Acknowledgment

In the name of God, most Gracious, most merciful.

I would like to express my sincere gratitude and deepest thanks to Dr. Mohsen Hussein Abi Elhassan, Assistant Professor of Operative Dentistry, Faculty of Oral and Dental Medicine, Cairo University, for his end less help, generous effort, continuous encouragement, valuable supervision and advice without which this work could have never come into existence.

My deepest thanks and sincere respect and appreciation to Dr. Mostafa Abd-Al Hamed Mostafa, Assistant Professor of Operative Dentistry, Faculty of Oral and Dental Medicine, Cairo University, for his kind help, constructive guidance, and facilities given for carrying out this work.

Great thanks to my family for their patience and support.

Table 1 : Variables of the study	43
Table 2 : Interaction of variables	44
Table 3 : Prevalence of occlusal leakage scores in non-based and based specimens of different materials after one day	52
Table 4 : Prevalence of gingival leakage scores in non-based and based specimens of different materials after one day	52
Table 5 : Prevalence of occlusal leakage scores in non-based and based specimens of different materials after three months	56
Table 6 : Prevalence of gingival leakage scores in non-based and based specimens of different materials after three months	56
Table 7 : Prevalence of occlusal leakage scores in non-based and based specimens of different materials after six months	58
Table 8 : Prevalence of gingival leakage scores in non-based and based specimens of different materials after six months	58
Table 9 : Prevalence of occlusal leakage scores at different time intervals period in non-based specimens of different materials	61
Table 10 : Prevalence of gingival leakage scores at different time intervals period in non-based specimens of different materials	61
Table 11 : Prevalence of occlusal leakage scores at different time intervals period in based specimens of different materials	66
