بِسْمِ اللَّهِ الرَّحْمَنِ الرَّحِيمِ

اقْرَأْ

بِسْمِ رَبِّكَ الَّذِي خَلَقَ • خَلَقَ الْإِنْسَانَ مِنْ عَلَقٍ •
اقْرَأْ وَرَبُّكَ الْأَكْرَمُ • الَّذِي عَلَّمَ بِالْقَلَمِ •
عَلَّمَ الْإِنْسَانَ مَا لَمْ يَعْلَمْ •

صَلَّى
الْعَظِيمِ

ACKNOWLEDGEMENT

First of all, I would like to thank God for every thing and especially for my first steady steps I have been taking in my career.

I would like to express my great appreciation to **Prof. Dr. Hussein Mohammad Helmy**, Professor of Otorhinolaryngology, Faculty of medicine-Ain shams university, who honored me by his kind supervision and his great support.

I wish to express my deepest gratitude to **Prof. Dr. Mahmoud Naguib El- Tarabishi**, Professor of Otorhinolaryngology, Faculty of medicine-Ain shams university, for his irreplaceable encouragement, his expertise and his great directions all through the work. He has really eased the way and made the work I enjoy more enjoyable.

I wish to express my deepest gratitude to **Ass. Prof. Dr. Sabry Magdy Sabry**, Assistant Professor of Otorhinolaryngology, Faculty of medicine-Ain shams university, for his keen perceptions in his continuous help and support.

I would like to say "thank you" to all those who supported me, help me with their suggestions and ideas, and made this work possible and enjoyable.

Finally, I thank my mother and father who, throughout my life, have been and still are ever ready to assist me in my various endeavors, for which I am truly grateful.

Amr Nabil Rabie, 2002

CONTENTS

▪ Introduction	I
▪ Approach	7
▪ Cartilage grafts	13
▪ Bone grafts	31
▪ Combined bone and cartilage grafts	41
▪ Soft tissue grafts	51
▪ Alloplastic implants	55
▪ Homologous grafts	67
▪ Summary	73
▪ Conclusion	77
▪ References	79

FIGURES

- | | | |
|------------------|---|----|
| Figure 1 | Hieroglyphic from the Smith Papyrus indicating the reduction and splinting of a nasal fracture | 2 |
| Figure 2 | The frontal view of the ideal face | 5 |
| Figure 3 | Construction of the umbrella graft | 19 |
| Figure 4 | The position of umbrella graft [nasal view] | 20 |
| Figure 5 | Artistic depiction of the removal of the graft from the septum, forming it into a thin shield shape and placing it over the dorsum to form a smooth cap | 22 |
| Figure 6 | Sialstic block is curved until exact shape and size of dorsum augmentation is achieved in the form of a sialstic template | 27 |
| Figure 7 | Available septal cartilage fragments are fitted to template to facilitate carving them into graft component parts | 27 |
| Figure 8 | Carved graft components have mortise/tenon joint surfaces crafted for suturing into unfilled graft | 28 |
| Figure 9 | Unfiled graft with detail of biplanar nature of joint | 29 |
| Figure 10 | Endochondral bone collapses, while membranous bone volume persists | 32 |
| Figure 11 | Basic steps in clavicular bone graft harvest with graft site located in the lower parietal bone | 33 |

List of figures

Figure 12	Donor site of olecranon bone graft	35
Figure 13	Transverse or longitudinal incisions to expose the olecranon.	36
Figure 14	Adjacent musculature stripped subperiosteally to expose the proximal ulna.	37
Figure 15	Oscillating saw used to cut through the proximal ulna	37
Figure 16	Preparation of the bone and cartilage grafts	43
Figure 17	Adaptation and fixation of the graft's block to the nose	43
Figure 18	Harvest of osseocartilaginous segments of ninth and/or tenth rib: combined segment for dorsum and pure cartilage for columella	45
Figure 19	Preparation of bony fixation platform by disarticulating the bony triangle of the radix and by burring down the bony dorsum	46
Figure 20	Graft fixation is by temporary K-wire followed by ultramicroscrews while the columella is sutured to the anterior nasal septum	47
Figure 21	Multiple options for junctioning dorsal and collumellar graft	48
Figure 22	Combined conchal cartilage-Ethmoid bone graft	49
Figure 23	Temporalis fascia graft technique	52
Figure 24	Example of Gore-Tex	62
Figure 25	Instrument for mixing cartilage chips with fibrin glue	65
