بِسْمِ اللَّهِ الرَّحْمَنِ الرَّحِيمِ

﴿وَعَلَّمَكَ مَا لَمْ تَكُن
تَعْلَمُ وَكَانَ فَضْلُ اللَّهِ
عَلَيْكَ عَظِيمًا﴾

صدق الله العظيم

النساء آية "١١٣"

Acknowledgement

I would like to express my deepest gratitude and sincere thanks to Professor Mona Abd-El Hamid Raafat, professor of Neuropsychiatry, Ain Shams University, for suggesting this topic, for her kind support, supervision, constructive criticism, guidance, and precious time. To her I am truly grateful.

I am greatly indebted to Professor Mahmoud Hemeda Al-Rakawy, assistant professor of Neuropsychiatry, Ain Shams University for his valuable advices, true encouragement and keen interest in the progress and accomplishment of this work.

I would like to express my sincere thanks to Professor Gihan Medhat El-Nahas, professor of Neuropsychiatry, Ain Shams University for her assistance all through this work.

I would like to extend my deepest appreciation and thanks to all my professors and colleagues at the department of Neuropsychiatry, without whom this work would not be completed.

Last but not least, I can find no words to express my gratitude to my family, friends, and my beloved husband for their love, care, and support through this work.

Finally with all the love, I dedicate this work to my baby girl Malak.

Contents

	Page
Introduction and Aim of the Work	1
Review of Literature	
Basic Genetics	5
Genetics of Multifactorial Risk Factors of Cerebrovascular Stroke	13
Human Single Gene Disorders Associated With Stroke	29
Genetic of Systemic Disorder That Cause Hemorrhagic Stroke	44
Gene Therapy in Cerebrovascular Stroke	48
Inflammatory Responses in Cerebral Ischemia	54
The Potential For Harm or Benefit from Inflammatory Process in Stroke and How it Can Affect the Prognosis and its Possible Role in Treatment	74
Immunological Disorders Causing Cerebrovascular Stroke	80
Discussion	104
Summary and Conclusion	113
Recommendations	114
References	115
Arabic Summary	

List of Figures

	Page
Figure (1) Schematic Representation of Chromosome Structure	7
Figure (2) Steps of Protein Synthesis	9
Figure (3) A T ₂ Weighted MRI showing high signal in CADASIL	36
Figure (4) Brain MRI Flair Scan showing hyperintense Lesions in CADASIL	36
Figure (5) MRI T ₂ Weighted Images of a Young CADASIL Patient	37
Figure (6) Notch 3 exon 4 Sequence Analysis showing mutation in the patient but not in his parents	37
Figure (7) Electromicroscopy of skin biopsy in CADASIL	38
Figure (8) T ₂ Weighted MRI Scans From a Patient with typical clinical phenotype of MELAS in (A,B,C,D) with (F) showing large lactate peak	41
Figure (9) Delivery of Genes to Human Subjects	49
Figure (10) Crises Condition during Stroke	52
Figure (11) Schematic Diagram of the Leukocyte Recruitment Sequence	66
Figure (12) Pattern of Gene Expression	73
