Role Of Diagnostic And Imaging Modalities In Assessment Of Bone Density

Essay

Submitted for the Partial fulfillment
of Master Degree of Radiodiagnosis

BY

Marwa Omar Fathy

MBBCH

Ain Shams University

Supervisor by

Prof. Dr. Heba Mohamed Khalil El Deeb

Professor of Radiodiagnosis

Faculty of medicine

Ain shams university

Dr. Sahar farook Shaaban

Lecturer of radiodiagnosis

Faculty of medicine

Role Of Diagnostic And Imaging Modalities In Assessment Of Bone Density

1. Introduction and aim of the work
2. Structure and biosynthesis of cartilage and bone
3. Pathogenesis
4. Radiological and imaging modalities with diagnostic value of each modality
5. Summary and conclusion
6. References
7. Arabic summary

ACKNOWLEDGEMENT

*First, thanks are all due to **God** for blessing this work until it has reached its end, as a part of his generous help throughout my life.*

*I would like to express my deepest gratitude to **Prof. Dr. Heba Mohammed Khalil EL-Deeb**, Professor of Diagnostic radiology, Faculty of Medicine, Ain Shams University, for her great support and continuous encouragement throughout this whole work. It is really a great honor to work under her guidance and supervision.*

*I am truly grateful to **Dr. Sahar Farouk Shaaban**, Lecturer of Diagnostic radiology, Faculty of Medicine, Ain Shams University, for her close supervision, sincere help, valuable suggestions and continuous encouragement throughout the whole work.*

Marwa O. Fathy

List of Contents

	PAGE
<i>Chapter (1): Introduction.</i>	6
<i>Chapter (2): Structure and biosynthesis of cartilage and bone.</i>	9
<i>Chapter (3): Pathogenesis of osteoporosis.</i>	24
<i>Chapter (4): Value of radiological and imaging modalities in osteoporosis.</i>	48
<i>Summary</i>	90
<i>References</i>	96
<i>Arabic summary</i>	108

List of Tables

<i>No.</i>	<i>Table</i>	<i>Page</i>
<i>Table (1):</i>	Comparison of Techniques for Measuring Bone Mineral Content	<i>54</i>
<i>Table (2):</i>	Comparison of DR-XRA and DPA precision Tests Using a Bone Equivalent spine phantom.	<i>84</i>

List of Figures

No.	Figure	Page
Figure (1):	<i>LS of growing end of bone</i>	13
Figure (2):	<i>TS of long bone showing the composition of compact bone</i>	16
Figure (3):	<i>a: Rib TS showing the structure of cancellous bone</i>	18
	<i>b: Structural units in human cancellous bone (right) and cortical bone</i>	
Figure (4):	<i>Types of bone cells</i>	21
Figure (5):	<i>Pathogenesis of osteoporotic fractures</i>	23
Figure (6):	<i>6-a.: Section of a vertebral body from a normal individual showing the pattern of trabeculae</i>	28
	<i>6-b.:Section of a vertebral body from an osteoporotic patient showing thinning and loss of trabecular pattern</i>	29
	<i>6-c.:Scanning electron micrograph of trabecular plate that has been perforated by osteoclastic erosions</i>	30
Figure (7):	<i>7-a.:Lateral radiograph of normal appearance of dorsolumbar vertebrae</i>	32
	<i>7-b.:Lateral radiograph of osteoporotic patient</i>	33
Figure (8):	<i>Osteoporosis: Resorption of trabeculae</i>	34
Figure (9):	<i>a:Lateral radiograph showing Colle's fracture</i>	36
	<i>b:A-Pview of the distal forearm showing Colle's fracture in an osteoporotic patient</i>	37
Figure (10):	<i>Radiogrametry measures metacarpal cortical thickness and fails to account for cortical porosity.</i>	52
Figure (11):	<i>a: Photograph of a patient undergoing DPA of the lumbar spine</i>	58
	<i>b:Representative image from DPA of the proximal</i>	59
