ACKNOWLEDGEMENT

The writer wishes to express his deepest gratitude to his advisory committee Dr. A.F. Omran, Dr. R.M. Khalil, Dr. R.A. Gawish Professors of Vegetable Crops, Department of Horticulture, Faculty of Agriculture, Menufiya University and Dr. Kh.A. Okasha, Prof. of Vegetable Crops, Faculty of Agriculture, Ain Shams University for their suggesting the problem, Supervision, continuous interest and valuable advices, criticism and guidance throughout the course of this study and for their great help in preparing and revising the manuscript.

The author also wishes to express his thanks to Dr. El-Mahdy I. Metwally, Prof. of Vegetable Crops, Faculty of Agriculture, Kafr El-Sheikh, Tanta University and Dr. A.M. Konsoua, Researcher of Vegetable Crops, Sakha Research Centre for their valuable help and critical revising of this manuscript.

Thanks are also extended to all staff members of Horticulture Department, Faculty of Agriculture, Menufiya University especially Prof. Dr. Abd El-Razik A. Midan, Prof. Dr. M. Malash, Prof. Dr. Fotooh Abou El-Yazid and Prof. Dr. Mohamed A. Faïhallah for their sincere encouragement.

Thanks are also due to Staff members of Department of Horticulture, Agric. Res. Station, Sakha, for their guidance and help.

Special thanks to my family, my father, my mother, my wife and my daughters Alaa and Esraa.

CONTENTS

	Page
I. INTRODUCTION	1
II. REVIEW OF LITERATURE	3
1. Vegetative growth characters	3
1.1. Number of branches/plant	3
1.2. Stem length	4
1.3. Stem colour	5
1.4. Leaf shape	6
1.5. Number of leaves/plant	6
1.6. 5 th leaf area	7
1.7. Foliage fresh and dry weight/plant	8
2. Total root yield and its components	10
2.1. Total root yield	10
2.2. Number of tuber roots/plant	14
3. Tuber root characteristics	15
3.1. Average tuber root weight	15
3.2. Tuber root shape index	16
3.3. Skin and flesh colour of tuber roots	17
3.4. Starch content	19
III. MATERIALS AND METHODS	22
IV. RESULTS AND DISCUSSIONS	27
A. Evaluation of some new bred sweet potato lines	27
1. Foliage characteristics	27
1.1. Number of branches per plant	27
1.2. Stem length	32
1.3. Stem colour	34
1.4. Leaf shape	34
1.5. No. of leaves/plant	37
1.6. 5 th Leaf area (cm ²)	41
1.7. Fresh foliage weight	43

1.8. Dry matter percentage (%).....	47
2. Yield and its components.....	49
2.1. Total yield/plant.....	49
2.2. Number of tuber roots/plant.....	54
2.3. Average tuber root weight	56
3. Tuber root characteristics.....	58
3.1. Skin colour	58
3.2. Flesh colour.....	58
3.3. Tuber root shape.....	61
3.4. Starch content.....	61
B. Behavior of some F ₁ crosses and their parental lines	66
1. Vegetative characters	66
1.1. Number of branches per plant.....	66
1.2. Stem length.....	70
1.3. Number of leaves	72
1.4. 5 th Leaf area cm ²	72
1.5. Fresh foliage weight/plant	77
1.6. Dry matter percentage	81
2. Yield and its components.....	83
2.1. Total tuber yield/plant.....	83
2.2. Number of tuber roots/plant.....	87
2.3. Average tuber root weight	89
3. Tuber root characters	92
3.1. Skin colour	92
3.2. Flesh colour.....	92
3.3. Tuber root shape.....	95
3.4. Starch content.....	95
C. Average degree of heterosis.....	100
1. Vegetative characteristics	100
1.1. Number of branches/plant.....	100
1.2. Stem length (cm ²).....	100
