**FORMULATION AND EVALUATION OF
NADOLOL AS ANTIGLAUCOMA DRUG FOR
TOPICAL APPLICATION**

A THESIS

Presented By

Amal El-Sayeh Fadle Abou El-Ela

B. Pharm. Sci. (1991)

Submitted for the Partial Fulfillment for the degree of
Master in pharmaceutical sciences
(Pharmaceutics)

Under the Supervision of

Prof.Dr. *Fawzia S. Habib*

Prof. of Pharmaceutics

Faculty of Pharmacy, Assiut University

Prof.Dr. *Ahmed M. El-Sayed*

Prof. of Pharmaceutics

Faculty of Pharmacy,

Assiut University

Dr. *Ehab A. Fouad*

Lecturer of Pharmaceutics

Faculty of Pharmacy,

Assiut University

Department of Pharmaceutics

Faculty of Pharmacy

Assiut University

1998

"علم الإنسان بما لم يعلم"

صدق الله العظيم

To My Parents

My Husband

*My Sons Omar
and Mohamed*

APPROVAL SHEET

Date: / /1998

ACKNOWLEDGEMENT

ACKNOWLEDGEMENT

"In the name of *ALLAH*, most gracious, most merciful"

The language with all its abundant, plentiful words is helpless to provide me with the right words that may express my feelings to all those who have encouraged and helped me to finish this work.

I would like to express my deep gratitude and cordial thanks to my **Prof.Dr. Fawzia S. Habib**, Professor of Pharmaceutics, Faculty of Pharmacy, Assiut University, for suggestion of the subject, valuable supervision, fruitful guidance, constant advice, moral support and helpful criticisms throughout this work.

I wish to express my thanks to **Prof.Dr. Ahmed M. El-Sayed**, Professor of Pharmaceutics, Faculty of Pharmacy, Assiut University, for his kind supervision during his presence in the Dept. until his travel.

I am sincerely grateful to **Dr. Ehab A. Fouad**, Lecturer of Pharmaceutics, Faculty of Pharmacy, Assiut University, for his valuable supervision, continuous guidance, unlimited cooperation and his great encouragement in this work.

I would like to thank **Dr. Kawther Mohamed**, Lecturer of Histology, Faculty of Medicine, Assiut University, for her help during the histopathological study.

I would like to extend my heart-felt thanks to my family especially my husband for his endless help and cordial encouragement, also my sons Omar and Mohamed.

Finally, I would like to extend my thanks to who gave me their support and advice during this research.

CONTENTS

	Page
Abstract	i
Introduction.....	1
Scope of work.....	40
Part I: Phase diagram construction, formulation and physico-chemical evaluation of microemulsion	43
1. Experimental.....	43
1.1. Materials.....	43
1.2. Apparatus.....	44
1.3. Microemulsion preparation	45
1.3.1. Determination of phase diagram and rules relating to triangular diagrams.....	45
1.3.2. Methods for construction of pseudo-ternary phase diagrams	53
1.3.2.1. The phase diagrams of the microemulsion composed of polysorbate 80 either glycerin, ethylene glycol or propylene glycol, isopropyl myristate or liquid paraffin and water	53
1.3.2.1.1. Results and discussion.....	65
1.3.2.1.2. Influence of the cosurfactant and surfactant : cosurfactant mass ratio (K_m).....	65
1.3.2.1.3. Influence of the oil	68
1.3.2.2. The phase diagrams of the microemulsion composed of polysorbate 80, sorbitol, , isopropyl myristate and water	69
1.3.2.2.1. Results and discussion.....	71
1.3.2.3. The phase diagrams of the microemulsion composed of soya lecithin, propylene glycol, either sesame oil, isopropyl myristate or liquid paraffin and water.....	72
1.3.2.3.1. Results and discussion.....	77

	Page
1.3.3. Methodology.....	78
1.3.3.1. Preparation of microemulsion.....	78
1.4. Evaluation of physicochemical properties of microemulsions	81
1.4.1. Particle size analysis of microemulsion systems.....	86
1.4.2. Drug content	87
1.4.2.1. Construction of calibration curve.....	87
1.4.2.2. Drug analysis	87
1.4.3. Refractive index and conductivity measurements.....	88
1.4.4. pH measurements	89
1.4.5. Partition coefficient determination of nadolol	89
1.4.6. Rheological properties of microemulsion preparations.....	90
1.4.7. Results and discussion.....	91
1.4.7.1. Particle size analysis	91
1.4.7.1.1. Microscopical examination of microemulsions	93
1.4.7.2. Drug content	110
1.4.7.3. Refractive index and conductivity.....	112
1.4.7.4. pH values.....	114
1.4.7.5. Partition coefficient.....	115
1.4.7.6. Rheological properties.....	115
1.5. Stability assessment of microemulsions	118
1.5.1. Long-term stability tests	118
1.5.2. Accelerated stability tests.....	119
1.5.3. Methods.....	119
1.5.3.1. Long-term studies.....	119
1.5.3.2. Accelerated stability tests.....	120
1.5.3.2.1. Centrifugal stress	120
1.5.3.2.2. Freeze-thaw cycles.....	120
1.5.4. Results and discussion.....	120

	Page
Part II: Determination of the <i>in-vitro</i> release of nadolol from different ophthalmic microemulsions	122
2. Determination of the <i>in-vitro</i> release of nadolol from different ophthalmic microemulsions	122
2.1. Results and discussion.....	122
2.1.1. Kinetics of <i>in-vitro</i> release of nadolol from different microemulsion systems.....	122
2.2. Partition coefficient and phase structure ratio	123
2.3. Effect of surfactant : cosurfactant mass ratio (K_m) on nadolol release from microemulsions	129
2.3.1. Effect of surfactant : cosurfactant mass ratio on the release of nadolol from o/w microemulsions based on polysorbate 80, sorbitol and isopropyl myristate	129
2.3.2. Effect of (K_m) on the release of nadolol from o/w microemulsions based on polysorbate 80, propylene glycol and isopropyl myristate	131
2.3.3. Effect of (K_m) on the <i>in-vitro</i> release of nadolol from o/w microemulsions based on polysorbate 80, glycerin and isopropyl myristate	134
2.3.4. Effect of (K_m) on the <i>in-vitro</i> release of nadolol from o/w microemulsions based on polysorbate 80, glycerin and liquid paraffin	136
2.3.5. Effect of (K_m) on the <i>in-vitro</i> release of nadolol from w/o microemulsions based on soya lecithin, propylene glycol and sesame oil	138
2.4. Effect of oil type on the <i>in-vitro</i> release of nadolol from w/o microemulsions based on soya lecithin and propylene glycol	140

	Page
2.5. Effect of surfactant and microemulsion type on the <i>in-vitro</i> release of nadolol from microemulsions based on isopropyl myristate and propylene glycol.....	142
2.6. Effect of cosurfactant type on the <i>in-vitro</i> release of nadolol from o/w microemulsions based on polysorbate 80 and isopropyl myristate.....	145
2.7. Mechanism of drug release.....	147
Part III: <i>In-vivo</i> performance of ophthalmic microemulsions of 1% (w/w) nadolol in the rabbit's eye.....	158
3. <i>In-vivo</i> performance of ophthalmic microemulsions of 1% (w/w) nadolol in the rabbit's eye.....	158
3.1. Investigation of the <i>in-vivo</i> performance of ophthalmic preparations of 1% (w/w) nadolol in the healthy eye of rabbits.....	158
3.2. Statistical analysis of the <i>in-vivo</i> data.....	159
3.3. Results and discussion.....	161
3.3.1. Effect of vehicle type on the parameters of activity of 1% (w/w) nadolol in the rabbit's eye.....	161
3.3.2. Effect of surfactant : cosurfactant mass ratio (K_m) on the parameters of activity of 1% (w/w) nadolol in o/w microemulsions in the rabbit's eye	167
3.3.3. Effect of surfactant : cosurfactant mass ratio (K_m) on the IOP of rabbit's eye post-instillation of 1% (w/w) nadolol in w/o microemulsions based on soya lecithin, propylene glycol and sesame oil	175
3.3.4. Effect of oil type on the IOP of rabbit's eye post-installation of 1% (w/w) nadolol in w/o microemulsions based on soya lecithin and propylene glycol.....	181
