South Valley University
Faculty of Science (Aswan)

Characterization of Fibrous Materials by Two and Multiple-Beam Interferometry

A THESIS

Submitted to the Faculty of Science (ASWAN)

South Valley University

For the Ph.D. degree in Physics

(Optics)

By

Khaled Mohamed Yassein

M. Sc. In Physics (2001)

Supervised by

Prof. Dr. A. E. Belal

*Prof. of Physics,
Faculty of Science,
South Valley University*

Prof. Dr. A. A. Hamza

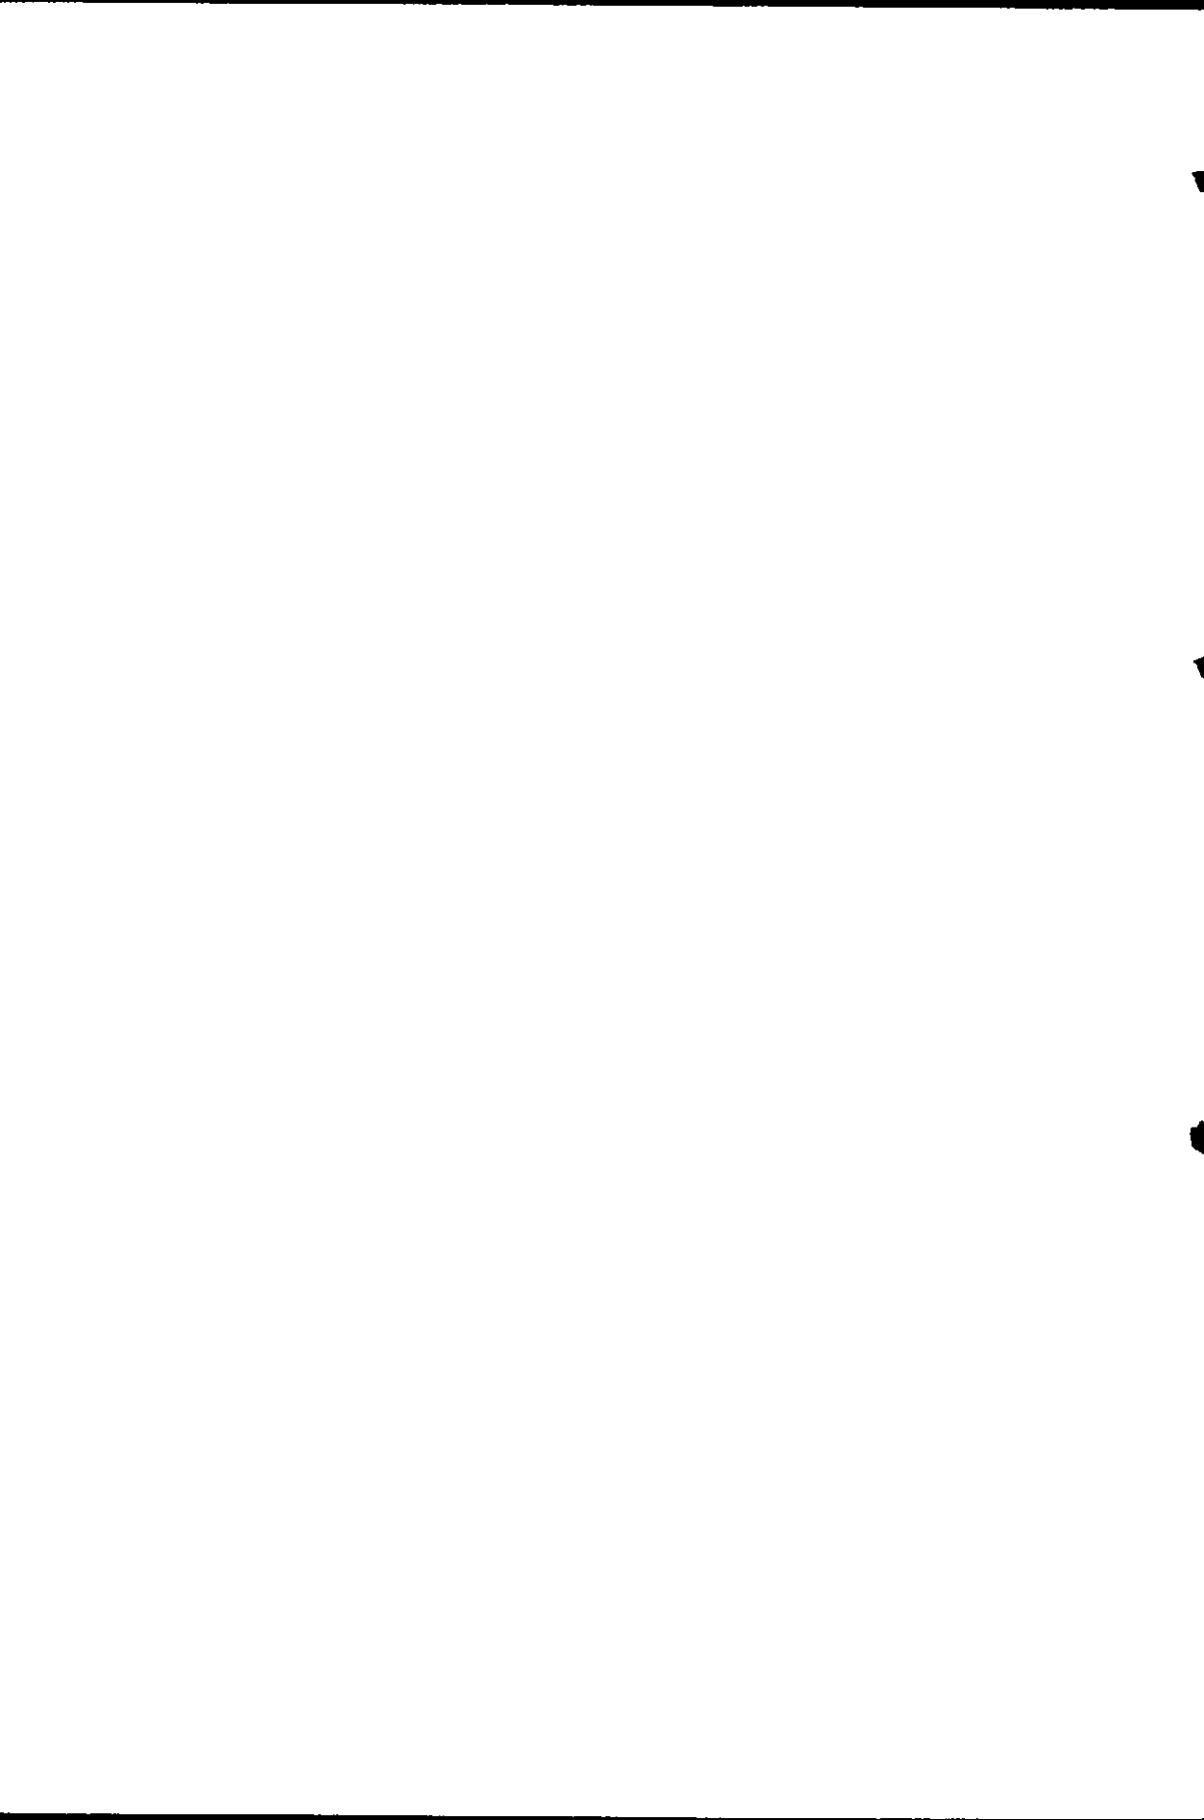

*Prof. of Physics and
Former President of
Mansoura University*

Prof. Dr. T. Z. N. Sokkar

*Prof. of Physics and Dean of Faculty of Science,
Mansoura University*

ACKNOWLEDGEMENT

ACKNOWLEDGEMENTS

All thanks and indebtedness is to **ALLAH** who guided and aided me to bring-forth and achieves this thesis.

I have the greatest pleasure to express my sincere gratitude and appreciation to **Prof. Dr. A. E. Belal**, Professor of Physics, Faculty of Science, South Valley University Branch at Aswan, for his supervision, continuous encouragement and providing facilities.

I have the greatest pleasure to express my sincere gratitude and appreciation to **Prof. Dr. A. A. Hamza**, Professor of Physics and Former President of Mansoura University, for suggesting the point of research, supervision, valuable advice and useful discussions.

I wish to express my gratitude to **Prof. Dr. T. Z. N. Sokkar**, Professor of Physics and Dean of Faculty of Science, Mansoura University, for his continuous discussions, kind supervision, continuous encouragement and providing facilities throughout all steps and details of this study.

My thanks are due to all members of the Optics Group in the Faculty of Science, Mansoura University, especially, **Dr. M. A. El-Bakary**, **Dr. M. El-Morsy** and **Dr. H. M. El-Dessouk**, for their helps and discussions.

I would like to express my thanks to **Prof. Dr. S. E. Shalaby**, Professor of Textile Engineering, National Research Centre, for his useful discussions.

Special thanks to **Dr. M. M. Abd-Elrahman**, Professor of Physics and Head of Physics Department, Faculty of Science, South Valley University Branch at Aswan, for his continuous encouragement.

I also thank all my colleagues and the staff members of the Department of Physics, Faculty of Science, South Valley University Branch at Aswan for their encouragement during the course of this work. My thanks to *Mr. M. A. Agour* for his help.

Finally, I would like to thank my family for their help, understanding and encouragement during this work.

Khaled Mohamed Yassien

AbstractIV

Chapter (1)

General Introduction and Previous Work

1. General Introduction and Previous Work.....1

Chapter (2)

Experimental Techniques and General Theoretical Considerations

- 2.1. Formation and Application of Two-Beam Interferometric Techniques to Fibres14
- 2.1.1. Double-beam (Pluta) interference microscope.....14
- 2.1.1-a. Application of two-beam interference microscope to fibres.....15
- 2.1.2. Variable Wavelength Interferometry.....22
- 2.1.2-a. Experimental set-up for the polarizing interference microscope for the VAWI technique24
- 2.1.2-b. Measurement of the spectral dispersion for birefringence B of fibres26
- 2.1.2-c. Measurements of the spectral dispersion for the refractive indices n^{\parallel} and n^{\perp} of fibre27
- 2.2. Formation of Multiple-Beam Interferometer.....28
- 2.2.1. Principle of the multiple-beam interference system.....29
- 2.2.2. Multiple-beam Fizeau fringes formed by a silvered liquid

wedge interferometer	31
2.2.3. Application of multiple-beam microinterferometry for measurement of refractive index and birefringence of fibres with regular or irregular cross-sections.....	34
2.3. Refractive Index Profile of the Fibre	35
2.4. Automatic Fringe Analysis of Multiple-Beam Microinterferograms	37
2.4.1. Image processing concepts	38

Chapter (3)

Interferometric Studies on the Spectral Dispersion Curves of Low, Medium and High Birefringence Fibres

3.1. Interferometric Studies on the Dispersion Properties of Medium Birefringence Fibres	42
3.1.1. Dispersion properties of polyester samples	43
3.2. Measurement of the Spectral Dispersion Curves of Low Birefringence Polymer Fibres	62
3.2.1. Theoretical considerations	62
3.2.2. The spectral dispersion of polymer fibres	66
3.3. Determination of the Spectral Dispersion Curves of Highly Oriented Fibres	82
3.3.1. Theoretical considerations	82
3.2.2. Determination of the spectral dispersion curves of PEN highly oriented fibres	86
Conclusions	97
