# ACKNOWLEDGMENT

*I would like to express my deepest thanks and gratitude to prof. Dr. Adel Fahim Ahmed Ain Shoka, professor of surgery. Faculty of Medicine, Ain Shams University, for his keen interest, meticulous supervision, constant guidance.*

*I would also like to express my sincere gratitude to prof. Dr. Abdel Wahab Mohamed Ezzat, professor of surgery. Faculty of Medicine, Ain Shams University, for his valuable support, kind sincere advice, and unique help in bringing this work forward.*

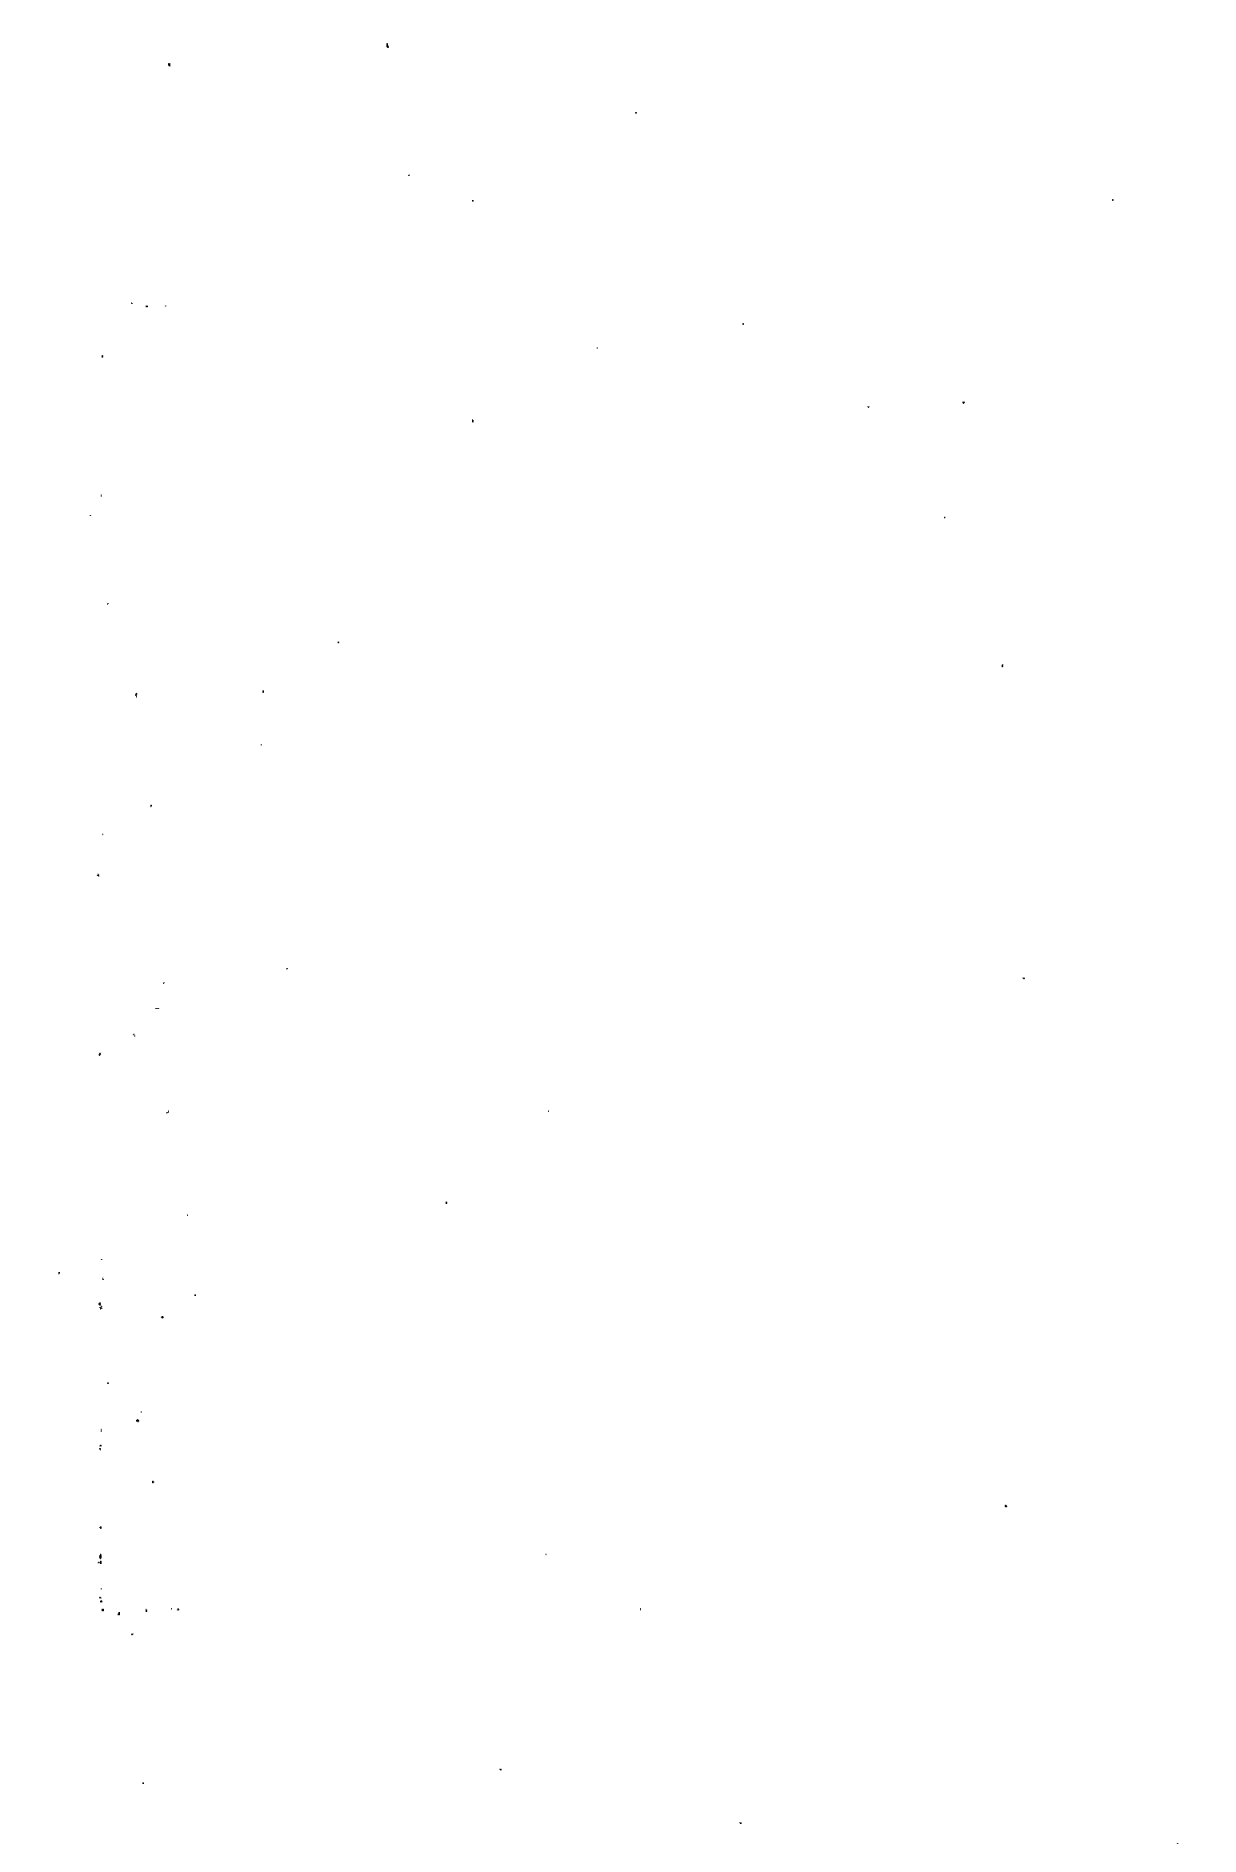

*I would also like to express my sincere gratitude to Dr. Ashraf Mohamed Fawzi, lecturer of surgery. Faculty of Medicine, Ain Shams University, and to Dr. Karim Ali Yehia Ali Shahin, Lecturer of Clinical Pathology for their continuous support, kind advice, and aid in bringing this work forward.*

# **CONTENTS**

1. Introduction.....	1
2. Aim of the work.....	3
3. Review of literature.....	5
• surgical anatomy and embryology of the thyroid gland and its related structures.....	5
• surgical anatomy and embryology of the parathyroid gland.....	30
• pathophysiology of calcium metabolism.....	46
• complications after thyroid surgery.....	73
4. Patient and Method .....	99
5. Results .....	109
6. Discussion.....	155
7. Conclusion .....	181
8. Summary.....	183
9. References. ....	185
10. Arabic Summary	

## **LIST OF FIGURES**

<b>Figure</b>	<b>Page</b>
1. Muscles encountered during thyroidectomy	8
2. The superficial veins encountered during thyroidectomy and their injury should be avoided during flap dissection.	10
3. Arteries and veins supplying and draining the thyroid gland	12
4. Lymphatic drainage of the thyroid gland.	15
5. Lymphatic drainage of the thyroid gland.	17
6. Relation of the internal and external branches of the superior laryngeal nerve to the superior thyroid artery at the upper pole of the thyroid gland	19
7. Loop of Galen formed by anastomosis of sensory branches of both recurrent and superior laryngeal nerves	22
8. The course of recurrent laryngeal nerve at the level of thyroid gland in 102 cadavers	23
9. Posterior view showing the relation of the recurrent laryngeal nerves and inferior thyroid arteries	24
10. Various relations at crossing of the recurrent laryngeal nerve and the inferior thyroid artery	26
11. Cross sectional anatomy of the neck at the level of mid thyroid gland.	28
12. Development of the parathyroid gland.	31
13. Descent of the lower parathyroid.	33
14. Location of the upper parathyroid glands	35
15. Most common anatomic location of Superior & Inferior parathyroid glands	36

16. Location of the lower parathyroid glands.	39
17. The thyrothymic ligaments.	40
18. Different shapes of parathyroid glands and their frequencies.	42
19. Blood supply of the parathyroid glands viewed from behind.	44
20. Section of the human parathyroid gland.	45
21. Calcium balance in an adult human.	48
22. Overall calcium metabolism in a normal individual.	49
23. The structure of the human parathyroid hormone.	59
24. The physiologic action of parathyroid hormone.	62
25. The structure of human calcitonin.	65
26. Parafollicular cells in the thyroid gland.	66
27. Formation and hydroxylation of vitamin D <sub>3</sub> .	69
28. The feed back control of the formation of 1,25-dihydroxycholecalciferol.	70
29. Position of the hands in hypocalcemic tetany (Carpopedal spasm).	93
30. Serum calcium changes in the three studied groups during follow-up period.	128
31. Serum phosphorus changes in the three studied groups during follow-up period.	134
32. Urinary calcium changes in the three studied groups during follow-up period.	140
33. Urinary phosphorus changes in the three studied groups during follow-up period.	145
34. Urinary calcium: creatinine ratio changes in the three studied groups during follow-up period.	151

## **LIST OF TABLES**

<b>Table</b>	<b>Page</b>
1. Descriptive statistics and analytical comparison between three studied groups regarding serum T3.	116
2. Descriptive statistics and analytical comparison between three studied groups regarding serum T4.	117
3. Descriptive statistics and analytical comparison between three studied groups regarding serum TSH.	118
4. Descriptive statistics and analytical comparison between three studied groups regarding serum ALP.	119
5. Descriptive statistics and analytical comparison between three studied groups regarding serum PTH.	120
6. Descriptive statistics and analytical comparison between three studied groups regarding serum calcitonin.	121
7. Descriptive statistics of the three studied groups regarding serum total proteins and albumin.	122
8. Comparison between the three studied groups regarding serum total proteins.	124
9. Comparison between the three studied groups regarding serum albumin.	125
10. Comparison between consecutive days in the three studied groups regarding serum total proteins.	126
11. Comparison between consecutive days in the three studied groups regarding serum albumin.	126
12. Descriptive statistics of the three studied groups regarding serum calcium.	127
13. Comparison between the three studied groups regarding serum calcium.	129

14. Comparison between consecutive days in the three studied groups regarding serum calcium	131
15. Descriptive statistics of the three studied groups regarding serum phosphorus	133
16. Comparison between the three studied groups regarding serum phosphorus	135
17. Comparison between consecutive days in the three studied groups regarding serum phosphorus	137
18. Descriptive statistics of the three studied groups regarding urinary calcium	139
19. Comparison between the three studied groups regarding urinary calcium	141
20. Comparison between consecutive days in the three studied groups regarding urinary calcium	142
21. Descriptive statistics of the three studied groups regarding urinary phosphorus	144
22. Comparison between the three studied groups regarding urinary phosphorus	146
23. Comparison between consecutive days in the three studied groups regarding urinary phosphorus	148
24. Descriptive statistics of the three studied groups regarding urinary calcium:creatinine ratio	150
25. Comparison between the three studied groups regarding urinary calcium:creatinine ratio	152
26. Comparison between consecutive days in the three studied groups regarding urinary calcium:creatinine ratio.	153
