# RECENT ADVANCES IN THE DIAGNOSIS AND TREATMENT OF ERECTILE DYSFUNCTION

An Essay

Submitted for Partial Fulfillment of Master Degree  
In General Surgery

68841

Presented By

**Mohamed Ahmed Mahmoud Amer**

Supervised By

**Prof. Dr. Sayed Mohamed Rashad**

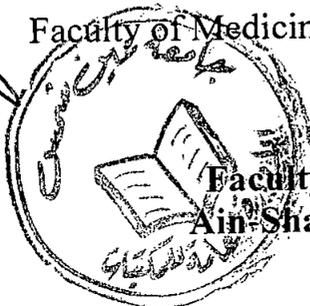

617.463 Professor of General Surgery,  
M. A Faculty of Medicine, Ain-Shams University

**Dr. Ayman Abd-Allah Abd-Rabu**

Assistant Professor of General Surgery,  
Faculty of Medicine, Ain-Shams University

**Dr. Ahmed Mohamed Ibrahim**

Lecturer of General Surgery,  
Faculty of Medicine, Ain-Shams University.

Faculty of Medicine  
Ain-Shams University  
2002

## *Acknowledgement*

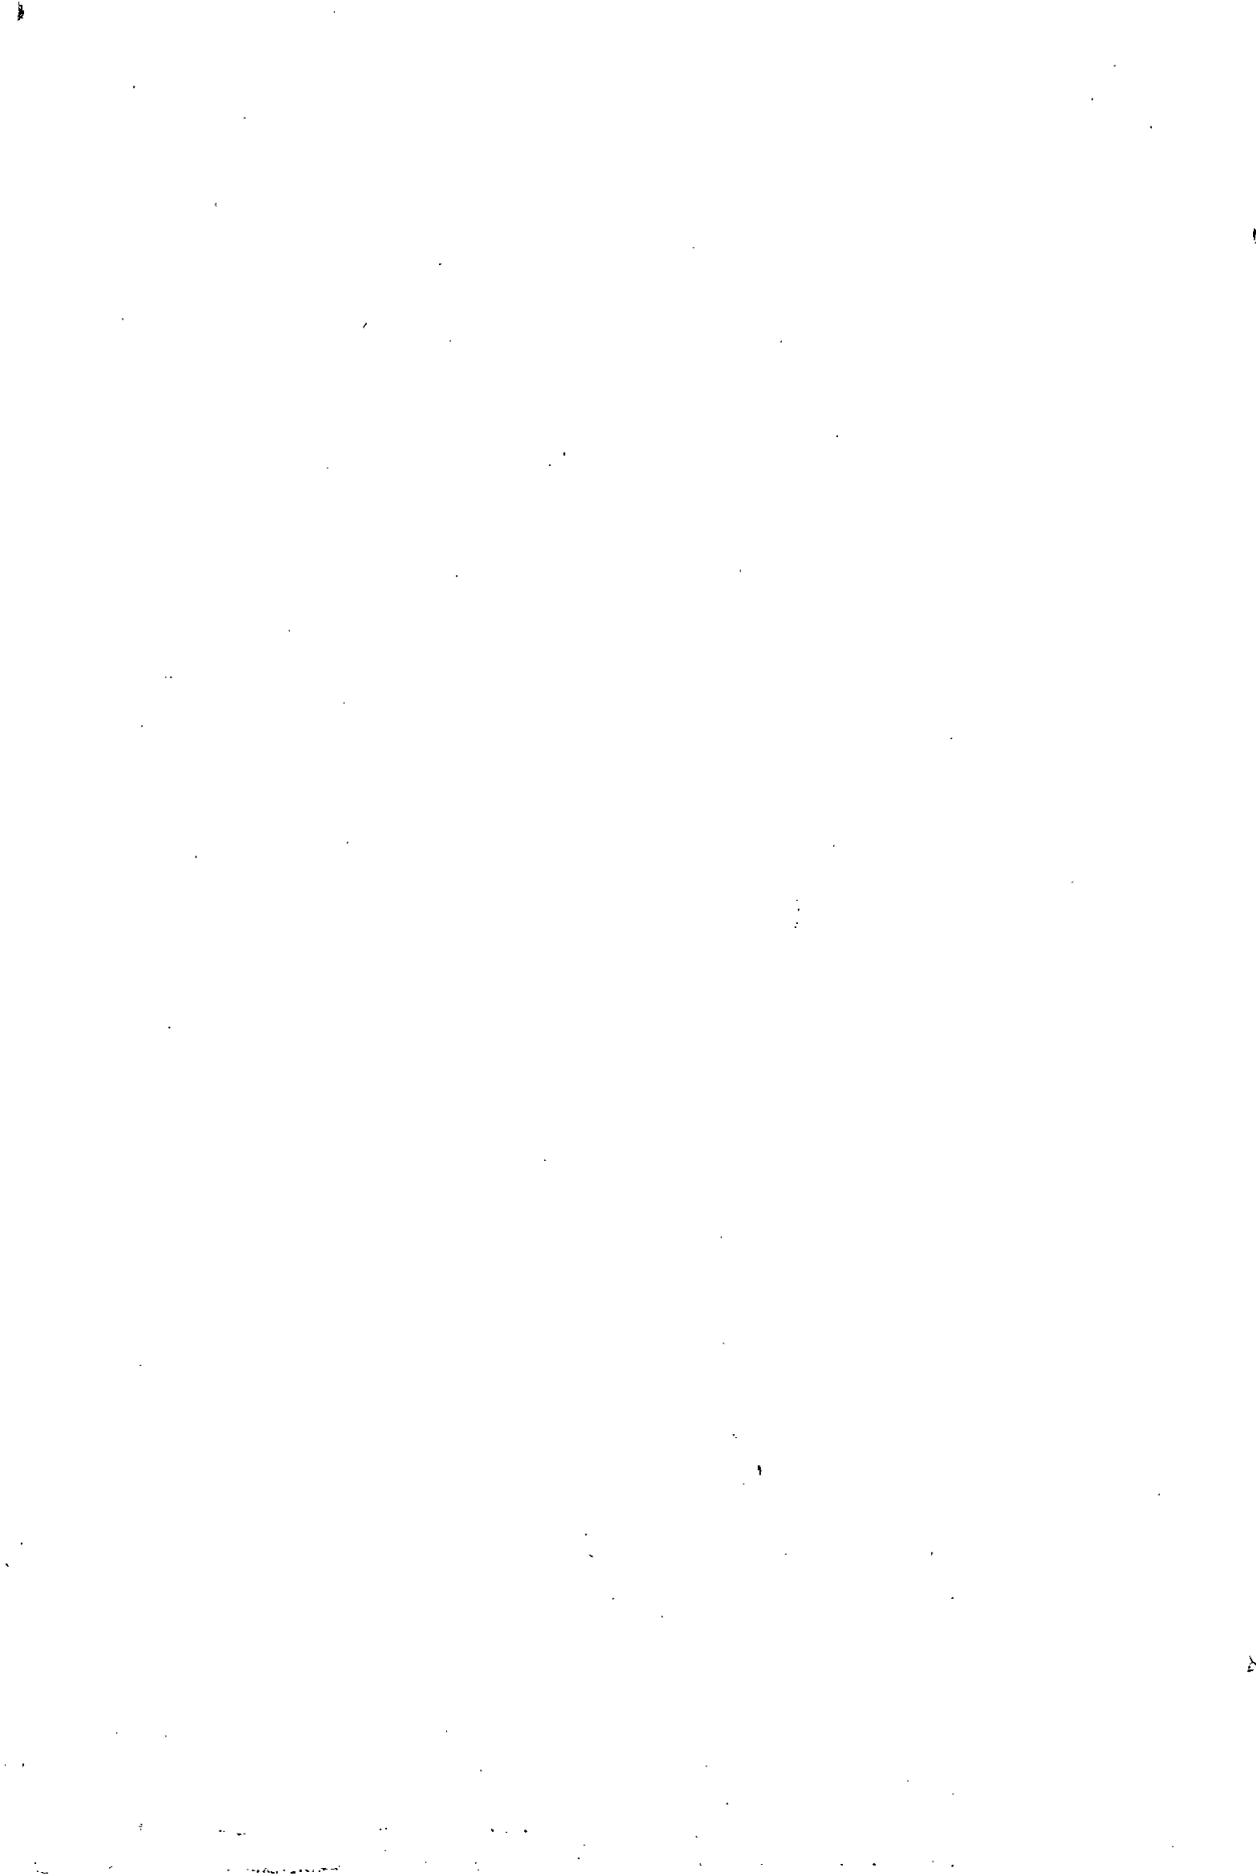

I would like to express my profound and sincere appreciation to Prof. Dr. Sayed Mohamed Rashad, Professor of General Surgery, Faculty of Medicine, Ain-Shams University, for his great effort and continuous encouragement and support that made this work possible.

I would like to express my sincere appreciation to Dr. Ayman Abd-Allah Abd-Rabu, Assistant Professor of General Surgery, Faculty of Medicine, Ain-Shams University, who offered much of his time and effort to accomplish this work.

I would like also to express my sincere appreciation to Dr. Ahmed Mohamed Ibrahim, Lecturer of General Surgery, Faculty of Medicine, Ain-Shams University, for his hearted support.

Finally, I would like to thank all the staff members of the department of general surgery and my family for their support during the accomplishment of this work

*Mohamed Ahmed Mahmoud Amer*

# CONTENTS

	Page
• Introduction and Aim of the Work .....	1
• Functional Anatomy of the Penis .....	3
• Physiology of Penile Erection .....	25
• Pathology of Erectile Dysfunction .....	52
• Diagnosis of Erectile Dysfunction .....	132
• Non-Surgical Treatment of Erectile Dysfunction ....	220
• Surgical Treatment of Erectile Dysfunction .....	326
• Summary and Conclusion' .....	457
• References .....	468
• Arabic Summary.	

# LIST OF TABLES

Table No.		Page
5-1	Diagnostic tests for chosen treatment options .	134
5-2	Differentiation between psychogenic and organic erectile dysfunction .....	140
5-3	Contemporary polysomnographic recording montage .....	149
6-1	Androgen preparations .....	235
6-2	Sildenafil adverse events experienced in worldwide flexible dose studies .....	261
6-3	Sildenafil adverse events experienced in American fixed dose study .....	261

## LIST OF FIGURES

Fig. No.		Page
2-1	Gross anatomy of the penis .....	4
2-2	Arterial blood supply to the penis .....	13
2-3	Arterial supply and venous drainage of the penis (Longitudinal view) .....	15
2-4	Arterial supply and venous drainage of the penis (Transverse view) .....	16
2-5	Schematic representation of the innervation of the penis .....	20
3-1	The interaction among cholinergic, adrenergic, and non adrenergic non cholinergic (NANC) influences and their contribution to penile smooth muscle contraction and relaxation .....	38
3-2a	A group of cavernosal smooth muscle cells connected by a network of small gap junctions	49
3-2b	Schematic depiction of the architecture of a gap junction channel .....	49
4-1	Prevalence of minimal, moderate, complete and overall impotence in the MMAS sample .....	55
4-2	The age trend of impotence in the MMAS sample .....	55
4-3	Biomechanical model showing the mechanism of blunt (compressive) trauma to the erect penis	83
4-4	Hypothalamic-pituitary-gonadal axis .....	95
4-5	Classification of hypogonadism .....	98

## LIST OF FIGURES (Cont.)

Fig. No.		Page
5-1	Patient's goal-directed approach for erectile dysfunction .....	133
5-2	The Rigiscan device has been designed to measure penile rigidity during home nocturnal monitoring .....	151
5-3	Innervation of the glans of the penis .....	162
5-4	Electromyography of the corpus cavernosum in four men performed by different examiners shows the similarity of electrical activity recording .....	169
5-5	Longitudinal Doppler ultrasound study of the left cavernosal artery 20 min post-injection of a vasodilating agent .....	185
5-6	Four simultaneous variables obtained during the third phase of dynamic infusion cavernosometry and cavernosography .....	194
5-7	Pudendal angiography .....	197
5-8	Arteriographic patterns and the associated types of bypass procedures .....	198
5-9	Pump cavernosometry .....	207
5-10	Gravity cavernosometry .....	210
5-11	In patients with corporal veno-occlusive dysfunction, various patterns of drainage have been noted .....	212
5-12	Abnormal cavernosography .....	213

## LIST OF FIGURES (Cont.)

Fig. No.		Page
6-1	Treatment satisfaction. Comparison between sildenafil and placebo groups .....	259
6-2	The applicator used for the transurethral administration of alprostadil .....	277
6-3	Mean percentages of men who reported having intercourse after home treatment with alprostadil or placebo according to the primary cause of erectile dysfunction and age .....	281
6-4	The technique of intracavernous injection of vasoactive agents .....	309
6-5	The VCD .....	315
6-6	Applying the vacuum to the penis .....	315
6-7	A constricting elastic band or an O-ring may be used to maintain rigidity .....	317
7-1	AMS Malleable 600 penile prosthesis .....	330
7-2	Small-Carrion penile prosthesis .....	330
7-3	Mentor Malleable penile prosthesis .....	331
7-4	ACU-Form penile prosthesis .....	332
7-5	Dura Phase penile prosthesis .....	333
7-6	AMS Dynaflex penile prosthesis .....	336
7-7	Mark-II inflatable penile prosthesis .....	338
7-8	AMS controlled expansion (CX) cylinder .....	340
7-9	AMS 700 Ultrex penile prosthesis .....	342
7-10	Alpha I inflatable penile prosthesis .....	344
7-11	The transverse upper scrotal incision .....	355

## LIST OF FIGURES (Cont.)

Fig. No.		Page
7-12	The location of the corporotomy .....	357
7-13	Dilatation and measurement of the proximal part of the right corpus for penile prosthesis implantation .....	359
7-14	Implantation of a semirigid rod .....	360
7-15	(A and B): Implantation of an inflatable cylinder.	363
7-16	Insertion of the pump of an inflatable prosthesis in the scrotum .....	364
7-17	The technique of reaching the space of Retzius	367
7-18	The subcoronal approach for placement of penile prosthesis .....	371
7-19	The infrapubic approach for insertion of semirigid penile prostheses .....	372
7-20	Placement of suprapubic reservoir .....	373
7-21	(A and B): Implantation of penile prosthesis cylinder using the CIT .....	375
7-22	Poor glanular support (SST deformity) in a patient with a penile prosthesis that is too short	387
7-23	Technique for closure of the corpora for an SST deformity by plication suture .....	388
7-24	Scrotal exploration and dorsal artery dissection	414
7-25	Inferior epigastric artery transfer .....	419
7-26	(A and B) Surgical treatment of penile fracture	440
7-27	(A and B) Plication procedures performed on a papaverine induced erect penis .....	446
