/kg i.p.), green tea (10g/kg diet), lipoic acid (500mg/kg di and thiamine (50mg/kg diet) on total protein, albumin and globulin of rats.	76
Fig. (8,9): Effect of STZ (45mg/kg i.p.), green tea (10g/kg diet), lipoic acid (500mg/kg die and thiamine (50mg/kg diet) on serum ALT and AST activities of rats.	78
Fig. (10,11): Effect of STZ (45mg/kg i.p.), green tea (10g/kg diet), lipoic acid (50mg/kg diet) and thiamine (50mg/kg diet) on kidney functions of rats.	82
Fig. (12,13): Effect of STZ (45mg/kg i.p.), green tea (10g/kg diet), lipoic acid (500mg/kg and thiamine (50mg/kg diet) on serum glucose, cholesterol, triglycerides of rats.	87
Fig. (14,15): Effect of STZ (45mg/kg i.p.), green tea (10g/kg diet), lipoic acid (500mg/kg and thiamine (50mg/kg diet) on serum VLDL-C, HDL-c and LDL-c of rats.	89
Fig. (16,17): Effect of STZ (45mg/kg i.p.), green tea (10g/kg diet), lipoic acid (500mg/kg and thiamine (50mg/kg diet) on CVR of rats.	92
