NEW ELECTROCARDIOGRAPHIC CRITERIAE FOR PREDICTING THE CULPRIT CORONARY ARTERY IN INFERIOR WALL ACUTE MYOCARDIAL INFARCTION

THESIS

*Submitted for Partial Fulfillment for Master
Degree in "Cardiology"*

By

Osama Lewis Ibrahim

Under Supervision of:

Prof. **SAID KHALED**

*Professor of Cardiology
Ain Shams University*

Dr. **MAGDI AHMED GHAREEB**

*Ass. Professor of Cardiology
Ain Shams University*

Dr. **AMR ADEL**

*Lecturer of Cardiology
Ain Shams University*

**FACULTY OF MEDICINE
AIN SHAMS UNIVERSITY
2000**

ACKNOWLEDGEMENT

*First and foremost thanks to **GOD** the most
kind and merciful*

*With great pleasure, I am honoured to express my deepest gratitude and thanks to my Prof. Dr. **Said Khaled**, Professor of Cardiology, Faculty of Medicine, Ain Shams University for his kind supervision, active support, continuous encouragement, unlimited help, for his helpful guidance and suggestion and for the time effort he devoted for supervision of this work.*

*I was fortunate enough to gain help of Dr. **Magdi Ahmed Ghareeb**, Assistant Professor of Cardiology, Faculty of Medicine, Ain Shams University being thankful for him for the sustained interest, honest assistance and cooperation he offered throughout the study.*

*I wish also to express my great thanks to Dr. **Amr Adel**, Lecturer of Cardiology, Faculty of Medicine, Ain Shams University for his faithful support, cooperation and patience with every step in my work.*

*I am deeply indebted to Prof. Dr. **Diaa El-Din Abu-Shoka**, Consultant of Cardiology and Manager of National Heart Institute and to Prof. Dr. **Mohamed Zaki**, Consultant of Cardiology National Heart Institute for their sympathetic attitude and continuous encouragement during the work.*

Introduction and Aim of the Work	1
Review of Literature	3
★ The Basic ECG Manifestations of MI	3
★ ECG criteria for diagnosis of inferior wall AMI	19
★ ST segment depression during inferior wall AMI	26
★ Electrocardiographic complication of inferior wall MI	31
★ ECG criteria as a prediction of left ventricular function in inferior wall AMI	47
★ ECG criteria as a prediction of complication in inferior wall AMI	51
★ ECG criteria as a prediction of mortality	53
★ The correlation between ECG and the site of lesion by coronary angiography	55
Material and Methods	79
Results	84
Discussion	119
Conclusion	126
Recommendation	127

List of Figures

Fig.		Page
(1)	Illustration for the phases of classic pattern of myocardial infarction	5
(2)	Individual components of electrocardiogram	7
(3)	Theoretical representation of transmural infarction with lateral subendocardial extension	16
(4)	Diagrams illustrating various presentations of inferior wall myocardial infarction and its complications	24
(5)	ECG of patient subgroup IIA	94
(6)	RCA lesion	95
(7)	ECG of patient No. (18) subgroup IIB showing absence of criteria A and B in acute inferior MI	96
(8)	Left anterior descending and left circumflex lesion	97
(9)	ECG of acute inferior MI with left anterior hemiblock	98
(10)	Multiple vessels disease	99
(11)	Diagrams illustrating classification of different patients with acute inferior MI	100
(12)	Comparison between the age in both groups	102
(13)	Risk factors for patients groups	104
(14)	Mean pulse rate in both groups	106
(15)	Mean systolic and diastolic blood pressure in both groups	106
(16)	CK peak level in different patients	108
