ANALYSIS OF THE PERIOPERATIVE RISK FACTORS IN THE REPAIR OF ACUTE TYPE A AORTIC DISSECTION

Submitted for partial fulfillment of the M.D. degree in cardiothoracic surgery by

Saeed Mohamed Refaat ELAssy
(M.B.B.CH, MS)

Under supervision of

Prof. Ali Seif Eldin Maklad, MD

Professor and Head of cardiothoracic surgery department
Ain shams university

Prof. Ahmed Bahig El Kerdany MD

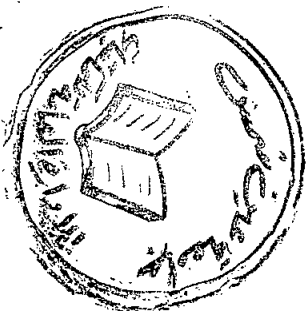

Professor of cardiothoracic surgery
Ain shams university

Assistant Prof. Hossam Ezzat ElOkda MD

Assistant professor of cardiothoracic surgery
Ain shams university

Dr. Hesham Abd El Rahman, MD

Lecturer of cardiothoracic surgery
Ain shams university

Ain Shams university

ACKNOWLEDGMENTS

I would like to express my deepest appreciation and gratitude to Prof. Dr. Ali Sief ElDin Maklad, Professor and head of Cardiothoracic Surgery department, Ain Shams University for his guidance, precious advises and continuous encouragement he devoted in performing this work.

I would also like to express my sincere thankfulness and admiration to Dr. Ahmed El-Kerdany, Prof. of Cardiothoracic surgery, Ain Shams University for his valuable time, generous effort and continuous supervision throughout this work.

My Faithful and truly honest respect is also expressed to Dr. Hossam Ezzat ElOkda MD, Assistant professor of cardiothoracic surgery, Ain Shams University for his precious help, constant assurance and regular support during this work.

I would also like to express my deepest thankfulness Dr. Hesham Abdel-Rahman, Lecturer of Cardiothoracic Surgery, Ain Shams University for his patience during writing of this paper.

My appreciation goes to all the surgeons in Texas Heart Institute in Houston, USA for the wonderful experience of working with them and collecting the material for this thesis.

Saeed M.R. Elassy
