# **A COMPARISON BETWEEN CONSTRUCTION SYSTEMS FOR RESIDENTIAL BUILDINGS**

By

**Eng. Sameh Yakoup Sabry Rizk Allah**

A Thesis Submitted to the  
Faculty of Engineering at Cairo University

In partial fulfillment of the  
Requirements for the Degree of  
Master of Science

In  
Structural Engineering

Under the Supervision of

  
**Dr. MOHEEB EL- SAID**

Prof., of Construction Eng. And  
Management,  
Faculty of Engineering,  
Cairo University

  
**Dr. MOHAMED EL- ZANATY**

Prof. Concrete Structural  
Engineering Dept.,  
Faculty of Engineering,  
Cairo University

**Dr. MAHMOUD ABD EL-SALAM**

Dr. structural Engineering Dept.  
Faculty of Engineering,  
Cairo University

**FACULTY OF ENGINEERING, CAIRO UNIVERSITY**

**GIZA, EGYPT**

**February 1999**

LIST OF TABLES	vii
LIST OF FIGURES	ix
ACKNOWLEDGMENTS	xi
ABSTRACT	xii
<b>1 CHAPTER 1 INTRODUCTION</b>	<b>1</b>
1.1 Introduction	1
1.2 Objectives	2
1.3 Scope of study	2
1.4 General assumptions	2
1.5 Thesis Outlines	3
<b>2 CHAPTER 2 LITERATURE REVIEW AND THE STUDY</b>	
ASSUMPTIONS	4
2.1 Introduction	4
2.2 Literature Review	4
2.3 Method of study	9
2.3.1 Methods of Construction	11
2.3.1.1 Conventional Method Using Traditional Formwork	11
2.3.1.2 Conventional Method Using Early Striking Formwork	11
2.3.1.3 Lift Slab Method	11
2.3.1.4 Bearing Walls Method	12
2.3.2 Comparison Criteria	12
2.3.2.1 Duration of Construction	12
2.3.2.2 Direct Costs	12
2.3.2.3 The Labor Requirements	12
2.3.2.4 Other Considerations	13

2.4	Summary	13
3	<b>CHAPTER 3 DESCRIPTION OF CONSTRUCTION METHODS USED</b>	14
3.1	Introduction	14
3.2	Conventional Method Using Traditional Wooden Formwork	14
3.2.1	The Advantages of Conventional Method	16
3.2.2	Disadvantages of Conventional Method	16
3.2.3	Construction Sequence of Conventional	16
3.2.4	Principles of Structural Design Used For Conventional Method	17
3.3	Conventional Method Using Early Striking Formwork	18
3.3.1	The Advantages of Early Striking Formwork	20
3.3.2	The Disadvantages of Early Striking Formwork	20
3.3.3	Construction Sequence of Early Striking Formwork	20
3.3.4	Principles of Structural Design Used For Early Striking Formwork	21
3.4	Lift Slab Method	22
3.4.1	The Advantages of Lift Slab Method	22
3.4.2	The Disadvantages of Lift Slab Method	22
3.4.3	Construction Sequence of Lift Slab Method	23
3.4.4	Special Requirements	25
3.4.5	Slab To Column Connection	25
3.4.6	Equipments	27
3.4.7	Principles of Structural Design Used For Lift Slab Method	28
3.5	Bearing Walls Method	29
3.5.1	The Advantages of Bearing Walls Method	29
3.5.2	The Disadvantages of Bearing Walls Method	29
3.5.3	Construction Sequence of Bearing Walls Method	30
3.5.4	Principals of Structural Design Used For Bearing Walls Method	31
3.6	Summary	32
4	<b>CHAPTER 4 ANALYSIS OF THE RESULTS</b>	33

4.1	Introduction	33
4.2	The Construction Durations For Each Alternatives	33
4.3	Effect of Construction Methods on Duration	34
4.4	The Effect of Construction Methods on Direct Cost	42
4.5	The Effect of Construction Methods on Labor Requirements	51
4.6	Other Considerations	65
4.6.1	The Effect of Construction Methods on Cash Flow	65
4.6.2	The Effect of Construction Method on Management Convenience	66
4.6.3	The Effect of Construction Method on Quality Of The Product	66
4.6.4	The Effect of Construction Method on Flexibility of Use	67
4.7	The comparison between the four methods	67
4.8	Summary	74
<b>5</b>	<b>CHAPTER 5 SUMMARY AND CONCLUSION</b>	<b>75</b>
5.1	Summary	75
5.2	Conclusion	75
5.3	Recommendations	76
	<b>REFERENCES</b>	<b>78</b>
	<b>APPENDIX A: Table of Alternatives' Schedule</b>	<b>79</b>
	<b>APPENDIX B: Tables of Direct Costs of Alternatives</b>	<b>95</b>

## LIST OF TABLES

	Page
Table 2.1 Types of foundations of each method	9
Table 4.1 Durations of elements' construction of model 1.	36
Table 4.2 Durations of elements' construction of model 2.	38
Table 4.3 Durations of elements' construction of model 3.	40
Table 4.4 Direct costs of different alternatives of model 1.	44
Table 4.5 Direct costs of different alternatives of model 2.	46
Table 4.6 Direct costs of different alternatives of model 3.	48
Table 4.7 Direct items' costs of model 1.	52
Table 4.8 Direct items' costs of model 2.	54
Table 4.9 Direct items' costs of model 3.	56
Table 4.10 Different cumulative labor - days requirements of model 1.	59
Table 4.11 Different cumulative labor - days requirements of model 2.	61
Table 4.12 Different cumulative labor - days requirements of model 3.	63
Table 4.13 Factors affecting selection the method of construction.	69

## LIST OF FIGURES

	Page
Figure 2.1    Typical floor plan of span 3.6 m.	10
Figure 3.1    The formwork of a column in conventional method.	15
Figure 3.2    Conventional slab formwork.	15
Figure 3.3    Early striking panel system.	18
Figure 3.4    Drophead of 2 sides.	19
Figure 3.5    Early striking decking beam.	19
Figure 3.6    Drophead of 4 sides	20
Figure 3.7    Cross section in pocket of column.	23
Figure 3.8    Insert of the column.	24
Figure 3.9    Collar of the slab.	24
Figure 3.10   Program of slabs' lifting for a building five stories.	26
Figure 3.11   Typical cross section of connection between column and slab.	27
Figure 3.12   Pre- cast slab and cast on site slab.	30
Figure 3.13   Cross section of pre- cast plat.	31
Figure 3.14   Cross section on reinforced wall.	32
Figure 4.1    Durations of elements' construction of model 1.	37
Figure 4.2    Durations of elements' construction of model 2.	39
Figure 4.3    Durations of elements' construction of model 3.	41
Figure 4.4    Direct costs of different alternatives of model 1.	45

Figure 4.5	Direct costs of different alternatives of model 2.	47
Figure 4.6	Direct costs of different alternatives of model 3.	49
Figure 4.7	Direct items' costs of model 1.	53
Figure 4.8	Direct items' costs of model 2.	55
Figure 4.9	Direct items' costs of model 3.	57
Figure 4.10	Different cumulative labor - days requirements of model 1.	60
Figure 4.11	Different cumulative labor - days requirements of model 2.	62
Figure 4.12	Different cumulative labor - days requirements of model 3.	64
