صدق الله العظيم

سورة النساء- آية رقم (١١٣)

ACKNOWLEDGMENT

First and foremost, thanks to **Allah**

I would like to express my great indebtedness to **Prof. Dr. Ikram Ibrahim Safe**, Professor of Plastic Surgery at Ain Shams University, and **Ass. Prof. Dr. Saad Salah Elfaiomy**, Assistant Professor of Plastic Surgery at Ain Shams University, who gave me the honor to do this work under their supervision. I appreciate their eminent guidance, continuous encouragement, valuable criticism and helpful instructions.

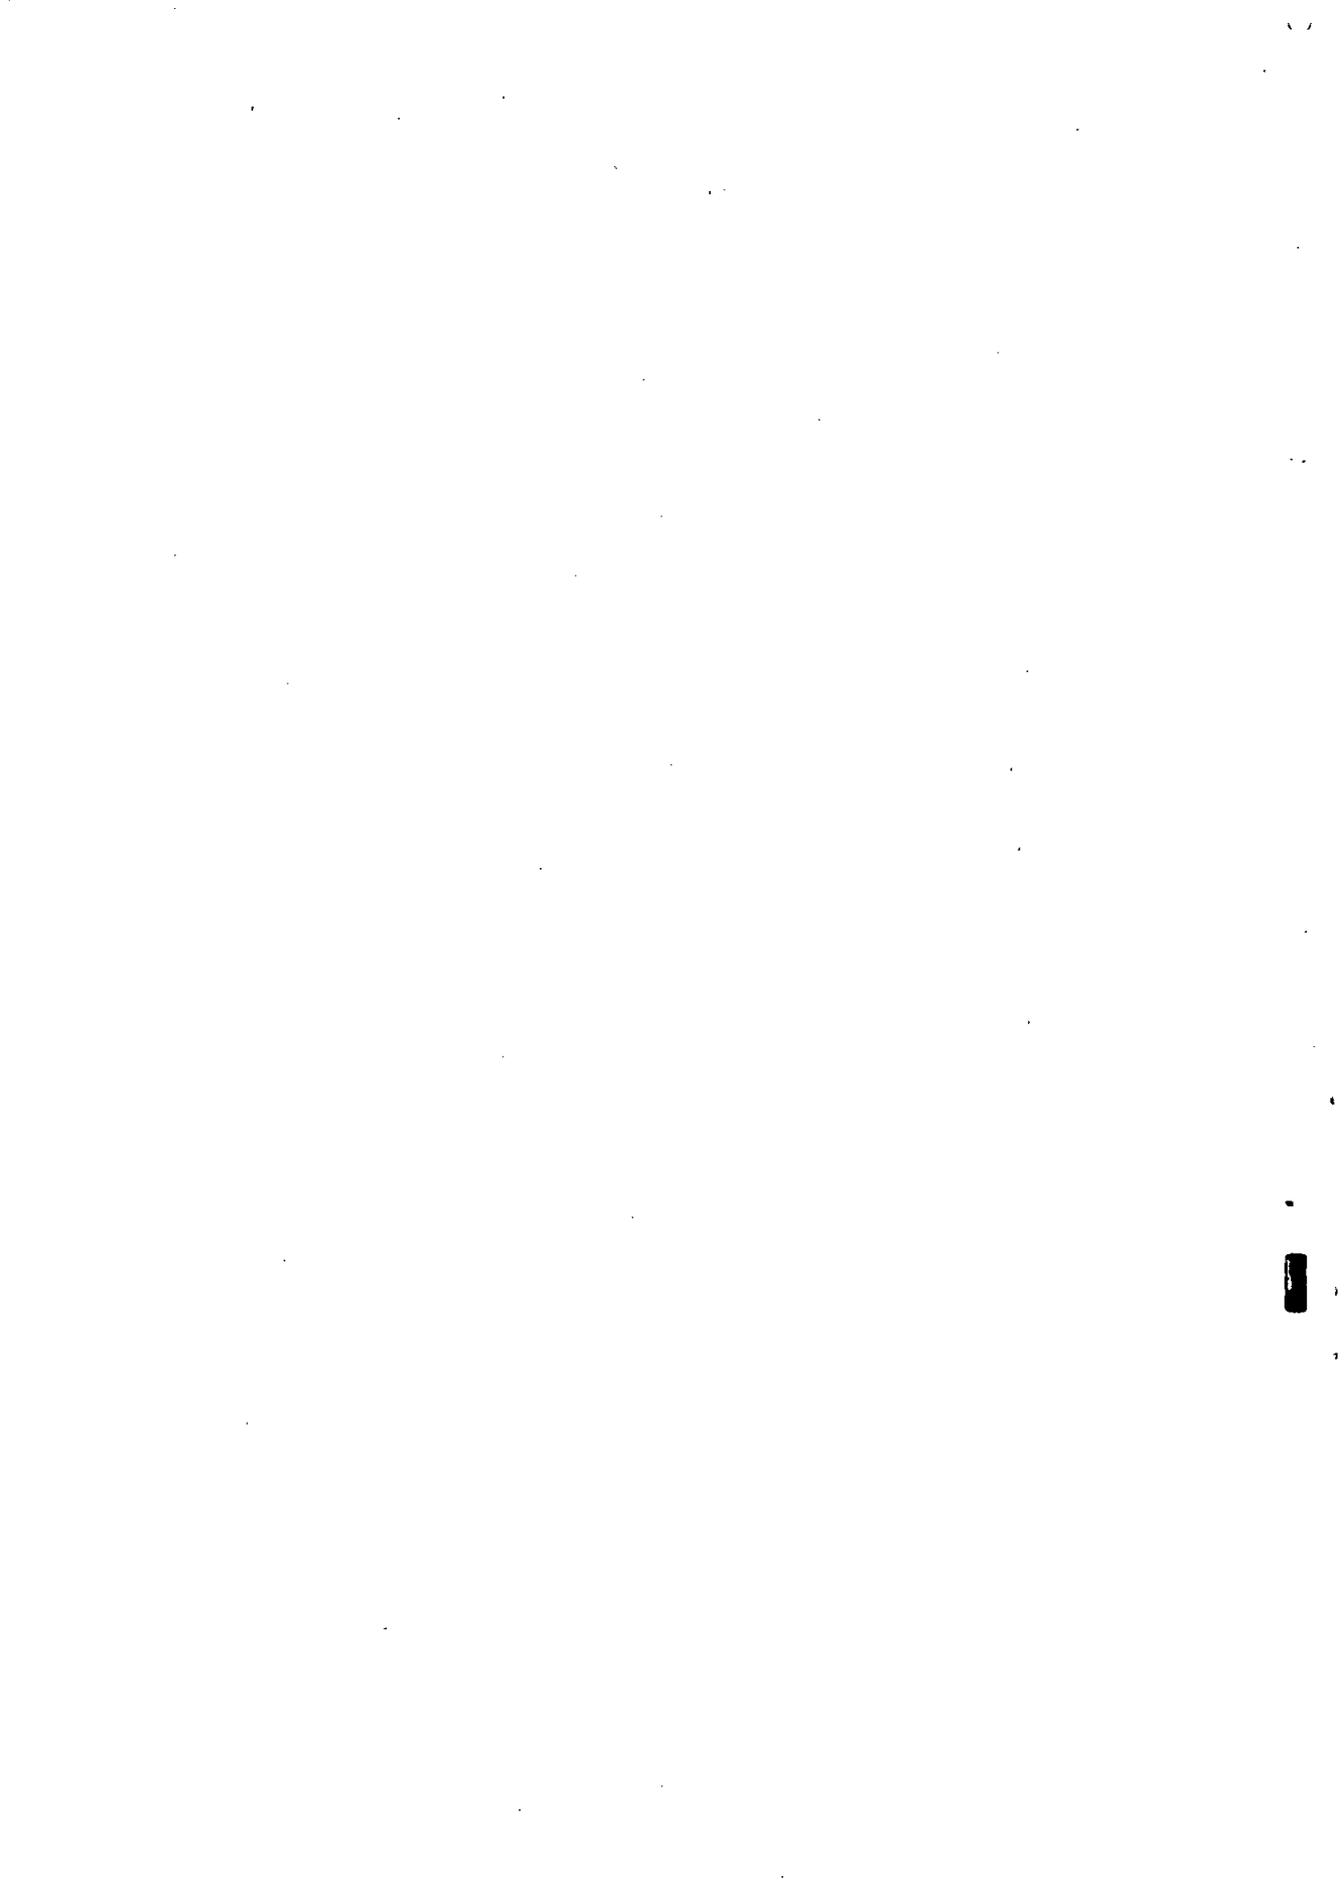

My deepest thanks and gratefulness go to **Prof. Dr. Maher Mohamed Emara**, Professor of Histology at Ain Shams University for his support for this work, since the beginning. He allowed me to learn from his science and generosity. No word can express my respect to his thoughtfulness and overwhelming kindness.

I wish to express my deep gratitude to **Prof. Dr. Paul Manson**, Professor and chief of Plastic Surgery at Johns Hopkins Medical Institute, for accepting me among his fellows, for encouraging me and for his scientific discussions that helped me a lot in finalizing this work.

I would like to deeply thank **all staff members** at the Plastic Surgery department, Ain Shams University and in particular **Professor Dr. Mostafa Hemedat**; the chief of the department for continuous encouragement and support throughout the whole work.

I will never forget the great help from **all staff members** who helped me at Johns Hopkins Medical Institute and in particular from **Associate Prof. Dr. Craig Vander Kolk** (Associate Professor of Plastic Surgery), **Ass. Professor Dr. Anthony Tufaro** (Assistant professor of Plastic surgery) and **Associate Prof. Dr. Nozomu Inoue** (Associate Professor of orthopedic).

Finally, Thanks to the **mission department at the ministry of high education** for financing this study..

INTRODUCTION	1
AIM OF THE WORK	3
REVIEW OF LITERATURE	5
MATERIALS AND METHODS	87
RESULTS	106
DISCUSSION	139
SUMMARY	152
CONCLUSION	154
REFERENCES	156
ARABIC SUMMARY	

REVIEW OF LITERATURE		Page
I-	STRUCTURE OF BONE	5
	Macroscopic and Microscopic	
	A- BONE MATRIX	
	1- Collagen.	
	2- Non-Collagenous proteins	
	B- BONE MINERALS	
	C- BONE CELLS	
	1- Osteoprogenitor cells	
	2- Osteoblasts	
	3- Osteocytes	
	4- Osteoclasts	
II-	HISTOGENESIS OF BONE	22
	A- Intramembranous ossification	
	B- Endochondral ossification	
	- IMMATURE AND MATURE BONE	
III-	MINERALIZATION OF BONE	31
	Step – 1 Matrix modification	
	Step – 2 Crystal nucleation	
	Step – 3 Crystal growth	
	Step – 4 Remodeling of mineralized matrix	
IV-	REMODELING OF BONES	35
	A- Surface remodeling	
	B- Internal reorganization	
V-	FRACTURE HEALING	38
	A- Primary bone healing (gap and contact healing)	
	B- Secondary bone healing (cartilaginous and bony callus)	

**VI- TRANSPLANTATION OF BONE
PRODUCING TISSUES 43**

- Source of bone regeneration (a historical review)
- Immunological aspects of bone transplantation
- Milestones in history of bone grafting

**VII- METHODS OF MANAGEMENT OF BONE
DEFECTS 50**

A- Osteogenesis (spontaneous and transplanted osteogenesis)

- Autogenous transplant repair
- Differences between cortical and cancellous transplant repair
- Remodeling of transplanted bone

B- Osteoconduction

C- Osteoinduction

- Demineralized Bone Matrix (A historical review)
- Bone induction cascade
- Role of the geometry of the extracellular matrix in bone induction
- Can the Demineralized bone matrix be transplanted between different species

**VIII- GROWTH AND DIFFERENTIATION
FACTORS IN BONE 59**

A- Differentiation Factors (Bone morphogenetic proteins)

B- Growth Factors

- 1- Transforming growth factor beta (TGF)
- 2- Insulin-like growth factor-I (IGF)
- 3- Platelet derived growth factor (PDGF)
- 4- Epidermal growth factor (EGF)

5- Basic fibroblastic growth factor (basic FGF)

IX-	TISSUE ENGINEERING	64
X-	DISTRACTION OSTEOGENESIS	66
XI-	GUIDED BONE REGENERATION	70
-	A historical review	
-	Mechanism of action	
-	Biomaterials for guided bone regeneration	
-	Differences between bioresorbable and non-resorbable membranes	
-	Filling materials under the membranes used for guided bone regeneration	
-	Addition of growth and differentiation factors	
-	Guided bone regeneration in long bones	
-	Guided bone neogenesis	
-	Regeneration of suture lines by guided bone regeneration
