**STUDY OF MITRAL VALVE RESERVE
CAPACITY IN
PATIENTS WITH MITRAL STENOSIS
(WHETHER DE NOVO OR RESTENOSIS)
BY STRESS ECHOCARDIOGRAPHY**

Thesis

Submitted for the partial fulfillment
of the Master degree in
Cardiology

بِسْمِ اللَّهِ الرَّحْمَنِ الرَّحِيمِ

﴿قَالُوا سُبْحَانَكَ لَا عِلْمَ لَنَا
إِلَّا مَا عَلَّمْتَنَا إِنَّكَ أَنْتَ
الْعَلِيمُ الْحَكِيمُ﴾

صدق الله العظيم
سورة البقرة / الآية ٢٢

Acknowledgement

First of all, Thanks To Allah, most merciful and most generous, who blessed me and gave me the ability and the patience to complete this work.

I wish to express my deepest appreciation and profound gratitude to Dr. Ahmed Nassar, Professor of Cardiology, Faculty of Medicine, Ain Shams University, for his keen and kind supervision and unlimited advice which made me accomplish this work in its present form. He willingly and pleasantly gave me much of his valuable time with continuous support and encouragement.

Also, I would like to extend my thanks and appreciation to Dr. Assem Fathy, Professor of Cardiology, Faculty of Medicine, Ain Shams University, for his sincere advice, kind guidance, and generous help throughout this work.

Specific thanks and deep appreciation to Dr. khaled El Menyawi, Assistant professor of Cardiology, Faculty of Medicine, Ain Shams University, for his valuable suggestions, kind assistance, and remarkable effort.

I do feel deeply indebted to all Professors, Senior Staff, and Colleagues in Department of Cardiology. for the facilities and support they offered.

Heba Tag El-Din

List of Figures.....	V
List of Abbreviations.....	VII
 INTRODUCTION	 1
AIM OF THE STUDY	3
 REVIEW OF LITERATURE	
 1. CHAPTER 1 : MITRAL STENOSIS	
1.1. Definition.....	4
1.2. Etiology.....	4
1.3. Pathology.....	5
1.4. Pathophysiology.....	6
1.5. Clinical findings.....	8
1.5.1. History.....	8
1.5.2. Physical findings.....	9
1.6. Investigations.....	11
1.6.1. Electrocardiogram (ECG).....	11
1.6.2. Radiological findings.....	13
1.6.3. Echocardiography.....	14
1.6.4. Angiography.....	19
1.7. Management.....	22
1.7.1. Prevention.....	22
1.7.2. Medical treatment.....	22
1.7.3. Surgical treatment.....	23
1.7.3.a. Closed mitral valvotomy.....	23
1.7.3.b. Open mitral valvotomy.....	24
1.7.3.c. Mitral valve replacement.....	25
1.7.4. percutaneous balloon mitral valvuloplasty.....	25
1.7.4.a. Indications of BMV.....	25
1.7.4.b. Criteria of patient selection for BMV.....	26
1.7.4.c. Contraindications of BMV.....	27
1.7.4.d. Complications of BMV.....	28
1.8. Mitral restenosis.....	28

2. CHAPTER 2 : STERSS ECHOCARDIOGRAPHY

2.1. Introduction	32
2.2. Types of stress	32
2.2.1. Exercise test.....	32
2.2.2. Pharmacologic stress.....	32
2.2.3. Comparison between pharmacologic stress agents.....	35
2.2.4. Comparison between exercise and dobutamine stress.....	36
2.2.5. Side effects of dobutamine.....	37
2.3. Applications of stress echocardiography	39
2.3.1. Coronary artery disease.....	39
2.3.2. Valvular heart diseases and prosthetic valve function.....	40
2.3.2.a. Aortic stenosis.....	40
2.3.2.b. Mitral stenosis.....	41
2.3.2.c. Mitral regurgitation	41
2.3.2.d. Prosthetic valve function.....	42
2.3.3. Cardiomyopathies	42
2.3.4. Other applications of stress echocardiography.....	43
2.4. Advantages of stress echocardiography.....	43
3. CHAPTER 3 : MITRAL VALVE RESERVE CAPACITY	
3.1. Introduction	44
3.2. Effect of exercise on transmitral gradient and pulmonary artery pressure	45
3.3. Stroke volume response to exercise in patients with MS.....	46
3.4. Usefulness of dobutamine in the assessment of MS severity	48
3.5. Contribution of mitral valve reserve capacity to symptomatic improvement in patients with mitral restenosis after BMV	49
3.6. Exercise Doppler echocardiography as an aid to clinical decision making in mitral valve disease	50
SUBJECTS AND METHODS	52
RESULTS	58
DISCUSSION	88
SUMMARY	99
CONCLUSIONS	103
RECOMMENDATION	105
REFERENCES	106
ARABIC SUMMARY	---

List Of Tables

No.	Title	Page
1	Mitral valve score system	18
2	Distribution of patients of both groups according to NYHA class	59
3	Resting MVA (cm ²) in both groups	60
4	Resting peak PG (mmHg) in both groups	61
5	Resting mean PG (mmHg) in both groups	61
6	Dobutamine dose administrated (µg/kg/min) in both groups	62
7	Resting and stress heart rate (beats/min) in both groups	64
8	Complications of dobutamine stress test in both groups	64
9	MVA (cm ²) before (resting) and at peak stress and relation between them in group I	66
10	MVA (cm ²) before (resting) and at peak stress and relation between them in group II	67
11	Correlation of the change in MVA in group I with the change in MVA in group II at peak stress	68
12	Peak PG (mmHg) before (resting) and at peak stress and relation between them in group I	69
13	Peak PG (mmHg) before (resting) and at peak stress and relation between them in group II	70
14	Correlation of the change in peak PG in group I with the change in peak PG in group II at peak stress	71
15	Mean PG (mmHg) before (resting) and at peak stress and relation between them in group I	72
16	Mean PG (mmHg) before (resting) and at peak stress and relation between them in group II	73
17	Correlation of the change in mean PG in group I with the change in mean PG in group II at peak stress	74
18	The change in MVA (cm ²) with dobutamine stress in patients less and in patients equal or more than 30 years old in both groups	76
19	Mean values of peak PG increment (mmHg) in during-stress dyspnic and non-dyspnic patients in both groups	77
20	Mean values of mean PG increment (mmHg) in during-stress dyspnic and non-dyspnic patients in both groups	78
21	Cumulative data of group I (untreated MS)	86
22	Cumulative data of group II (restenosis)	87
