بسم الله الرحمن الرحيم

**"قالوا سبحانك لا علم لنا إلا ما علمتنا إنك
أنت العليم الحكيم"**

صدق الله العظيم

سورة البقرة آية (٣٢)

1. The first part of the paper discusses the importance of understanding the underlying mechanisms of the observed phenomena.

2. The second part of the paper presents a detailed analysis of the data collected during the experiment.

3. The third part of the paper discusses the implications of the findings for future research and practice.

4. The fourth part of the paper concludes the study and provides a summary of the key findings.

5. The fifth part of the paper discusses the limitations of the study and suggests areas for further investigation.

6. The sixth part of the paper discusses the ethical considerations of the study and the need for transparency.

7. The seventh part of the paper discusses the potential applications of the findings in various fields.

8. The eighth part of the paper discusses the role of the researcher in the dissemination of knowledge.

9. The ninth part of the paper discusses the importance of collaboration and interdisciplinary research.

10. The tenth part of the paper discusses the future of the field and the challenges ahead.

11. The eleventh part of the paper discusses the need for a more holistic approach to research.

12. The twelfth part of the paper discusses the importance of communication and public engagement.

13. The thirteenth part of the paper discusses the role of the researcher in society.

14. The fourteenth part of the paper discusses the need for a more inclusive and equitable research environment.

15. The fifteenth part of the paper discusses the importance of reflection and self-assessment.

ACKNOWLEDGEMENT

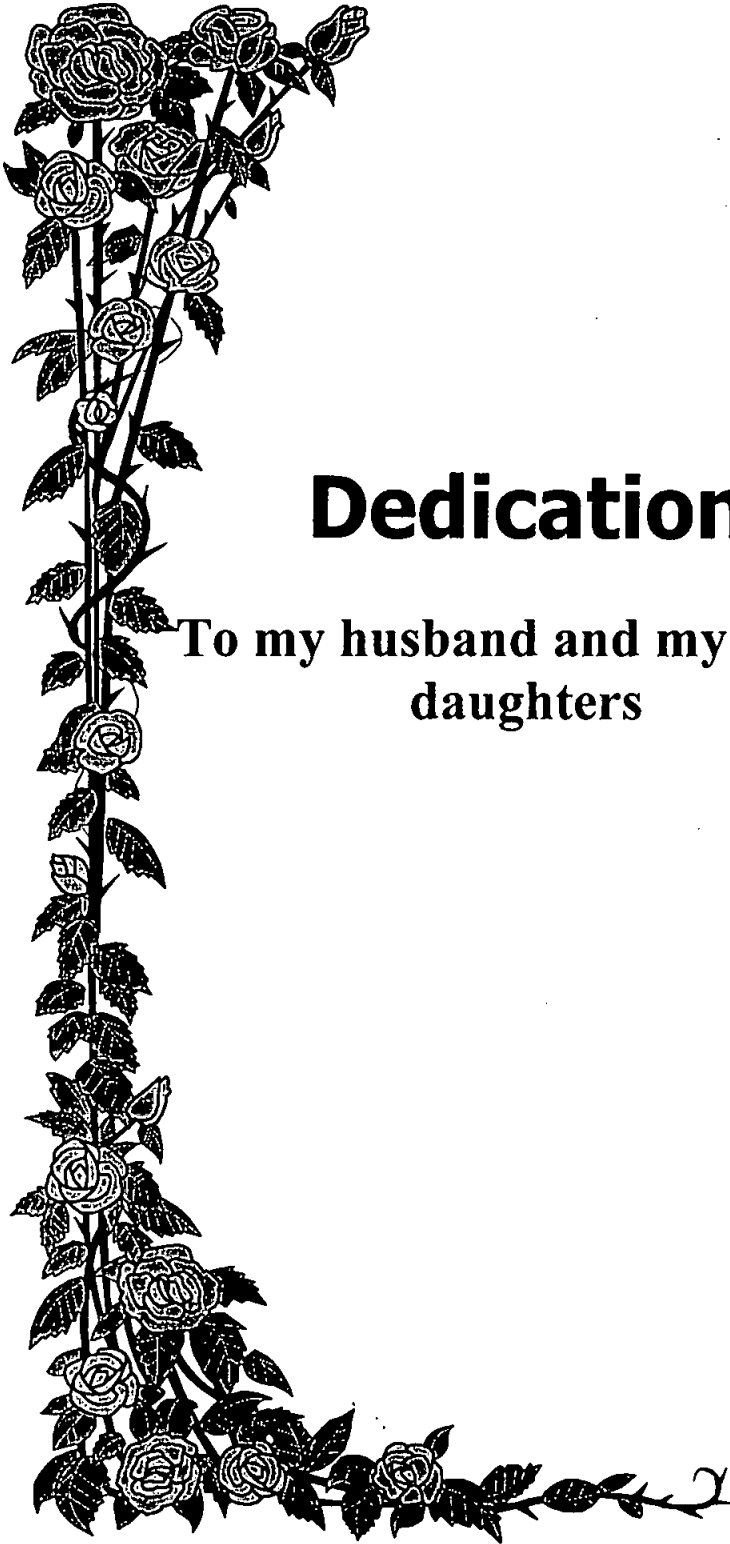

First and foremost, thanks to ALLAH.

It is a pleasure to express my great appreciation to **Prof. Dr. Safaa El-sady**, Professor of Phoniatics, Faculty of Medicine, Ain Shams University, for kind supervision, honest guidance and valuable suggestion during the conduction of this work.

I would like to express my greatest appreciation and thanks to **Dr. Noran Nagdy El- Assal** Assistant Professor of Phoniatics, Faculty of Medicine, Ain Shams University, for express guidance, continuos keen supervision, valuable advice and generous encouragement and support offered to me throughout this work.

I wish to express my deepest thanks to **Dr. Tamer Samir Abou-Elsaad Lecture** of Phoniatics, Faculty of Medicine, El-Mansoura University, for kind supervision sincere guidance and cooperation throughout this work.

I am deeply grateful to my colleagues in the Unit of Phoniatics, Faculty of Medicine, Ain Shams University, for their cooperation and encouragement.

Dedication

**To my husband and my lovely
daughters**

CONTENTS

SUBJECT:	PAGE
INTRODUCTION	1-4
AIM OF THE WORK	5
BRAIN DAMAGE MOTORY HANDICAPPED CHILDREN (BDMH)	6-9
*Definition	6
*Classification	
• Classification according to the character of the disordered movement	
• Classification according to the topography	
• Classification according to the degree of severity	
*Factors incriminated in the causation of the BDMH	8
• Prenatal factors	
• Perinatal factors	
• Postnatal factors	
*Multifaceted nature of the problem of BDMH	9
FEEDING AND SWALLOWING PROBLEMS OF BDMH CHILDREN	10-25
*Factors important for normal oral-motor & swallowing development	10
*Swallowing disorders	15
• Oral phase problems	
• Pharyngeal phase problems	
• Respiratory problems	
• Gastroesophageal reflux	
*Feeding disorders	16
• Movement problems	
• Sensory problems	

*Consequences of feeding and swallowing problems	19
• Prolonged meal times	
• Failure to thrive	
• Pulmonary disease	
*Factors of importance for undernutrition	23

EVALUATION OF SWALLOWING/FEEDING PROBLEMS IN CHILDREN WITH BDMH 26-71

• Elementary diagnostic procedures	27
• Clinical diagnostic aids	48
1-Formal testing for cognitive & perceptual abilities of the child.	
2-Videofluoroscopic (VF) evaluation	
3- Fiberoptic Endoscopic Examination of Swallowing	
4-Ultrasound	
5-Exeter Dysphagia Assessment Technique (EDAT)	
• Additional instrumental measures	70
(1) Pulse Oximetry	
(2) Studies for gastrointestinal status	
(3) Computerized Tomography (CT)and Magnetic Resonance Imaging (MRI)	

MANAGEMENT OF THE FEEDING AND SWALLOWING PROBLEMS IN BDMH CHILDREN 72-130

• Behavioral Re-Adjustment Therapy	73
• Medical and surgical management	113
• Alternative routes of aligmentation	115
• Management of Drooling	118
• Management of Gastroesophageal reflux	124
