The effects of normal-sized particles versus nano-sized particles of Epigallocatechin Gallate (green tea extract) on buccal mucosa of Albino rats exposed to 5-fluorouracil

Thesis

Submitted to the Faculty of Oral & Dental Medicine,
Ain Shams University in Partial Fulfillment of the
Requirements for the Doctor Degree of Oral Biology.

Acknowledgment

First of all, thanks GOD the merciful, the beneficent for helping me during this work.

*There are no words capable of expressing my gratitude & appreciation to **Prof. Dr. Souzi Farid Shinaishin**, Professor of Oral Biology, Faculty of Oral and Dental Medicine, Ain Shams University, for resolving the most difficult obstacles I met throughout this work. I shall never forget her wise guidance, continuous encouragement, close supervision and most valuable advice.*

*I would like to express my sincere gratitude to my supervisor **Ass. Prof. Dr. Dalia Ghazi**, Associate Professor of Oral Biology, Faculty of Oral and Dental Medicine, Ain Shams University, for her valuable instructions, endless patience that*

made her meticulously revise this work word by word and assistance in various processes of putting this study in its final form.

I would like to express my appreciation and gratitude to all staff member of Oral Biology Department, Faculty of Oral and Dental Medicine, in both Ain Shams and Assiut Universities, for their help and facilities they offered during the course of study.

Dedication

To my lovely father & forgiven soul of my mother whom I can't find adequate words to express my gratitude or be able ever to repay them for their patience and kindness toward me.

To my wife who without her love and continuous support, none of this work would have been accomplished.
