Acknowledgment

First of all, I'd like to thank Allah who have given the power and support to complete that work.

It is with the deepest gratitude that I wish to express my appreciation for the persistent and unfailing efforts and sincere and inestimable guidance of Prof.Dr.M. NABIL KHALIFA, Prof.and head of Orthop.Surg.Department, Ain Shams University.He has been kind enough to spare no effort and no time to orient, to advise, to supervise, to teach and to give willingly and lavishly from his inexhaustible treasures of knowledge.

I can also deeply conscious of the help and support continually and most generously offered by Pro.Dr.NASSER ZAHER, Prof.of Orthop.Surg.Department, Ain Shams University.

Thanks are also to Dr.Salah Abou-Sief, Ass.Prof.of Orthop.Surg.Ain Shams University, he is always inclined to give teaching, encouraging and inspiring his valuable directions to complete my research until it came to light.

Samy Ibrahim Mossa

Fig.(1).

The typical appearance of a child with congenital tibial deficiency. There is flexion contracture of the knee and medial deviation of a deformed foot. The distal fibula is prominent.

(Kalamchi and Dawe, 1985.)
