

Ain Shams University
Faculty Of Women For
(Art, Science and Education)
Chemistry Department

Modern Photo Analytical Techniques for Assessment of Some Important Industrial Products.

A Thesis

***Submitted for the Degree of Doctor of Philosophy of Science
(Inorganic and Analytical Chemistry)***

Presented by

Mona Nasser Mohamed Abou Omar

(M.Sc. 2012)

Supervisors

Prof. Dr. Mona Abdel Aziz Dr. Mohamed Said

Ahmed Attia

Prof. of Analytical Chemistry

Assistant Prof. of Analytical Chemistry,

Faculty of Women, for Art, Faculty of Science, Ain Shams

Science and

Education, Ain Shams University

University

Dr. Manara Ahmed Mohamed Ayoub

Lect. of Inorganic and Analytical Chemistry,

Faculty of Women, for Art, Science and Education

Ain Shams University

2015

DEDICATION

To my
parents
husband
daughters and son

Acknowledgment

Thanks to Allah for giving me the strength to complete my Ph.D. thesis.

I wish to express my deep appreciation to Prof. Dr. Mona Abdel Aziz Ahmed, Professor of Analytical Chemistry, Chemistry Department Faculty of Women for Arts, Science & Education, Ain Shams University for kind supervision, valuable advice, and continuous guidance throughout this research.

I would like to express my deepest gratitude and thanks to Dr. Mohamed Said Attia, Assistant Professor of Analytical Chemistry, Faculty of Science, Ain Shams University for suggesting the point of research and, for his keen supervision, useful discussion and constructive guidance.

Many thanks to Dr. Manara Ahmed Ayoub, Lecture of Inorganic Chemistry, Chemistry Department, Faculty of Women for Arts, Science & Education, Ain Shams University for her help and valuable discussion.

I wish also to thank the Head of Chemistry Department, Faculty of Women for Arts, Science and Education, Ain Shams University for continuous facilities she offered.

Finally, my deep thanks to my parents, husband, daughters, son and my friends for their encouragement and moral support.

Mona Nasser

QUALIFICATIONS

Student Name: Mona Nasser Mohamed Abou Omar

Scientific Degree: M.Sc. (Inorganic and Analytical Chemistry)

Department: Chemistry

Name of Faculty: Faculty of Women for Arts, Science & Education

University: Ain Shams University

B.Sc. Graduation Date: May 2006

M.Sc. Graduation Date: 2012

Contents

Chapter 1	Page
General Introduction	
1.1. Basics of Luminescence .	1
1.2. The Fluorescence Process.	2
1.3. Theory of Fluorescence Spectroscopy.	4
1.3.1. Photoluminescent Energy Level Diagrams.	5
<i>1.3.1.1. Collisional Deactivation (external conversion)</i>	6
<i>1.3.1.2. Intersystem Crossing (10^{-9} s) .</i>	7
<i>1.3.1.3. Phosphorescence .</i>	7
<i>1.3.1.4. Fluorescence .</i>	7
<i>1.3.1.5. Internal Conversion .</i>	8
1.4. Advantages of Fluorescence Spectroscopy.	9
1.4.1. Sensitivity.	9
1.4.2. Specificity.	9

Contents

1.4.3. Wide Concentration Range.	10
1.4.4. Simplicity and Speed.	10
1.4.5. Low Cost.	10
1.5. Factors Affecting on Fluorescence Spectroscopy.	10
1.5.1. Fluorescence and Structure.	11
1.5.2. Effect of Solvent Nature.	12
1.5.3. Effect of Structural Rigidity.	13
1.5.4. Effect of Temperature.	13
1.5.5. Effect of pH.	13
1.5. 6 . Effect of Dissolved Oxygen.	14
1.5.7 . Effect of Concentration on Fluorescence.	15
1.6. Different Applications of Fluorescence and Phosphoresence Spectroscopy.	17
1.7. Schiff Base Gold (III) Complexes	19
1.7.1. Biological Activity of Gold(III) Complexes.	19

Contents

1.7.2. Using of Gold(III) Complexes as an Optical Sensors.	22
1.8. Sol-Gel.	26
1.8.1. Introduction to Sol-Gel.	26
1.8.2. Advantages of Sol-Gel Technique.	27
1.9. Enzymes.	28
1.9.1. Defination and Reaction Mechanism.	28
1.9.2. Activity and Specifity of Enzymes.	29
1.9.3. Xanthine Oxidase Enzyme.	30
1.9.3.1. Introduction.	30
1.9.3.2. Different Methods for Determination of Xanthine Oxidase (XO).	30
<i>1.9.3.2.1. Electrochemical Biosensing Method.</i>	30
<i>1.9.3.2.2. High-Performance Liquid Chromatography (HPLC).</i>	34
<i>1.9.3.2.3. Amperometric and Voltammetric Methods.</i>	36

Contents

1.10. Drugs.	38
1.10.1. Norepinephrine (NE).	38
1.10.1.1. Introduction.	38
1.10.1.2. Different Methods for Determination of Norepinephrine (NE).	38
<i>1.10.1.2.1. Electrochemical Methods</i>	39
<i>1.10.1.2.2. High-Performance Liquid Chromatography (HPLC).</i>	40
<i>1.10.1.2.3. Spectrophotometric Methods</i>	43
<i>1.10.1.2.4. Voltammetric Methods</i>	45
1.10.2. Lorazepam.	46
1.10.2.1. Introduction.	46
1.10.2.2. Different Methods for Determination of Lorazepam.	47
1.10.3. Diazepam.	50
1.10.3.1. Introduction.	50

1.10.3.2. Different Methods for Determination of Diazepam	51
1.11. Referances	61
Chapter Two New Photo Probe for Assessment of Norepinephrine in Pharmaceutical Formulation and Serum Samples	
2.1. Introduction	72
2.2. Materials and Methods	74
2.2.1. Materials.	74
2.2.2. Chemicals and Reagents	74
2.2.3. Apparatus.	75
2.2.4. General Procedure	75
2.2.4.1. <i>Preparation of Norepinephrine Solutions.</i>	75
2.2.4.2. <i>Preparation of 5-(p-ethoxy) benzoyl methyl-2-diazo-α-naphthol-4-hydroxythiazol.</i>	75
2.2.4.3. <i>Characterization of of 5-(p-ethoxy) benzoyl</i>	76

Contents

<i>methyl-2-diazo- α -naphthol-4-hydroxy thiazol.</i>	
2.2.5. Determination of Norepinephrine in Pharmaceutical Formulation.	76
2.2.6. Determination of Norepinephrine in Serum Sample.	77
2. 3. Results and Discussion	77
2. 3. 1. Spectral Characteristics	77
2.3.2. Effect of Solvent.	78
2.3.3 Effect of pH.	79
2.3.4. Interference in the Detection of Norepinephrine.	79
2.3.5. Calibration Curve and Detection limit.	80
2.3.6. Accuracy and Precision of the Method	81
2.3.7. Analytical Application. (Determination of Norepinephrine in Different Samples)	82
2. 4. Conclusion	83

2.5. Referances	94
Chapter Three Highly Sensitive and Selective Spectrofluorimetric Determination of Diazepam in Urine and Serum Samples Using Gold(III) Complex.	
3.1. Introduction	98
3.2. Experimental	100
3.2.1. Materials	100
3. 2.2. Reagents	101
3. 2.3. Apparatus	101
3.2.4. Preparation of Diazepam Solutions and Construction of Calibration Curve.	101
3. 2.5. Determination of Diazepam in Serum Solution	102
3. 2.6. Determination of Diazepam in Urine Solution	102
3. 3. Result and Discussion	103

Contents

3.3. 1. Absorption and Emission Spectra	103
3.3.2. Effect of Experimental Variables	104
3. 3.2.1. <i>Effect of pH</i>	104
3. 3.2.2. <i>Effect of Solvent</i>	104
3.3.3. Analytical Performance	105
3.3.3.1. <i>Analytical Parameters of Optical Sensor Method</i>	105
3.3.4. Accuracy and Precision of the Method	106
3.3.5. Selectivity	107
3.3.6. Application to Samples	107
3.4. Conclusion	108
3.5. References	120
Chapter Four Highly Sensitive and Selective Spectrofluorimetric Determination of Lorazepam in Urine and Serum Samples Using Gold(III) Complex.
