ACKNOWLEDGEMENT

Thanks first and last to God as we owe him for his great care, support and guidance in every step in our life and thanks to my family.

I would like to express my profound gratitude and appreciation to Prof. Dr. Emad El-Din Hussein for his moral support, valuable supervision and for enabling me to fulfill this work.

Indeed. words do fail me when I come to express my sincere, appreciation and gratitude to Prof. Dr. Sherif Mohamed Sholkamy for his honest effort and help. I wish to thank him for his valuable time and for his patience.

I wish also to thank Dr. Ahmed Hamdy Ali Moussa for the great help and supportive effort, he did to produce this work. He had been kind and generous to me.

**Thanks.
Mohamed**

List of Figures

<i>Fig. No.</i>	<i>Title</i>	<i>Page</i>
1	Description of venous valves.	6
2	Anatomy of the venous system.	7
3	Early prototype of the balloon-expandable stent.	36
4	Time sequence of the events that take place after stent placement.	41
5	Eight weeks after stent placement. Six years after stent placement.	45
6	Neointimal thickness over the stent during follow-up.	46
7	Various types of GRZ stents.	59
8	The use of GRZ stent in TIPSS.	61
9	Deployment of the Wallstent.	65
10	Current Palmaz stent design.	71
11	The medium Spiral Stent.	72
12	Use of thrombolysis to uncover a malignant lesion of the superior vena cava, with the Gianturco Z-stent.	77
13	Wallstents used in the treatment of malignant obstruction of the superior vena cava and innominate veins.	78
14	Palmaz stent used for the treatment of focal superior vena cava stenosis.	79
15	Progression of benign superior vena cava stenosis after stenting.	85
16	The use of stent in malignant SVCO.	86

17	The use of stent in Klippel-Trenaunay syndrome.	92, 93
18	The use of stent in central venous stenosis (subclavian stenosis) in hemodialysis patients.	97
19	Primary and secondary patency of central venous stents in hemodialysis patients.	98
20	The use of stent in fresh central venous thrombosis.	102
21	The use of stent in thrombosed arterio-venous fistula.	103
22	The use of stent in treatment of acute iliofemoral DVT.	108
23	The use of stent in treatment of May-Thurner syndrome.	110
24	Graphic illustration demonstrating a stented channel connecting right hepatic vein and right portal vein in TIPPS operation.	117
25	Portal venography following TIPPS.	118
26	Technical steps in the deployment of the Palmaz balloon expandable stent.	123
27	Dual venous access in high-grade stenosis SVCO.	128
28	A balloon-expandable stent within the parenchymal needle track in TIPPS operation.	135
29	After balloon deflation and withdrawal, flow is established through the shunt in TIPPS operation.	135
30	Retrieval of a migrated stent from the pulmonary artery.	143
