ACKNOWLEDGEMENT

I am deeply grateful to **Prof. ALI AHMED IBRAHIM**, for suggesting the thesis subject and supervising it. Without his continuous guidance, patience and encouragement, this thesis would not have surfaced.

I would like to express my thanks to **Prof. MOHAMMED AWAD TAHER**, for his great contribution. His ideas and advices were of tremendous impact and continuous support.

My sincere appreciation and thanks to **Dr. MOHAMMED AYMAN SALEH**, for his kind supervision, and valuable comments during all the stages of this thesis.

Words can never express my heartily thanks and indebtedness to **Dr. EGLAL ABDEL AZIZ GHOBASHY**, whose esteemed help, expert guidance, and beneficial discussions allowed the work to take its real form.

I also acknowledge my professors and colleagues at **Ain Shams University** and at the **National Heart Institute** for their esteemed help and continuous support.

CONTENTS

Introduction	1
Aim of the Work	2
Review of Literature:	
- Historical background	3
- Factors influencing long-term outcome after surgery	8
- Factors improving graft patency	14
- Benefits of coronary artery bypass graft surgery	18
- Comparison of medical therapy versus bypass surgery	20
- Comparison of percutaneous revascularization versus bypass surgery	30
- Coronary artery surgery in the stenting era	35
- Long-term management after CABG surgery	38
- Role of exercise testing in patients after revascularization	43
- Noninvasive evaluation of L.V. performance	47
