

# **The Effect of 940 nm Diode Laser on Bond Strength and Dentinal Tubules Penetration of Epoxy Resin Sealer.**

Thesis submitted to Faculty of Dentistry,

Ain Shams University

For

Partial Fulfillment of Requirements of the master  
degree in Endodontics

By

**Mahmoud Ali Mohamed**

**B.D.S.**

**(Faculty of Dentistry, 6<sup>th</sup> October University, 2004)**

**2018**

## **Supervisors**

**Prof. Kariem Mostafa Ibrahim**

**El Batouty**

Professor of Endodontics,

Vice Dean Faculty of Dentistry, Ain

Shams University

**Dr. Tarek Mostafa Abdel Aziz**

Lecturer of Endodontics Faculty

of Dentistry, Ain Shams

University

# ***Dedication***

**This work is dedicated to ...**

**My beloved father**, to whom I owe everything I ever did in my life and will achieve and making me the man, I am now, may ALLAH save him.

**My mother** for always being there for me

**My brothers** and my sister for their support

Finally **my wife and my lovely son** for being the light of my life

## *Acknowledgement*

I would like to express my deep gratitude to *Professor Doctor Kariem Mostafa Ibrahim El Batouty*, Professor of Endodontics, Faculty of Dentistry, Ain Shams University for his kind guidance, sincerity, extraordinary supervision and unlimited support and help throughout my academic and clinical work.

I would like to thank *Dr. Tarek Moustafa Abdel Aziz*, Lecturer of Endodontics, Faculty of Dentistry, Ain Shams University for his excellent advice, valuable stimulating guidance and help during this study.

I would like to thank *all members of Endodontic department*, Faculty of Dentistry, Ain Shams University for their valuable help and cooperation.

بِسْمِ اللَّهِ الرَّحْمَنِ الرَّحِيمِ

قالوا

لسبب أنك لا تعلم لنا  
إلا ما علمتنا أنك أنت  
العليم العظيم

صدق الله العظيم

سورة البقرة الآية: ٣٢

## **List of Contents**

<b>List of figures.....</b>	<b>11</b>
<b>List of tables.....</b>	<b>VI</b>
<b>Introduction.....</b>	<b>1</b>
<b>Review of Literatur.....</b>	<b>3</b>
• Effects Of Chemical Irrigants On Bond Strength	
- Effects Naocl On Bond Strength.	
- Effects EDTA On Bond Strength	
-Effect Of Laser On Bond Stregnth .	
• Effect of Various Irrigants on Penetration of Resin Sealer Into Dentinal Tubules.	
<b>Aim of Study .....</b>	<b>39</b>
<b>Materials And Methods Methods.....</b>	<b>40</b>
<b>I. Materials.</b>	
<b>II. Methods.</b>	
<b>Results.....</b>	<b>52</b>
<b>Discussion.....</b>	<b>75</b>
<b>Summary and Conclusion .....</b>	<b>88</b>
<b>Reference.....</b>	<b>91</b>

## **List of Figures**

<b>Figure (1):</b> Diagram for samples classification	43
<b>Figure (2):</b> the isomet 4000 cutting specimens by diamond disc with 2mm –thickness discal distance	45
<b>Figure (3)</b> Diagram showing The cutting sequence followed to obtain the slices.permission by tarek mostsfa	46
<b>Figure(4):</b> Diagram for the push-out bond strength test	48
<b>Figure (5):</b> Push-out strength test specimen mounted on LLOYD testing machine.	49
<b>Figure (6):</b> Histogram of the mean values of push out bond strength for each irrigant system groups as function of radicular region	53
<b>Figure (7):</b> Column chart comparing the total mean values of push out bond strength as function of irrigant system groups	55
<b>Figure (8):</b> Column chart comparing the total mean values of push out bond strength as function of radicular region subgroups	56
<b>Figure (9):</b> Column chart comparing the mean values of push out bond strength as function of <i>irrigant system</i> groups at radicular cervical region	57
<b>Figure (10):</b> Column chart comparing the mean values of push out bond strength as function of irrigant system groups at radicular middle region	58
<b>Figure (11):</b> Column chart comparing the mean values of push out bond strength as function of irrigant system groups at radicular apical region	59
<b>Figure (12):</b> Column chart comparing the mean values of push out bond strength for EDTA irrigant system group as function of radicular region	60
<b>Figure (13):</b> Column chart comparing the mean values of push out bond strength for NaOCl irrigant system group as function of radicular region	61
<b>Figure (14):</b> Column chart comparing the mean values of push out bond strength for laser irrigant system group as function of radicular region	62

<b>Figure (15):</b> Stacked column chart comparing the frequent distribution of failure modes scores for each irrigant system groups as function of radicular region	65
<b>Figure (16):</b> Representative microscopic image of adhesive failure mode score	66
<b>Figure (17):</b> Representative microscopic image of mixed failure mode score	66
<b>Figure (18):</b> Representative microscopic image of cohesive failure mode score	66
<b>Figure (19):</b> Histogram of the mean values of sealer penetration for each irrigant system groups as function of radicular region	67
<b>Figure (20):</b> SEM image representing the penetration of AH-plus sealer to dentin- treated with diode laser in the cervical third	70
<b>Figure (21):</b> SEM image representing the penetration of AH-plus sealer to dentin- treated with diode laser in the middle third.	70
<b>Figure (22):</b> SEM image representing the penetration of AH-plus sealer to dentin- treated with diode laser in the epical third.	71
<b>Figure (23):</b> SEM image representing the penetration of AH-plus sealer to dentin- treated with EDTA in the cervical third	71
<b>Figure (24):</b> SEM image representing the penetration of AH-plus sealer to dentin- treated with EDTA in the middle third	72
<b>Figure (25):</b> SEM image representing the penetration of AH-plus sealer to dentin- treated with EDTA in the apical third	72
<b>Figure (26):</b> SEM image representing the penetration of AH-plus sealer to dentin- treated with NaOCl in the cervical third.	73
<b>Figure (27):</b> SEM image representing the penetration of AH-plus sealer to dentin- treated with EDTA in the middle third.	73
<b>Figure (28):</b> SEM image representing the penetration of AH-plus sealer to dentin- treated with NaOCl in the apical third.	74
