**HYDROGEOLOGY AND HYDROLOGICAL STUDIES
IN HALAIB-SHALATIN AREA, EGYPT, USING
REMOTE SENSING TECHNOLOGY AND OTHER
TECHNIQUES**

By
Hossam Hamdy Elewa Omar
M.Sc. In Geology

A Thesis
Submitted for the
Ph.D. Degree
in Geology

DEPARTEMENT OF GEOLOGY
FACULTY OF SCIENCE
AIN HELWAN UNIVERSITY

AIN SHAMS UNIVERSITY

Approval Sheet

HYDROGEOLOGY AND HYDROLOGICAL STUDIES IN HALAIB-SHALATIN AREA, EGYPT, USING REMOTE SENSING TECHNOLOGY AND OTHER TECHNIQUES

A Thesis
Submitted for the
Ph.D. Degree
(Geology)

by

Hossam Hamdy Elewa Omar

M.Sc. In Geology

Supervisors

M. Yehia

Prof. Dr. Mohamad Adel Yehia
Prof. of Geology, Ain Shams University
and Chairman
of the National Authority for
Remote Sensing and Space Sciences
(NARSS)

Rafik

Prof. Dr. Rafik Galal Fathi
Head of the Central Administration for
Groundwater, General Authority for
Rehabilitation Projects and Agricultural
Development (GARPAD)

M. El-Rakaiby

Prof. Dr. Maged Lotfy El-Rakaiby
Prof. of Remote Sensing and Head of
agreements and contracts divisions in the
Nuclear Materials Authority

Zaghloul

Prof. Dr. El-Sayed Abass Zaghloul
Prof. of Geology and Head
of the Engineering Applications
and Water Division in the National
Authority for Remote Sensing and
Space Sciences (NARSS)

Prof. Dr. Samir Ahmed Awad
Chairman of the Department of Geology

2-10-14

DEDICATION

To my parents, my son and the memory of my wife

Acknowledgements

The author wishes to express his deep gratitude to Prof. Dr. **Mohamed Adel Yehia**, Prof. of geology and Chairman of the National Authority for Remote Sensing and Space Sciences (NARSS) for supervising this work and providing all the valuable scientific facilities, comments and for his continuous encouragement and support.

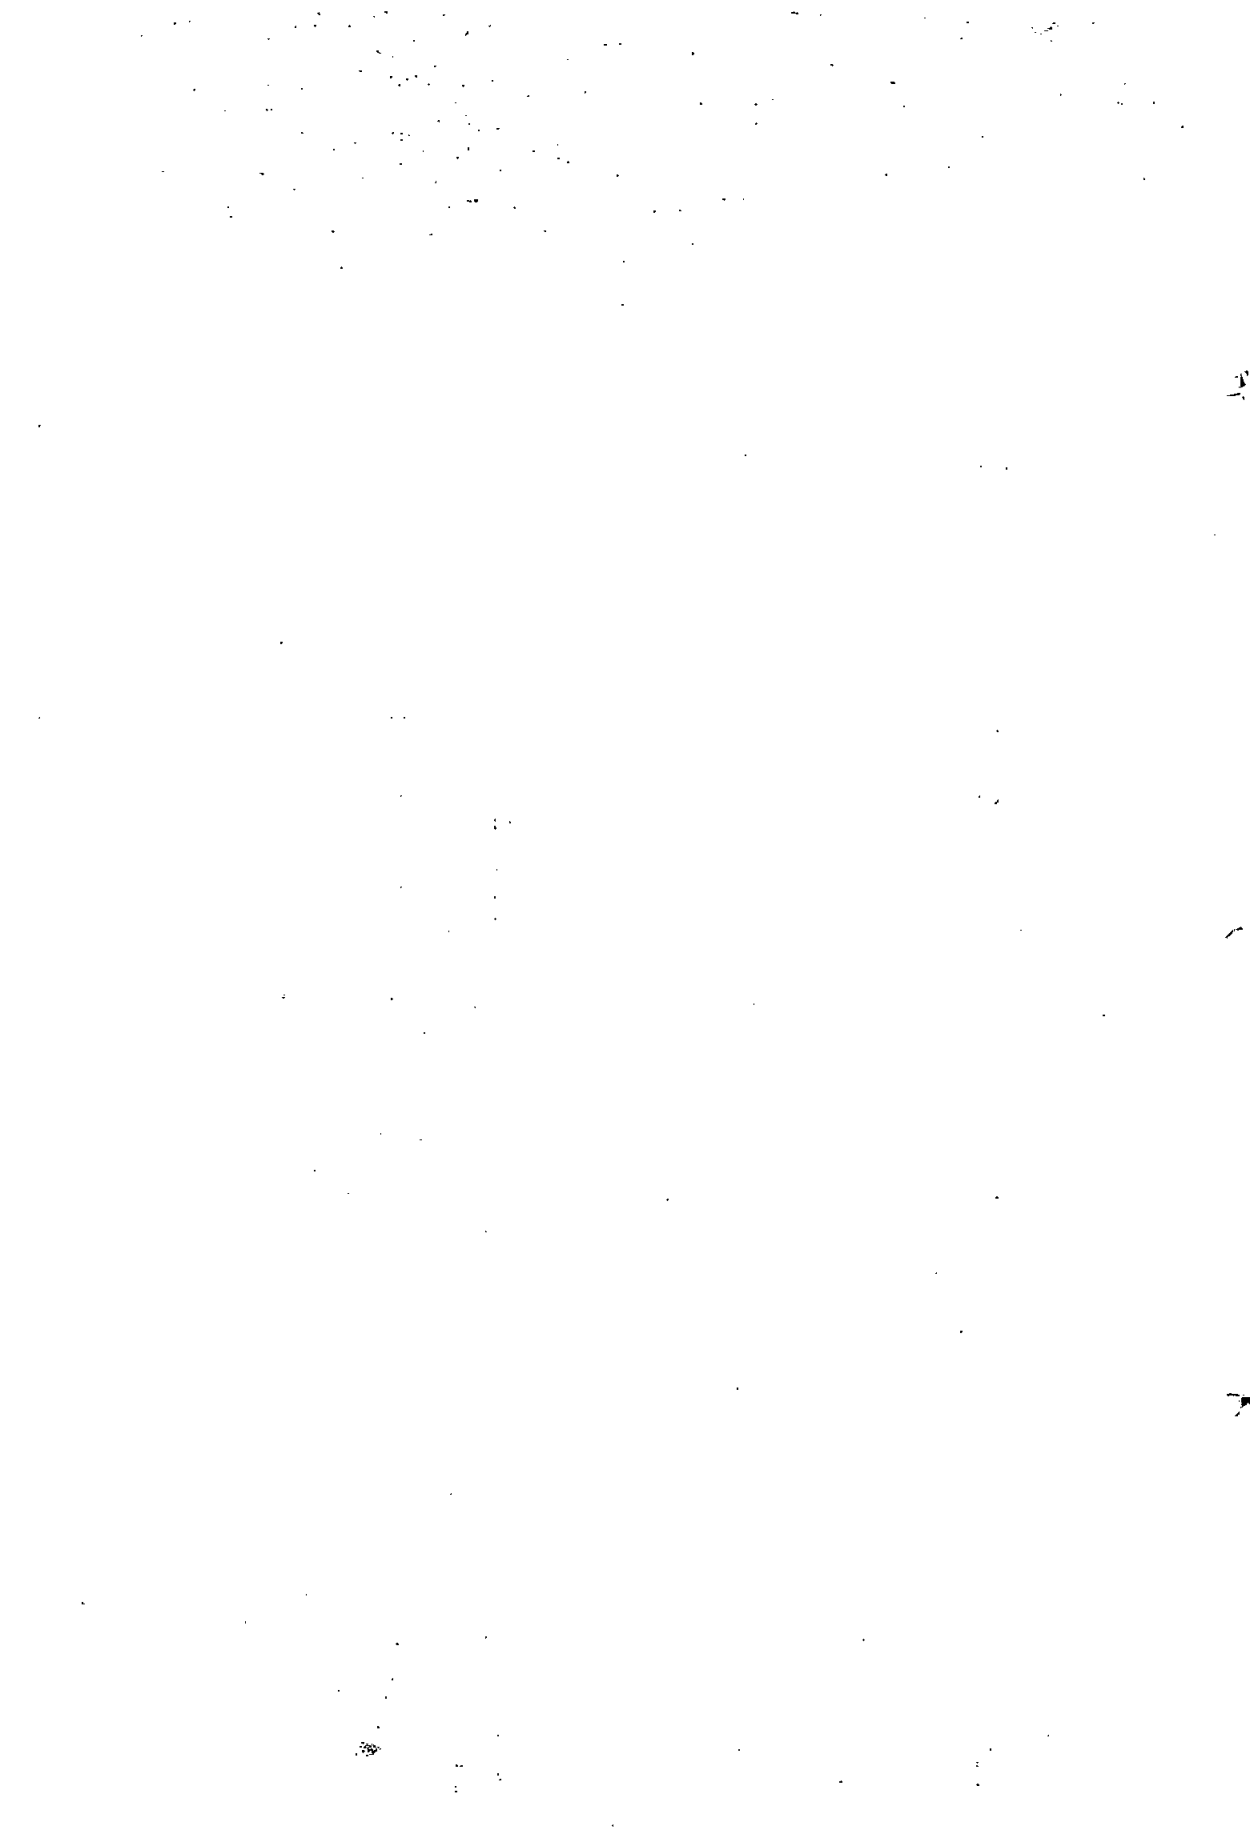

Also, the author wishes to express his deep gratitude to Prof. Dr. **Rafik Galal Fathi**, Head of the Central Administration of Groundwater in the General Authority for Rehabilitation Projects and Agricultural Development (GARPAD), for his inspirational supervision of this work, providing all the available data and careful revision of all items of the work.

The author is greatly indebted to Prof. Dr. **Maged Lotfy El-Rakaiby**, Head of the Agreements and Contracts Division in the Nuclear Materials Authority, for suggestions, supervision and careful revision of the work and Prof. Dr. **El-Sayed Abass Zaghloul**, Head of the Engineering Applications and Water Division in NARSS for suggestions, planning and supervision of all steps of this study. Both of them made many excellent suggestions and caught my errors.

Thanks are kindly extended to Prof. Dr. **Mourad Ibrahim Youssef** and Prof. Dr. **Adel Ramadan Moustafa** and Prof. Dr. **Samir Awad** and **Staff Members** of Geology Department, Faculty of Science, Ain Shams University for their inspirational comments and encouragement.

The writer is also deeply grateful for Prof. Dr. **Morsy Ahmad Morsy** and Dr. **El-Sayed Ahmed El-Gamal** for their honest assistance in some topics of the work.

The writer also wishes to express his obligation to his friends and colleagues geologist Alaa El-Din Mohamed Salah and geologist **Mohamed El-Amir Nagaty** for providing some valuable computer facilities.

Tables of Contents

	Page No.
List of figures	v
List of tables	ix
Abstract	xi
I Introduction	1
1.1 General outline	1
1.2 Location	2
1.3 Previous works	2
1.4 Climatic conditions	8
1.5 Topographic features	18
1.6 Aim and scope of the present work	18
1.6.1 Groundwater investigations	18
1.6.2 Office work	19
II Geological Setting	23
2.1 General	23
2.2 Description of rock units	23
2.2.1 Precambrian basement rocks	26
2.2.2 Cretaceous sedimentary rocks	31
2.2.3 Miocene carbonate rocks	34
2.2.4 Quaternary sediments	35
2.2.5 Tectonics	36
2.2.6 Infiltration tests of alluvial deposits (soils)	42
2.2.7 The relation between rock types and fracture intensity to the infiltration capabilities of rocks	50
III Geomorphology	56
3.1 geomorphological units	56
3.1.1 Denudational landforms	57

3.1.2 Accumulated landforms.....	60
3.1.3 Coastal plain.....	63
3.2 Drainage basins.....	64
3.2.1 General.....	64
3.2.2 Drainage basins morphometric parameters.....	65
3.2.3 Drainage basins geomorphometric characteristics of the study area.....	70
3.3 Rainfall-runoff relationship.....	105
IV Hydrogeology.....	115
4.1 General.....	115
4.2 Water points.....	115
4.2.1 Natural springs.....	116
4.2.2 Hand-dug wells.....	119
4.2.3 Drilled (rotary) wells.....	124
4.3 Hydrogeological Mapping.....	125
4.3.1 Hydrogeological units.....	125
V Hydrogeoelectric investigations	139
5.1 General.....	139
5.2 Methodology.....	140
5.3 Hydrogeoelectrical investigations of Wadi Abu Saafa.....	142
5.3.1 Description of the pseudogeoelectric section A-A'.....	143
5.3.2 Description of the interpreted geoelectric section A-A'.....	145
5.3.3 Hydrogeological data.....	149
5.3.4 Conclusion.....	152
5.4 Hydrogeoelectrical investigations at Wadi Ibib.....	152
5.4.1 Description of the pseudogeoelectric section B-B'.....	154
5.4.2 Description of the interpreted geoelectric section B-B'.....	154
5.4.3 Recommendations.....	158
5.5 Hydrogeoelectric investigations at Wadi Serimtai.....	160
5.5.1 Description of the pseudogeoelectric section C-C'.....	161
5.5.2 Description of the interpreted geoelectric section C-C'.....	165
