**Influence of topical fluoride application on the color
stability, roughness, and fracture resistance of Adoro
composite material**

Master Thesis submitted to the
Faculty of Oral and Dental Medicine
Cairo University

٢٠٨٩٠

In partial fulfillment of the Requirements for the master
Degree in Fixed Prosthodontics

By

د. كرامت رمضان عبد الرحمن

SUPERVISORS

Prof. Dr. Ashraf Omar Elkarakesy

Professor of Fixed Prosthodontics

Faculty of Oral and Dental Medicine

Cairo University

Dr. Iman Salah El-Din Hamdy

Assistant Professor of Fixed Prosthodontics

Faculty of Oral and Dental Medicine

Cairo University

Dedication

**This work is dedicated mainly to my beloved mother, soul
of my father, my darling husband, my sweat heart sons,
my dear brothers, and sisters for their endless love, care
and support.**

ACKNOWLEDGMENT

Acknowledgement

My deepest appreciation, thanks, and love goes to *Prof. Dr. Ashraf Elkarakesy* professor of fixed prothodontic, Faculty of Oral and Dental Medicine, Cairo University, for his kind guidance, extra-ordinary supervision, and unlimited support and help.

I would like to thank *Dr. Iman salah Eld-din* Assistant Professor of fixed prothodontic, Faculty of Oral and Dental Medicine, Cairo University, for her thoughtful constructive, co-supervision, helpful remarks, and sincere cooperation.

I would like to extend my appreciation, gratitude, and thanks to *Prof. Dr. Ihab Mosleh*. Head of Department of fixed prothodontic, Faculty of Oral and Dental Medicine, Cairo University, for his endless support, and valuable kind cooperation.

My thanks go to also to all members who friendly support and help me in this work.

Karamat Ramadan

2010

List of Contents

Introduction (chapter 1)	1
Review of literature (chapter 2)	4
Topical fluoride application	9
Types of fluorides	10
Mechanism of action of topical fluoride	11
The effect of topical fluoride application on different restorative materials	11
The effect of topical fluoride on composite resin surfaces	13
Effect of beverage solution on enamel and dentine	17
Effect of beverage solution on stainability of different restorative materials	19
Effect of beverage solution on surface roughness of different restorative materials	22
Effect of beverage solutions on fracture resistance of different restorative materials	24
Statement of the problem	28
Aim of study	29
Materials and method (chapter 3).....	30

Results (chapter4)	54
Discussion (chapter 5)	71
Summary (chapter 6)	87
Conclusion (chapter 7)	92
Recommendation (chapter 8)	93
Reference	94
Arabic summary (chapter 9)	

List of Tables

Table (1)	factorial design of the different test groups	39
Table (2)	statistical analysis of the effect of fluoride application on color change (ΔE) values of SR-Adoro samples immersed in different beverage solutions (student's t-test)	55
Table (3)	statistical analysis of the effect of beverage solutions on color change (ΔE) values of SR-Adoro samples with and without fluoride application (ANOVA and Tukey's test)	57
Table (4)	The means of color changes (ΔE) values, standard deviation (SD) values, results of ANOVA and Tukey's tests for comparison between all the groups showing color changes of SR-Adoro samples	58
Table (5)	statistical analysis of the effect of fluoride application on surface roughness values of SR-Adoro samples immersed in different beverage solution (Student's t-test)	60
Table (6)	statistical analysis of the effect of different beverage solutions on surface roughness values of SR-Adoro samples of the two tested groups (ANOVA and Tukey's test)	61
Table (7)	The means of surface roughness (Ra), standard deviation (SD) values, results of ANOVA and Tukey's tests for comparison between all the groups (After staining).	63
Table (8)	statistical analysis of the effect of fluoride application on biaxial flexural strength of SR-Adoro with different beverage solutions (Student's t-test).	65
Table (9)	statistical analysis of effect of beverage solutions on biaxial flexural strength (MPa) of SR-Adoro samples with and without fluoride application. (ANOVA and Tukey's test)	67
Table (10)	The means of biaxial flexural strength, and standard deviation values (MPa), of all groups.	68
