**GEOLOGY OF THE BASEMENT ROCKS OF ABU
DURBA-ABU HASWA AREA, SOUTHWESTERN SINAI,
EGYPT.**

THESIS

SUBMITTED TO THE GEOLOGY DEPARTMENT, FACULTY OF SCIENCE,
SUEZ CANAL UNIVERSITY

IN PARTIAL FULFILMENT FOR THE DEGREE OF
MASTER OF SCIENCE (GEOLOGY)

BY

MOHAMMED ZAKY YOUNIS EL BIALY
B.Sc. (GEOLOGY)

1998

B.
HAVE

SUPERVISORS :

Dr. Farouk Ahmed Mohammed Soliman
Assoc. professor of igneous rocks and geochemistry
Faculty of Science, Suez Canal University

F.A. Soliman

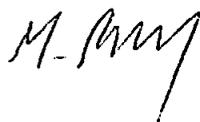

Dr. Moustafa Hassanien Yossof Hashad
Assoc. professor of igneous rocks and geochemistry
Faculty of Science, Suez Canal University

M.H. Hashad

EXAMINAR COMMITTEE

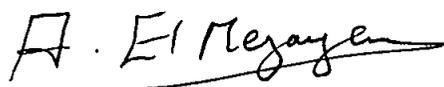

Dr. Mohamed Fouad Ghoneim

Professor of Geochemistry,
Geology Department
Faculty of Science, Suez Canal University

Dr. Ahmed Mohamed Ahmed El Mezien

Professor of Geology,
Geology Department,
Faculty of Science, Al Azhar University

Dr. Farouk Ahmed Mohamed Soliman

Assoc. Professor of Geology and Geochemistry
Geology Department,
Faculty of Science, Suez Canal University

Dr. Mostafa Hasanein Hashad

Assoc. Professor of Geology and Geochemistry
Geology Department,
Faculty of Science, Suez Canal University

DEDICATION

TO MY FATHER, MY WIFE AND MY LOVELY SON *AHMED*

ACKNOWLEDGMENTS

PRAISE BE TO ALLAH, LORD OF THE HEAVEN AND LORD OF THE EARTH,
LORD OF ALL THE WORLD

The author is deeply indebted to Dr. Farouk S. Soliman, Assoc. Prof., Suez Canal University, for proposing the point of research, guidance, criticism, valuable discussion and supervision.

The author wishes to express his deep gratitude to Dr. Moustafa H. Hashad, Assoc. Prof., Suez Canal University, for guidance, criticism, valuable discussion and supervision.

Special thanks are extended to Dr. Ibrahim H. Khalifa, Suez Canal University, who gratefully carried out the chemical analysis of ten rock samples of the present study at Technical University of Berlin, Germany.

Sincere thanks are extended to Dr. Nabil N. El Masry and Dr. Ombarak S. Hassen, Suez Canal University, for providing me many valuable papers from their own library.

The author is also greatly indebted to the fellow colleague Hatim F. Hassaan for his help and assistance during field work.

The author is grateful to Mr. Soud M. Hamid for his help in some thin sections preparation. The author is also thankful to Abdel Rahman I. Mohammed who was a honest driver.

Last but not the least, I wish to express my deep thanks to my father and my wife for their help and encouragement during all stages of this work.

CONTENTS

	page
Chapter One: INTRODUCTION	
1. 1: General.....	1
1. 2: Location and Accessibility.....	2
1. 3: Topography.....	3
1. 4: Climate.....	4
1. 5: Previous Work.....	5
1. 6: Aim and plan of the work.....	7
Chapter Two: GEOLOGICAL SETTING	
2. 1: Geology and lithostratigraphy.....	9
2. 1. 1: The younger granites.....	10
2. 1. 1. 1: Phase II younger granites.....	11
2. 1. 1. 2: Phase III younger granites.....	13
2. 1. 2: Post granitic dykes.....	16
2. 1. 3: Acid porphyries.....	18
2. 1. 4: Pyroclastics and lava flows.....	21
2. 1. 4.1: Pyroclastics.....	23
2. 1. 4. 2: Lava flows.....	24
2. 1. 5: Paleozoic sandstones.....	25
2. 1. 6: Epiclastic conglomerate.....	26
2. 1. 7: Tertairy dykes.....	27
2. 1. 8: Quaternary sands and gravels.....	28
2. 2: Structural framework.....	28

	page
2. 2. 1: The regional structures of the study area.....	29
2. 2. 2: The structural elements of the study area.....	30
2. 2. 2. 1: Faults.....	30
2. 2. 2. 2: Folds.....	34

Chapter Three: PETROGRAPHY

3. 1: Younger granites.....	36
3. 1. 1: Phase II younger granites.....	39
3. 1. 1. 1: Porphyritic biotite granite.....	40
3. 1. 1. 2: Biotite granodiorite.....	42
3. 1. 1. 3: Medium-grained leucogranite.....	44
3. 1. 1. 4: Aplitic granite.....	45
3. 1. 2: Phase III younger granites.....	46
3. 1. 2. 1: Porphyritic granite.....	47
3. 1. 2. 2: Biotite granites.....	49
3. 1. 2. 3: Coarse to medium-grained leucogranite.....	52
3. 1. 2. 4: Coarse to medium-grained muscovite biotite granite.....	53
3. 1. 2. 5: Fine-grained muscovite biotite granite.....	55
3. 1. 2. 6: Muscovite granites.....	56
3. 2: Post granitic dykes.....	58
3. 2. 1: Andesitic dykes.....	58
3. 2. 1. 1: Quartz andesite dykes.....	59
3. 2. 1. 2: Porphyritic andesite dykes.....	59
3. 2. 2: Rhyolitic dykes.....	60
3. 3: Acid porphyries.....	60

	page
3. 3. 1: Quartz latite porphyry.....	60
3. 3. 2: Granite porphyries.....	61
3. 3. 2. 1: Quartz granite porphyry.....	61
3. 3. 2. 2: Quartz alkali feldspar granite porphyry.....	62
3. 3. 3: Rhyolite porphyry.....	64
3. 4: Pyroclastics and lava flows.....	64
3. 4. 4: Pyroclastics.....	65
3. 4. 4. 1: Lithologic classification.....	65
3. 4. 4. 1. 1: Vitric tuffs.....	66
3. 4. 4. 1. 2: Crystal tuffs.....	70
3. 4. 4. 1. 3: Lithic tuffs.....	72
3. 4. 4. 2: Mineralogical classification.....	74
3. 4. 2: Lava flows.....	73
3. 4. 2. 1: Rhyolite lava flows.....	74
3. 4. 2. 1. 1: Cryptocrystalline rhyolites.....	74
3. 4. 2. 1. 2: Spherulitic rhyolites.....	75
3. 4. 2. 2: Rhyodacite lava flows.....	75
3. 5: Tertairy dykes.....	76
3. 5. 1: Hornblende basalt dykes.....	76
3. 5. 2: Trachyte dykes.....	77

Chapter Four: GEOCHEMISTRY

4. 4: General.....	78
4. 2: Methodology.....	78
4. 3: Precision and Accuracy.....	79
4. 4: Granitoid rocks.....	80

	page
4. 4. 1: General Characteristics of major elements.....	80
4. 4. 2: Petrochemical classification.....	85
4. 4. 2. 1: Total alkalis-silica (TAS) diagrams.....	85
4. 4. 2. 2: Cationic classification diagrams.....	85
4. 4. 2. 3: Normative Ab-An-Or diagram.....	86
4. 4. 3: Magma type.....	86
4. 4. 3. 1: AFM diagram.....	86
4. 4. 3. 2: Alkalinity ratio.....	87
4. 4. 3. 3: Log (K ₂ O / MgO) versus SiO ₂ diagram.....	87
4. 4. 3. 4 : Alkali-lime index.....	88
4. 4. 3. 5: Rittmann's suite index.....	88
4. 4. 4: Normative composition.....	88
4. 4. 4. 1: Ab-An-Or diagram.....	91
4. 4. 4. 2: Ab-Or-Qz diagram	92
4. 4. 4. 3: An-Qz diagram.....	93
4. 4. 5: Niggli values.....	93
4. 4. 5.1: Variation of <i>si</i> against <i>al</i> , <i>fm</i> , <i>c</i> and <i>alk</i> values.....	93
4. 4. 5. 2: <i>fm-al</i> diagram.....	94
4. 4. 5. 3: <i>alk-al</i> diagram.....	94
4. 4. 6: Differentiation of granitoid rocks.....	94
4. 4. 6. 1: Harker-type variation diagrams.....	94
4. 4. 6. 2: Felsic and mafic indices.....	95
4. 4. 6. 3: AFM diagram.....	96
4. 4. 6. 4: Oxidation ratio.....	96
4. 4. 7: Alumina saturation concept.....	97
4. 4. 7. 1: A/CNK versus SiO ₂ diagram.....	97

	page
4. 4. 7. 2: A/CNK versus A/NK diagram.....	97
4. 4. 7. 3: Characteristic minerals diagram.....	98
4. 4. 8: Genetic classification (alphabet granitoids).....	98
4. 4. 8. 1: A/CNK vs. SiO ₂ diagram.....	99
4. 4. 8. 2: Na ₂ O vs. K ₂ O diagram.....	99
4. 4. 8. 3: Rb/Zr vs. SiO ₂ diagram.....	100
4. 4. 8. 4: Zr vs. SiO ₂ diagram.....	100
4. 4. 9: Trace elements geochemistry.....	101
4. 4. 9. 1: Abundance and average contents.....	101
4. 4. 9. 2: Trace elements variation.....	105
4. 4. 9. 3: Large ion lithophile (LIL) elements.....	106
4. 4. 9. 3. 1: Ba-Rb-Sr relation.....	106
4. 4. 9. 3. 2: Rb-Sr diagram.....	107
4. 4. 9. 3. 3: Ba-Sr correlation diagram.....	108
4. 4. 9. 3. 4: K% vs. Rb diagram.....	108
4. 4. 9. 3. 5: Variation of Ca/Sr and K/Rb ratios with differentiation.....	109
4. 4. 9. 3. 6: K/Rb vs. Rb diagram.....	110
4. 4. 9. 4: Zirconium and Zircon geothermometry.....	110
4. 4. 10: Tectonic setting.....	111
4. 4. 10. 1: R ₁ -R ₂ diagram.....	111
4. 4. 10. 2: Al ₂ O ₃ vs. SiO ₂ diagram.....	112
4. 4. 10. 3: Nb-Y and Rb-(Y+Nb) diagrams.....	112
4. 4. 10. 4: FeO*/MgO-(Zr+Nb+Ce+Y) and (K ₂ O+Na ₂ O)/CaO-(Zr+Nb+Ce+Y) diagrams.....	113
4. 4. 10. 5: Rb/Zr vs. Nb and Y (arc maturity) diagrams.....	113
4. 5: The volcanic rocks.....	114
