Integrated Low Cost Technology for Rural Areas Sanitation

By

Dawas Fuhaid Alshammari

M.Sc. Faculty of Engineering, University of Mansoura, 1995

A thesis

Submitted in Partial Fulfillment for the Requirements of the

Degree of Doctor of Philosophy

In

Public Works Engineering

Supervised by

Prof. Dr.

AHMED FADEL AHMED ASHRY

Prof. of Sanitary Engineering

Faculty of Engineering

University of Mansoura

2001

B
0001

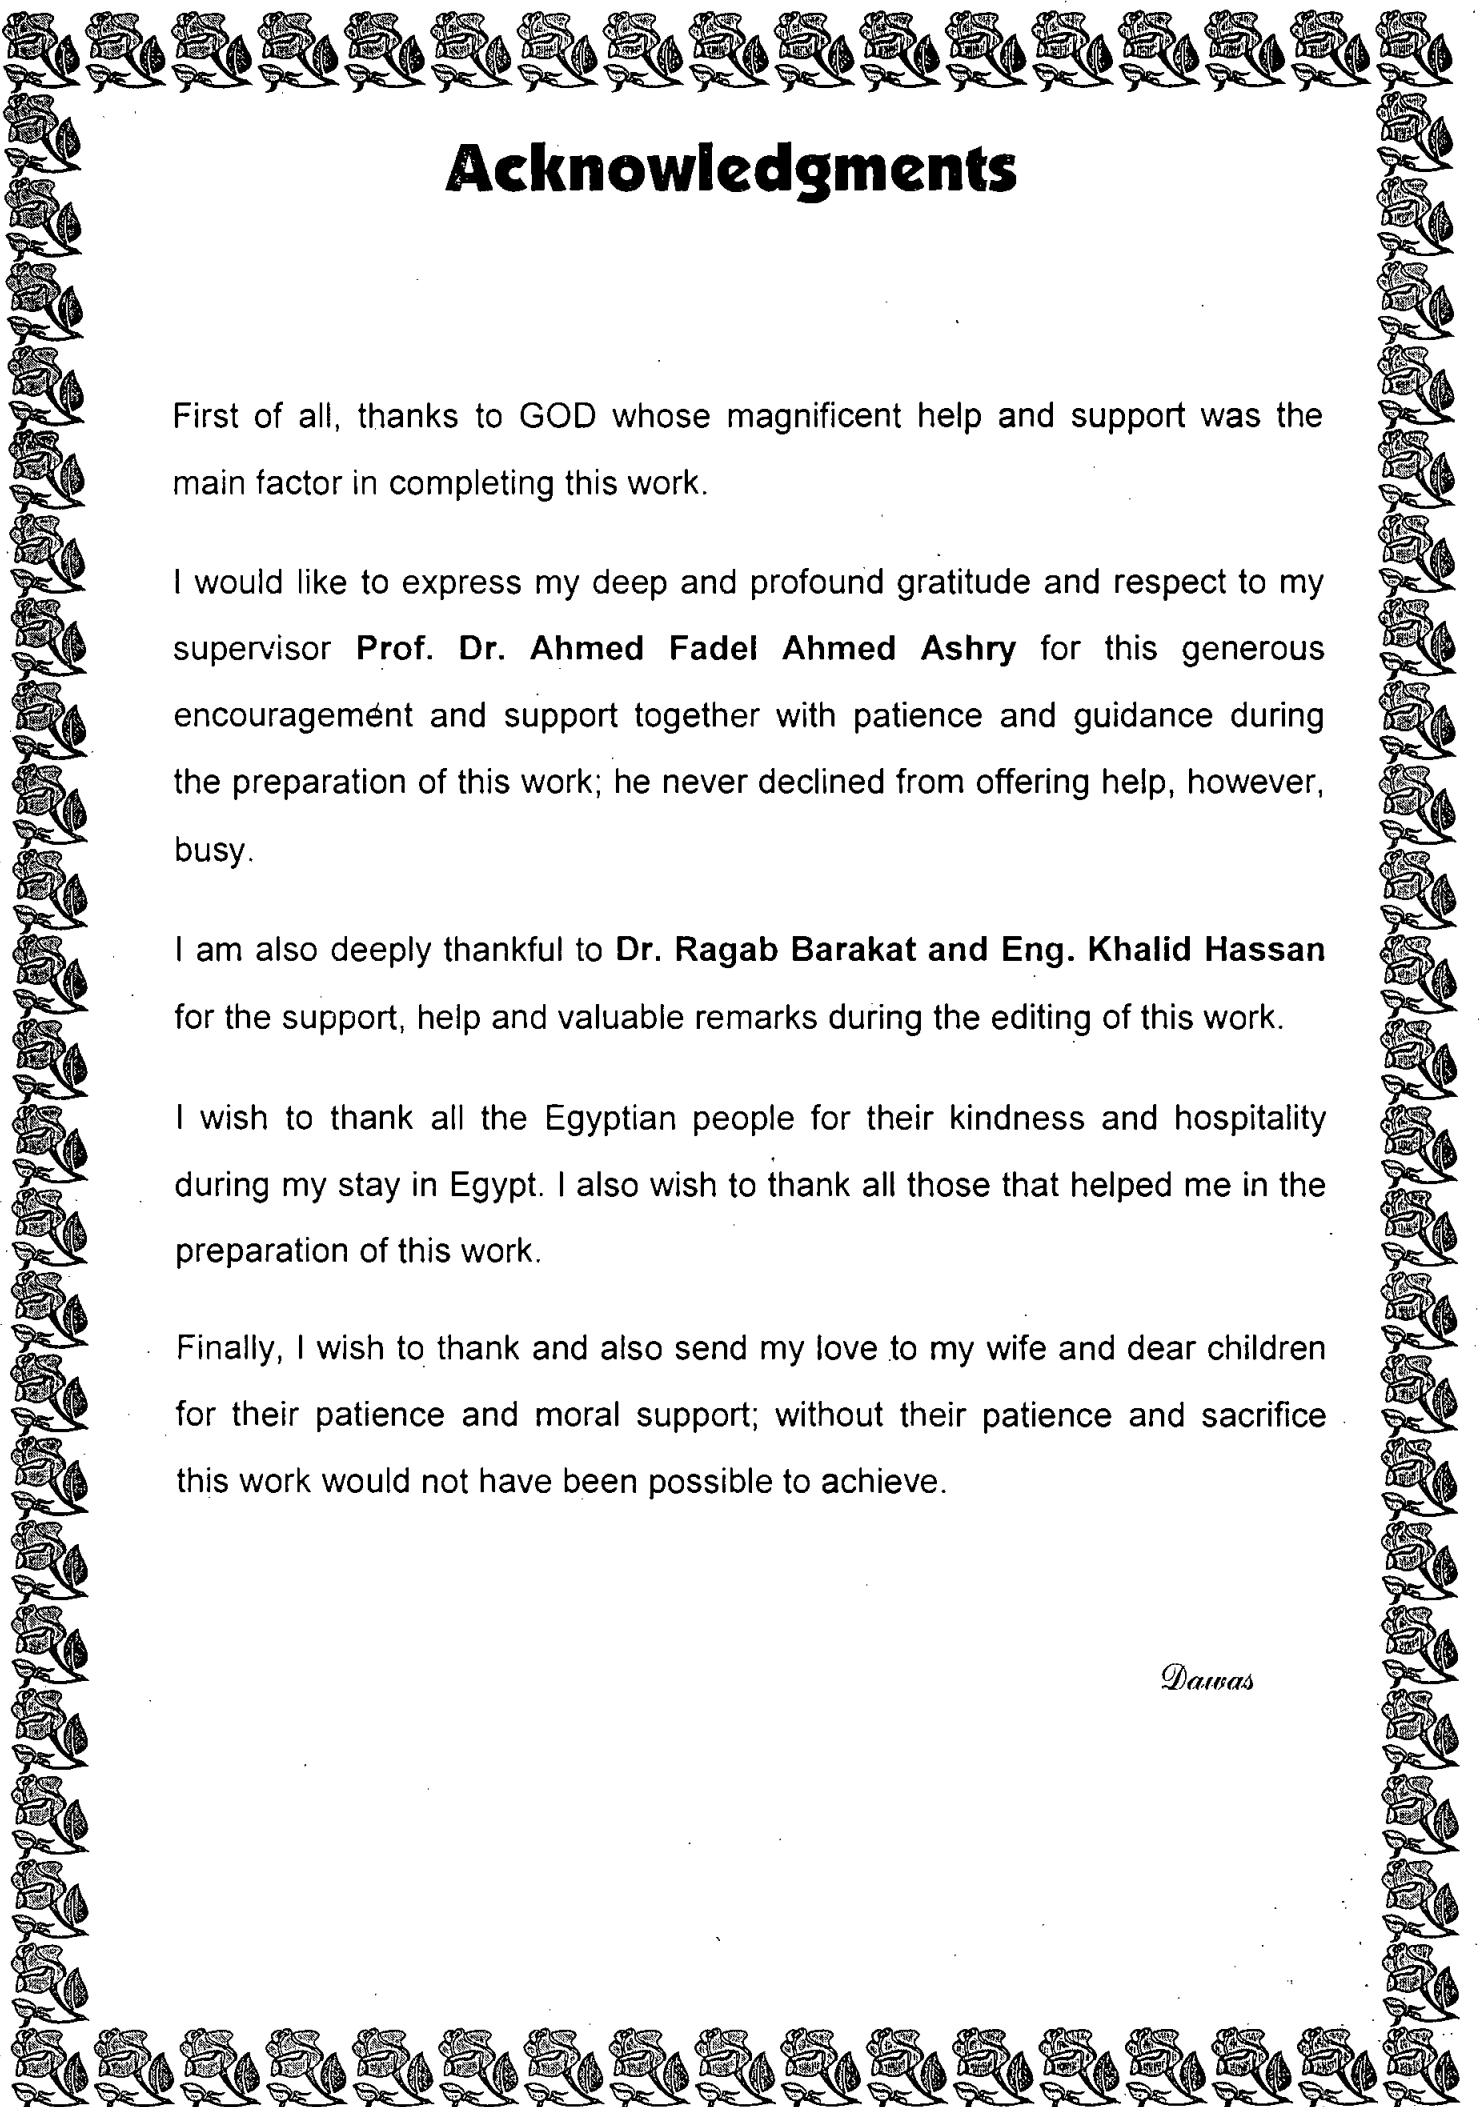

SUPERVISOR

CANDIDATE NAME : Dawas Fuhaid Alshammari

**THESIS TITLE : Integrated Low Cost Technology for
Rural Areas Sanitation**

SUPERVISOR:

1) Prof. Dr. Ahmed Fadel Ahmed Ashry *Ahmed Fadel*
Prof. of Sanitary Engineering
Faculty of Engineering
Mansoura University

Acknowledgments

First of all, thanks to GOD whose magnificent help and support was the main factor in completing this work.

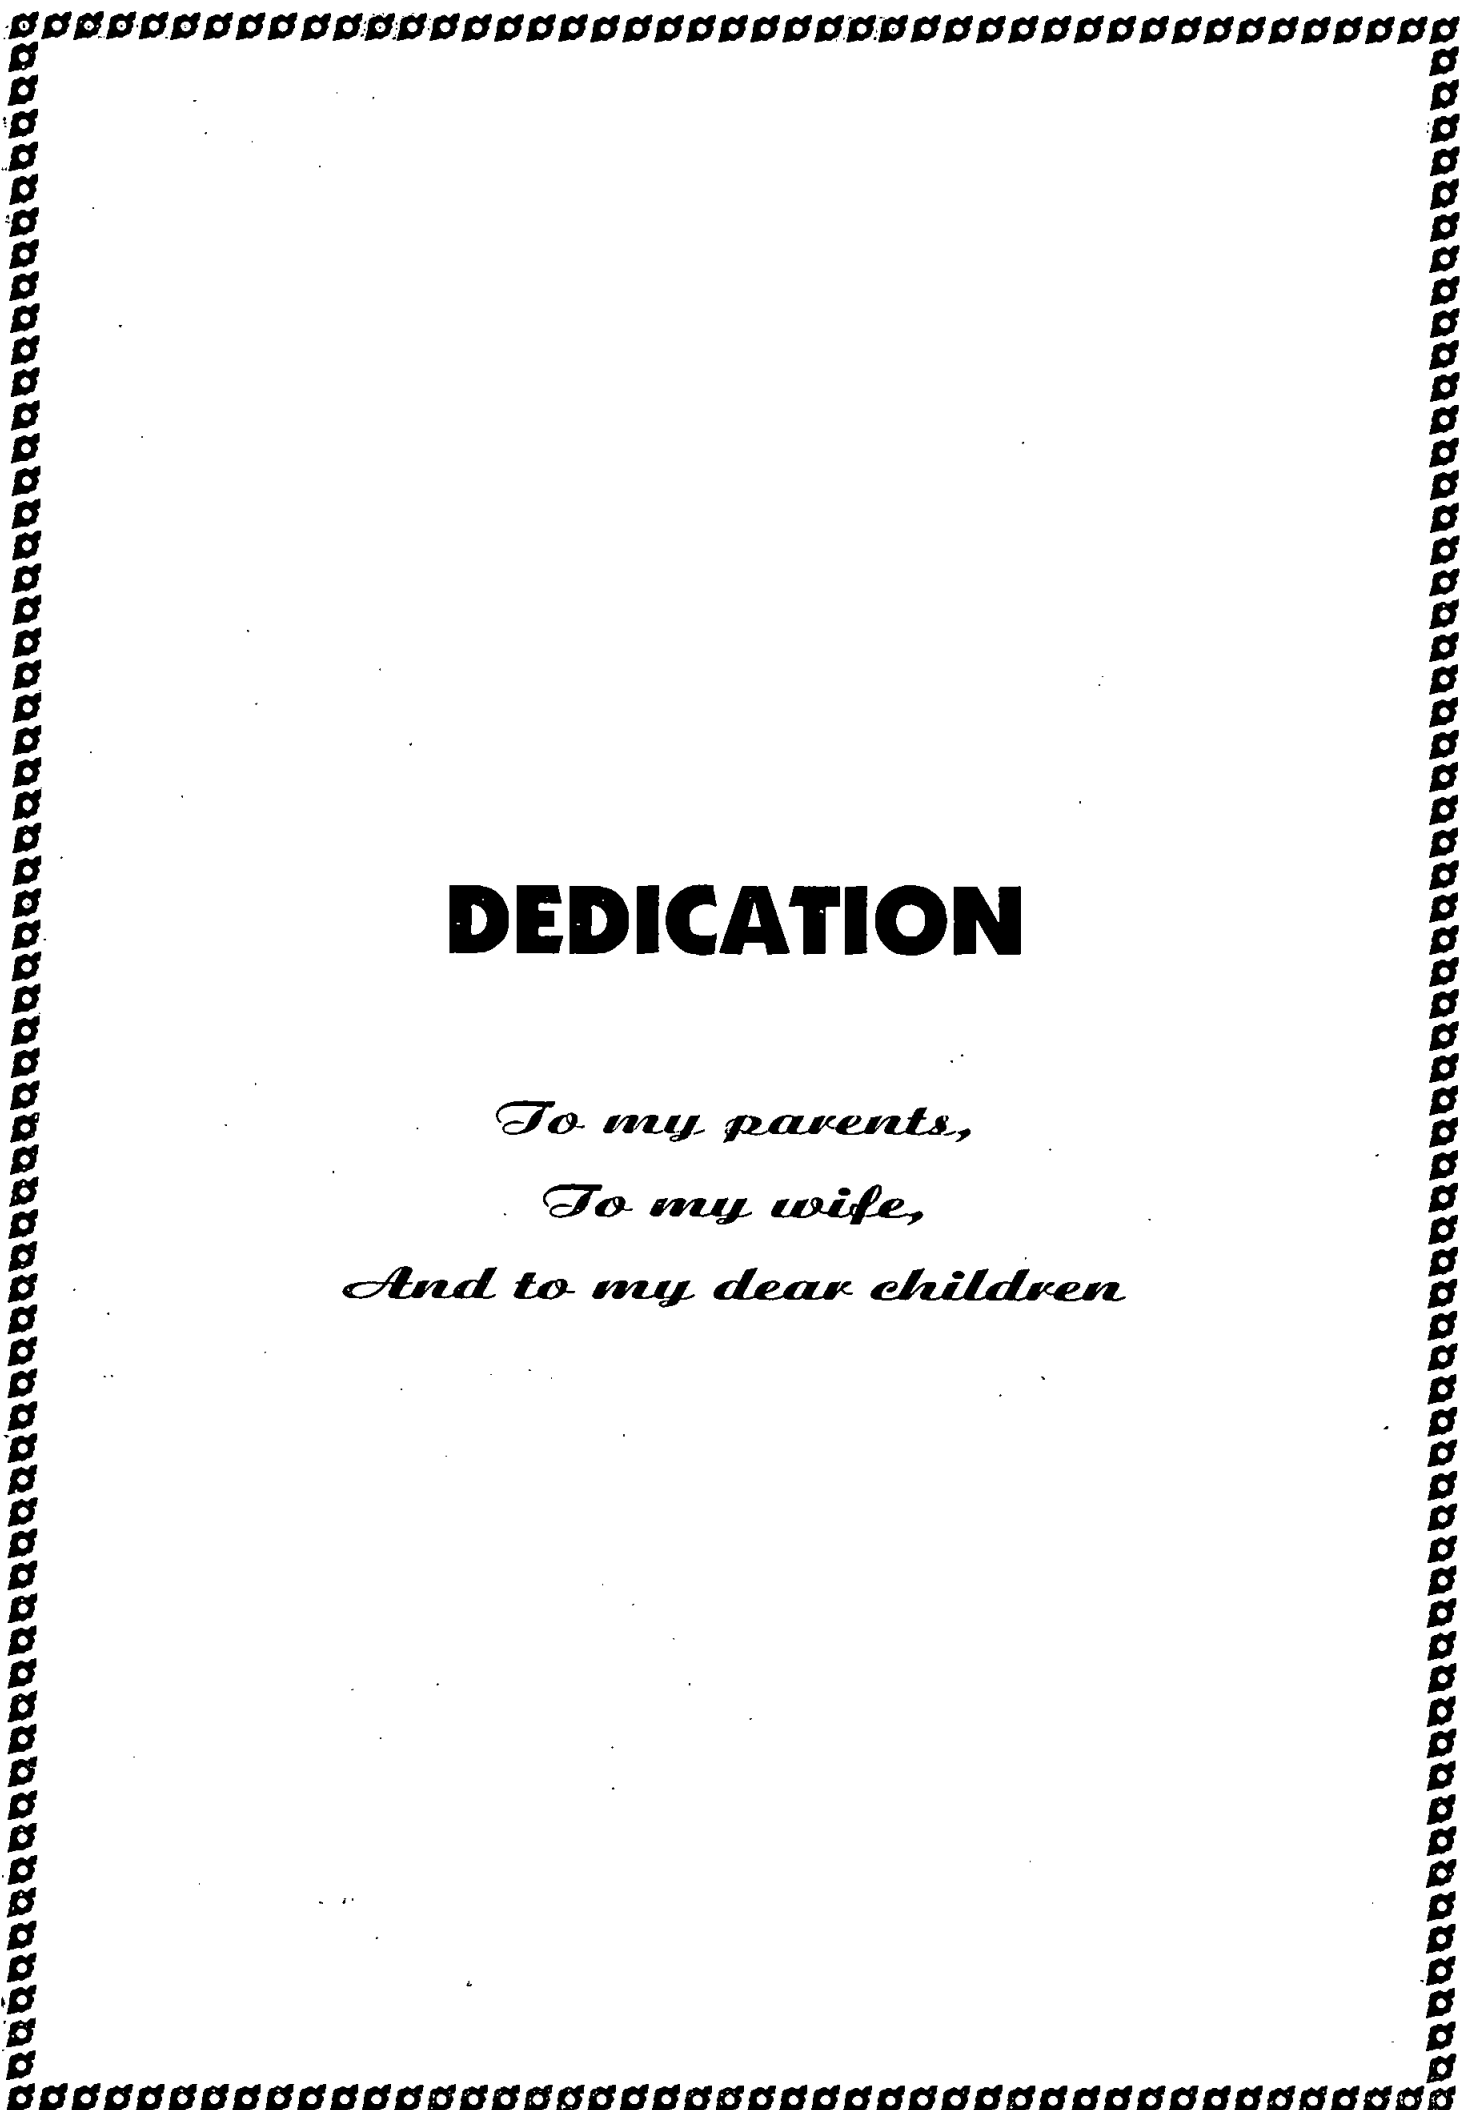

I would like to express my deep and profound gratitude and respect to my supervisor **Prof. Dr. Ahmed Fadel Ahmed Ashry** for this generous encouragement and support together with patience and guidance during the preparation of this work; he never declined from offering help, however, busy.

I am also deeply thankful to **Dr. Ragab Barakat** and **Eng. Khalid Hassan** for the support, help and valuable remarks during the editing of this work.

I wish to thank all the Egyptian people for their kindness and hospitality during my stay in Egypt. I also wish to thank all those that helped me in the preparation of this work.

Finally, I wish to thank and also send my love to my wife and dear children for their patience and moral support; without their patience and sacrifice this work would not have been possible to achieve.

Dawas

DEDICATION

*To my parents,
To my wife,
And to my dear children*

Table of contents

Chapter One: Introduction

	Page
1-1 General	1-1
1-2 Problem Definition	1-2
1-3 Scope of work	1-3
1-4 Overview of both systems under study	1-4

Chapter Two: Literature Review

2-1 Introduction	2-1
2-2 Wastewater alternative collection systems	2-1
2-2-1 Pressure sewer systems	2-2
2-2-2 Vacuum sewer systems	2-13
2-2-3 Shallow sewer systems	2-27
2-2-4 Small bore sewer systems	2-31
2-3 Wastewater treatment systems	
2-3-1 General	2-68
2-3-2 Wastewater flow rates	2-70
2-3-3 Characteristics of wastewater	2-70
2-3-4 The objectives of wastewater treatment	2-80
2-3-5 Classification of wastewater treatment methods	2-81
2-3-6 Application of wastewater treatment	2-91
2-3-7 Factors affecting the choice of treatment processes	2-92
2-3-8 Characteristics of Egyptian raw and sullage wastewater	2-95
2-3-9 Wastewater treatment alternatives	2-96
2-3-10 Scope and objectives of this research work	2-102

Chapter Three: Materials and Methods

	Page
3-1 Introduction	3-1
3-2 Nawag small bore sewer system	3-2
3-2-1 <i>Population estimates and design discharges</i>	3-2
3-2-2 <i>The small bore sewer network</i>	3-2
3-2-3 <i>Wastewater pumping station</i>	3-5
3-2-4 <i>Force main</i>	3-5
3-2-5 <i>Wastewater treatment plant</i>	3-5
3-3 Baramon conventional gravity sewer system	
3-3-1 <i>Gravity sewer network</i>	3-24
3-3-2 <i>Pumping station and force mains</i>	3-25
3-3-3 <i>Wastewater treatment plant</i>	3-27
3-4 Methods and equipment	3-38
3-4-1 <i>Estimation of pH</i>	3-38
3-4-2 <i>Estimation of COD</i>	3-39
3-4-3 <i>Estimation of BOD₅</i>	3-41
3-4-4 <i>Estimation of VSS & SS</i>	3-42

Chapter Four: Results and discussion

4-1 Introduction	4-1
4-2 Design criteria	4-2
4-2-1 <i>Population</i>	4-2
4-2-2 <i>Discharge</i>	4-3
4-2-3 <i>Criteria adopted in the design of each system</i>	4-4

4-3	Network analysis	4-22
4-3-1	<i>Discharge</i>	4-23
4-3-2	<i>Diameters</i>	4-23
4-3-3	<i>Slope and velocities</i>	4-24
4-3-4	<i>Excavation</i>	4-24
4-3-5	<i>Sewer appurtenance</i>	4-25
4-3-6	<i>Operation and maintenance requirements</i>	4-25
4-3-7	<i>Trouble shooters</i>	4-27
4-4	Pumping station analysis	4-27
4-4-1	<i>Baramon pumping station</i>	4-28
4-4-2	<i>Nawag pumping station</i>	4-31
4-5	Force main analysis	4-32
4-5-1	<i>Baramon force main</i>	4-32
4-5-2	<i>Nawag force main</i>	3-39
4-6	Wastewater treatment plants analysis	4-33
4-6-1	<i>Population and design discharges</i>	4-34
4-6-2	<i>Inlet, screens and grit removal</i>	4-35
4-6-3	<i>Aeration tanks</i>	4-35
4-6-4	<i>Final sedimentation tanks</i>	4-36
4-6-5	<i>Contact basin</i>	4-36
4-6-6	<i>Sludge thickeners</i>	4-37
4-6-7	<i>Drying beds</i>	4-37
4-6-8	<i>Sludge lifting station</i>	4-37
4-6-9	<i>Transformers and generators</i>	4-38
4-6-10	<i>Effluent wastewater analysis</i>	4-39
4-7	Conclusion	4-33

Chapter Five: Comparative cost analysis

	Page
5-1 Introduction	5-1
5-2 Cost estimation	5-2
5-2-1 <i>Land cost</i>	5-2
5-2-2 <i>Construction costs</i>	5-3
5-2-3 <i>Operation and maintenance costs</i>	5-7
5-3 Cost comparison	

Chapter Six: Environmental assessment and feedback

6-1 Introduction	6-1
6-2 Community	6-1
6-3 Sewage promotion	6-1
6-4 Community participation & management	6-2

Chapter Seven: Conclusions and recommendations

7-1 General	7-1
7-2 Conclusion	7-2
7-3 Recommendations and future work	7-4
