Acknowledgments

To *Prof. Dr. M. Monir El-Saegh*: I will always remember your willingness to help me. I wanted personally to let you know how gratifying it was to receive your kind support and encouragement. Please accept my sincere thanks.

To *Prof. Dr. Ibrahim Abdel Nabi*: I deeply appreciate your endorsement. Thanks for your thoughtfulness.

To *Assist. Prof. Dr. Khaled Mansour*: you have a way of explaining things that is easy for me to understand. Not everyone has such a gift. Please accept my sincere gratitude.

List of abbreviations:

AMI	Acute myocardial infarction
CCU	Coronary care unit
CHD	Coronary heart disease
CI	Cardiac index
CR	Cardiac rupture
CVD	Cardiovascular disease
ECG	Electrocardiography
ECMO	Extra-corporeal membrane oxygenation
ED	End diastole
EDRF	Endothelium-derived relaxing factor
EF	Ejection fraction
ES	End systole
HDL	High-density-lipoprotein
IABP	Intra-aortic balloon pump
IHD	Ischemic heart disease
IMR	Ischemic mitral regurgitation
IVC	Isovolemic contraction
IVR	Isovolemic relaxation
LA	Left atrium
LAD	Left anterior descending artery
LCX	Circumflex artery
LDL	Low-density-lipoprotein
LIMA	Left internal mammary artery
LV	Left ventricle
LVA	Left ventricular aneurysm
LVPA	Left ventricular pseudoaneurysm
PCWP	Pulmonary capillary wedge pressure
RCA	Right coronary artery
TEE	Trans-esophageal echocardiography
VSD	Ventricular septal defect
VSR	Ventricular septal rupture

Contents

Introduction	1-4
Anatomy of coronary arteries	5-12
Physiology of coronary circulation	13-15
Pathophysiology of ischemic heart disease	16-25
Complications of myocardial infarction	26-31
Postinfarction ventricular septal defect	32-65
Postinfarction free wall rupture and pseudoaneurysm	66-82
Postinfarction aneurysm	84-111
Postinfarction mitral regurgitation	112-143
Summary	144-146
References	147-172
