Acknowledgement

The writer is deeply indebted to Prof. Dr. Mohamad Habib, professor of Dermatology, Andrology and STDs, Ain Shams University under whose direction this thesis has been undertaken, for his cooperative interest, encouragement and support during the preparation of this dissertation.

The writer also acknowledges the constructive and instructive comments and valuable suggestions of Prof. Dr. Mohamad Ghozzi, professor of Dermatology, Andrology and STDs, Ain Shams University. He gave a lot of his precious time following every step in the work.

The writer acknowledges the scientific, objective as well as the fatherly attitudes of his supervisors towards their students, which made him accomplish his work in a friendly atmosphere.

Sincere appreciation is due to the members of the Allergy Unit, Department of General Medicine, Ain Shams University for referring cases pertinent to the subject of work.

The cooperation of the staff members and colleagues at the Department of Dermatology, Andrology and STDs, Ain Shams university have helped finishing the present work and author extends his thanks to all of them.

Last but not least, the author is deeply indebted to his wife, parents, sister and brother for their unlimited loving support.

Dedication

This work is dedicated to my father

Table of Contents

Introduction	1
Aim of the work	6
1.0.0. Clinical aspects of urticaria	7
1.1.0. Definition	7
1.2.0. Clinical picture	7
1.3.0 classification	13
1.4.0. Differential diagnosis	14
1.5.0. Epidemiology of urticaria	16
1.6.0. Natural history of urticaria	19
2.0.0. Pathogenesis of ordinary urticaria	21
2.1.0. Overview	21
2.2.0. The mast cell	25

2.3.0. Mast cell mediators	52
3.0.0. Studies on chronic urticaria	62
3.1.0. Tissue histamine in chronic urticaria	62
3.2.0. Histamine metabolism in CU	64
3.3.0. Mast cell number in CU	64
3.4.0. Mast cell releasability in urticaria	67
3.5.0. Leukotrienes	71
3.6.0. Adhesion molecules	72
3.7.0. Platelet activating factor	73
3.8.0. Histopathology of urticaria	74
4.0.0. Searching for a cause of urticaria	91
4.1.0. Food induced urticaria	91

4.2.0 Drug induced urticaria	105
4.3.0. Infections and urticaria	111
4.4.0. Aeroallergens-induced urticaria	125
4.5.0. Internal diseases and urticaria	128
5.0.0. Chronic autoimmune urticaria	142
5.1.0. How the idea was born	143
5.2.0. Detection of Anti-IgE autoantibodies as a cause	144
5.3.0. Detection of anti-Fcε RIα autoantibodies as a cause	146
5.4.0. Detection of Mast cell specific factor as a cause	148
5.5.0. Relations of anti-IgE and anti-Fcε RIα autoantibodies to pathogenesis of CU and disease activity	151
5.6.0. Characteristics of patients with anti-Fcε RIα autoantibodies or anti-IgE autoantibodies in serum	159

5.7.0.Mechanism of mast cell degranulation by anti-Fcε RIα autoantibodies and anti-IgE autoantibodies	161
6.0.0. Management of urticaria	169
6.1.0. Evaluation of patients with CU	169
6.2.0 Anti-histaminic drugs	177
6.3.0. Corticosteroids in chronic urticaria	204
6.4.0. Beta-adrenergic agents	206
6.5.0. Other drugs used in urticaria	207
6.6.0. Specific therapies for CAU	214
