**IMAGE RECOGNITION USING MORPHOLOGICAL
OPERATIONS**

BY

Ahmed Mahmoud Hammad

**A thesis Submitted to the
Faculty of Computers & Information
Cairo University**

**In partial Fulfillment of the
Requirements for the Degree of
Master of Science.**

**In
Information Technology**

Under the Supervision of

Prof. Dr. Sanaa El-ola Hanafi Ahmed
The chief of the Information Technology Department
Faculty of Computers and Information
Cairo University

Prof. Dr. Mohiey Mohamed Hadhoud
Vice Dean of The Faculty of Computers and Information
Menoufia University

Dr. Khaled Mustafa Elsayed
Assistant Professor in the Department of Information Technology
Faculty of Computers And Information
Cairo University

**FACULTY OF COMPUTERS & INFORMATION
CAIRO UNIVERISTY**

EGYPT

June \ 2005

B
1-002

Statement

I certify that this work has not been accepted in substance for any Academic degree and is not being concurrently submitted in candidature For any other degree. Any portions of this thesis for which I am indebted to other sources are mentioned and explicit references are given.

Student Name : Ahmed Mahmoud Hammad

Signature :

A handwritten signature in black ink, appearing to be 'AHMED MAHMOUD HAMMAD', written in a cursive style.

IMAGE RECOGNITION USING MORPHOLOGICAL OPERATIONS

BY
Ahmed Mahmoud Hammad

A thesis Submitted to the
Faculty of Computers & Information
Cairo University
In partial Fulfillment of the
Requirements for the Degree of
Master of Science.
In
Information Technology

Approved by the

Examining Committee

Prof. Dr. Gamal El-din Mohamed Ali

Prof. Dr. Sanaa El-ola Hanafi Ahmed

Prof. Dr. Mohiey Mohamed Hadhoud

TABLE OF CONTENTS

	Page
List of Tables -----	vii
List of Figures -----	ix
Acknowledgement -----	xiv
Abstract -----	xv
Chapter 1 Introduction	1
1.1 Motivation -----	2
1.2 Scope Of The Work -----	3
1.1 Methodology -----	4
1.1 Outline Of The Thesis -----	5
Chapter 2 Mathematical Morphology Overview	6
2.1 Introduction -----	7
2.2 Binary Mathematical Morphology -----	8
2.2.1 Binary Dilation -----	8
2.2.2 Binary Erosion-----	11
2.2.3 Binary Opening -----	13
2.2.4 Binary Closing-----	14
2.2.5 Hit And Miss Transform -----	15
2.3 Some Basic Morphological Algorithm -----	18
2.3.1 Boundary Extraction -----	18
2.3.2 Noise Removal -----	19
2.3.3 Thickening -----	19
2.3.4 Thinning -----	21
2.4 Gray Scale Morphology -----	22
2.4.1 Gray Scale Dilation -----	23
2.4.2 Gray Scale Erosion -----	24

2.4.3 Gray Scale Opening -----	26
2.4.4 Gray Scale Closing -----	26
2.5 Basic Morphological Operations Properties -----	28
Chapter 3 Shape Representation Overview	29
3.1 Introduction -----	30
3.2 Boundary Space Domain Techniques -----	31
3.2.1 Chain Codes -----	31
3.2.2 Syntactic techniques -----	33
3.2.3 Boundary Approximation -----	34
3.2.4 Boundary Decomposition -----	36
3.3 Boundary Scalar Transform Techniques -----	37
3.3.1 Some Simple Descriptor -----	37
3.3.2 From 2-D shape to 1-D Representation -----	38
3.3.3 Fourier Descriptor -----	39
3.3.4 Stochastic Methods -----	41
3.4 Global Scalar Transform Techniques -----	42
3.4.1 Some Simple Descriptors -----	42
3.4.2 Topological Descriptors -----	42
3.4.3 Moments -----	45
3.4.4 Morphological Methods -----	46
3.5 Global Space Domain Techniques -----	48
3.5.1 Medial Axis Transform -----	48
3.5.2 Shape Decomposition -----	51
Chapter 4 Shape Representation Based Morphological Operations	52
4.1 Introduction -----	53

4.2 Morphological Signature Transform -----	55
4.2.1 Binary MST -----	55
4.2.2 Gray Scale MST -----	57
4.3 Granulometry -----	58
4.4 Shape Descriptor Method -----	60
4.5 Shape Descriptor Algorithm -----	63
4.6 Shape Descriptor Algorithm Implementation Issues -----	66
4.7 Shape Matching -----	67
4.8 Experiments and Results -----	68

Chapter 5 Application of Morphological shape Descriptor to Face

Recognition	89
5.1 Introduction -----	90
5.2 An Overview of Face Recognition Techniques -----	92
5.2.1 Frontal Recognition -----	92
5.2.2 Profile Recognition -----	95
5.2.3 View-Tolerant Recognition -----	97
5.2.3.1 Shape -----	97
5.2.3.2 Hidden Markov Model -----	98
5.2.3.3 Deformable Methods -----	100
5.3 Application of Morphological Shape Descriptor to face database	101

Chapter 6 Conclusions and Future Work **114**

6.1 Conclusions -----	115
6.2 Future Work -----	116

References ----- **118**

Appendix A ----- **124**

LIST OF TABLES

	PAGE
Table 4.1 A comparison result of shifting columns experiments -----	73
Table 4.2 The results comparison of rotation experiment by 90° -----	75
Table 4.3 The results comparison of filtering experiment by median filter -----	77
Table 4.4 The results comparison of noise experiment -----	79
Table 4.5 The results comparison of scaling experiment -----	81
Table 4.6 Comparison between MSTD, MSE, and DMSE of Circbw image ----	84
Table 4.7 Comparison between MSTD, MSE, and DMSE of Butterfly image --	84
Table 4.8 Comparison MSTD, MSE, and DMSE of binary version of camerman image -----	84
Table 4.9 Comparison between MSTD, MSE, and DMSE of Binary version of Lena image -----	85
Table 4.10 Comparison between MSTD, MSE, and DMSE of Circles image ----	85
Table 4-11 Comparison between MSTD, MSE, and DMSE of Circlesm image --	85
Table 4.12 The morphological signature transform distance measure between the images -----	86
Table 4.13 The mean square error between the images -----	86
Table 4.14 The derived mean square error between the images -----	86

Table 4.15	Comparison between MSTD, MSE, and DMSE of Cameraman image	87
Table 4.16	Comparison between MSTD, MSE, and DMSE of Pout image	87
Table 4.17	Comparison between MSTD, MSE, and DMSE of Lena image	87
Table 4.18	Comparison between MSTD, MSE, and DMSE of Woman image	88
Table 4.19	The morphological signature transform distance measure between the images	88
Table 4.20	The mean square error measure between the foregoing images	88
Table 4.21	The derived mean square error between the foregoing images	88
Table 5.1	The full result of applying the proposed matching technique on all faces of IITK database	111

LIST OF FIGURES

	PAGE
Figure 2.1 Dilation by a structuring element that does not include the origin. -----	9
Figure 2.2 3X3 square structuring element. -----	9
Figure 2.3 Effect of dilation using a 3×3 square structuring element. -----	10
Figure 2.4 Applications of dilation is for bridging gaps. -----	11
Figure 2.5 Binary erosion using a simple structuring elemen. -----	12
Figure 2.6 Effect of erosion using a 3×3 square structuring element -----	13
Figure 2.7 The use of opening -----	13
Figure 2.8 Effect of opening using a 3×3 square structuring element -----	14
Figure 2.9 The result of closing Figure 2.7d using the simple structuring element -----	15
Figure 2.10 Effect of closing using a 3×3 square structuring element -----	15
Figure 2.11 Example of the extended type of structuring element used in hit- and-miss operations. -----	16
Figure 2.12 Four structuring elements used for corner finding in binary images using the hit-and-miss transform. -----	17
Figure 2.13 Effect of the hit-and-miss based right angle convex corner detector on a simple binary image -----	17
Figure 2.14 The use of morphology in boundary extraction. -----	18

Figure 2.15	The effect of the morphological operations in noise removal -----	19
Figure 2.16	Thinning using morphological operations example -----	21
Figure 2.17	The effect of thinning algorithm using morphological operations. ----	22
Figure 2.18	Example of gray scale dilation -----	24
Figure 2.19	Example of gray scale erosion -----	26
Figure 2.20	A gray scale morphological operations on 512 x 512 image. -----	27
Figure 3.1	The direction numbers for a 4-directional and 8-directional chain code. -----	32
Figure 3.2	The generalized chain code -----	32
Figure 3.3	Object boundary enclosed by cells -----	35
Figure 3.4	Minimum perimeter polygon. -----	35
Figure 3.5	Transformation of a shape to tangent space -----	39
Figure 3.6	A region with two holes -----	43
Figure 3.7	A region with three connected components. -----	43
Figure 3.8	Region with Euler number equal to 0 and -1, respectively. -----	44
Figure 3.9	A region containing a polygonal network. -----	44
Figure 4.1	Size distribution example -----	60
Figure 4.2	The flowchart of the shape description technique -----	66
