Acknowledgment

I would like to express my thanks and feelings of gratitude to Professor Dr. Samir El-Molla, Professor of Neurosurgery, Ain Shams University, for suggesting the topic of this thesis and his kind support, tremendous understanding, kind heartedness, inspiring guidance and valuable supervision. To whom I am deeply indebted for encouraging me to develop this subject and words could never be enough to say thank you.

My deep sincere thanks and appreciation goes to Professor Dr. Alaa El-Din Abdel Hay, Professor of Neurosurgery and Head of Department of Neurosurgery, Ain Shams University, for his constructive ideas, valuable comments, intensive effort, and guidance. I remain inspired by his thoughts and valuable advice, without which this thesis would have never seen the light.

I'm profoundly grateful to Professor Dr. Hossam El-Husseiny, Professor of Neurosurgery, Ain Shams University, for his great help and assistance, valuable time he's given me, his understanding and endless support and encouragement.

I would like to express my thanks to, Professor Dr. Charles Dean Ray, Professor of Neurosurgery, Virginia, USA, for sparing lots of precious time and effort to initiate this study and technical support.

I cannot also fail to forget the kind, great help and valuable cooperation of my senior and junior colleagues in the Neurosurgery Department of Ain Shams University.

Last but not least, I would like to express my love and sincere appreciation to my wife, my family and friends for their unfailing support and endurance through this work.
