**EVALUATION OF INTRAOPERATIVE SELECTIVE
LEFT GASTRIC VEIN INJECTION SCLEROTHERAPY
WITH SPLENECTOMY AND DEVASCULARIZATION
IN PATIENTS WITH PORTAL HYPERTENSION**

Thesis

Submitted for Partial Fulfillment for the M.D. Degree
in General Surgery

Presented By

68844

Amr Kamel El-Feky

M.B., B.Ch. & M.Sc. in General Surgery

Under Supervision of

Prof. Dr. Sayed Abdel Motty El-Maharakawy

Professor of General Surgery
Faculty of Medicine, Ain Shams University

2002

LIST OF FIGURES

Fig. No.	Title	Page
1	Portal circulation and portosystemic connections .	7
1	Diagrammatic representation of the venous drainage of the esophagus in normal man	15
2	Diagram show DSRS with SPD	41
3	Diagrammatic representation of decongestion ..	44
4	Diagram show the cumulative bleeding rates in cases of selective shunt (left) and non shunting operation (right)	47
5	Diagram shows esophageal varices injected with lipidol through left gastric vein intraoperatively	54
6	Shows the distribution of males and females included in the study	58
7	Reveal the incidence of previous attacks of bleeding	59
8	Preoperative endoscopic evaluation according to patient's grading	62
9	Comparison between pre and postoperative biochemical evaluation	66
10	Comparison between pre and postoperative biochemical evaluation	66
11	Comparison between pre and postoperative biochemical evaluation	67
12	Comparison between pre and postoperative biochemical evaluation	67
13	Grading of varices postoperatively of the all 20 patients	68

LIST OF TABLES

Table No.	Title	Page
1	Clinical classification of cirrhotic patient according to Child's classification	26
2	Show the clinical data of the patients included in the study	60
3	Shows the results of preoperative biochemical evaluation	61
4	Results of postoperative biochemical evaluation	64
5	Comparison between pre and postoperative biochemical evaluation with its significant changes	65
6	Comparison between non selective shunt, selective shunt, splenectomy and devascularization and splenectomy devascularization with intraoperative injection sclerotherapy as regards rebleeding and encephalopathy	69

LIST OF ABBREVIATIONS

TIPS	: Transjugular intrahepatic portosystemic shunt.
HVPG	: Hepatovenous pressure gradient.
PTFE	: Polytetrafluoroethylene.
DSRS	: Distal spleno-renal shunt.
SPD	: Spleno-pancreatic disconnection.
GEDS	: Gastroesophageal devascularization and splenectomy.
S and GD	: Splenectomy and gastroesophageal devascularization.
PHVG	: Portohepatic venous gradient.
SGOT	: Serum glutamic oxalo-acetic transaminase.
SGPT	: Serum glutamic pyruvic transaminase.

CONTENTS

Subjects	Page
* Introduction & Aim of The Work	1
* Review of Literature	3-49
- Anatomy of Portal Circulation	3
- Pathophysiology of Portal hypertension	16
- Investigations of a Case of Portal Hypertension ..	22
- Treatment Modalities	30
* Patients and Methods	50
* Results	58
* Discussion	70
* Conclusion	73
* Summary	77
* References	78
* Arabic Summary.
