

Arthroscopic Management of Cam type Femoro-acetabular Impingement

A Thesis

Submitted for Partial Fulfillment of M.D. Degree
in Orthopaedic Surgery

By

Mohamed Amr Hassan Mahmoud Hemida

M.B.B.Ch

M.Sc. of Orthopaedic Surgery- Faculty of Medicine
Ain Shams University

Supervised by

Prof. Dr. Ahmed Mohamed El Saeed

Professor of Orthopaedic Surgery
Faculty of Medicine –Ain Shams University

Dr. Amr Ahmed Abd Elrahman

Assistant Professor of Orthopaedic Surgery
Faculty of Medicine –Ain Shams University

Dr. Ahmed Mostafa Koth

Assistant Professor of Orthopaedic Surgery
Faculty of Medicine –Ain Shams University

Dr. Ahmed Hany Khater

Lecturer of Orthopaedic Surgery
Faculty of Medicine –Ain Shams University

**Faculty of Medicine
Ain Shams University**

2018

أَعُوذُ بِاللَّهِ مِنَ الشَّيْطَانِ الرَّجِيمِ

بِسْمِ اللَّهِ الرَّحْمَنِ الرَّحِيمِ

قَالُوا سُبْحَانَكَ لَا عِلْمَ لَنَا
إِلَّا مَا عَلَّمْتَنَا إِنَّكَ أَنْتَ الْعَلِيمُ الْحَكِيمُ

سُورَةُ النِّعَمَةِ

Acknowledgement

*First of all, I would like to express my deep gratitude to **ALLAH** for his care and generosity throughout my life.*

*I would like to express my sincere appreciation to **Prof. Dr. Ahmed Mohamed El Saeed**, Professor of Orthopaedic Surgery, Faculty of Medicine – Ain Shams University, for his keen supervision, guidance and his overwhelming support that has been of great help throughout this work, I really have the honor to complete this work under his supervision.*

*No words can express my deepest gratitude, thanks and gratefulness to **Dr. Amr Ahmed Abd Elrahman**, Assistant Professor of Orthopaedic Surgery, Faculty of Medicine –Ain Shams University, for his enthusiastic support, continuous encouragement, valuable scientific advices, and great help throughout of the accomplishment of this work, It would be impossible to count all the ways that he has helped me to operate most of cases of this study.*

*I would like to express my deep thanks to **Dr. Ahmed Mostafa Kotb**, Assistant Professor of Orthopaedic Surgery, Faculty of Medicine –Ain Shams University, for his sincere help, encouragement, continuous guidance and valuable advice.*

*I would like also to thank with all appreciation **Dr. Ahmed Hany Khater**, Lecturer of Orthopaedic Surgery, Faculty of Medicine –Ain Shams University, for the efforts and time he has devoted to accomplish this work,*

To my beloved family for all support they have given to me.

Mohamed Amr Hassan Mahmoud Hemida

<i>Subject</i>	<i>Page No.</i>
List of Abbreviations	i
List of Tables.....	iii
List of Figures.....	iv
List of Charts.....	x
List of Cases	xi
Introduction	1
Aim of the Work.....	5
Review of Literature	
Arthroscopic anatomy of Hip joint.....	6
Pathophysiology of Femoro-acetabular Impingement.....	13
Diagnosis.....	23
Surgical technique of Hip Arthroscopy	44
Complications of Hip Arthroscopy	62
Patients and Methods.....	74
Results	87
Case Presentation	98
Discussion	114
Summary and Conclusion	127
References	131
Arabic Summary	—

List of Abbreviations

Abbr.	Full-term
AA	: Alpha Angle
AL	: Anterior Labrum
AOR	: Anterior offset ratio
AP	: Anteroposterior
ASIS	: Anterior superior iliac spine
CT	: Computed Tomography
DVT	: Deep Venous Thrombosis
FABER	: Flexion, Abduction, External Rotation
FADDIR	: Flexion, Adduction, Internal Rotation
FAI	: Femoroacetabular Impingement
FH	: Femoral Head
FN	: Femoral Neck
IFL	: Iliofemoral ligament
IT band	: Iliotibial band
LCP	: Legg-Calve-Perthes
LSF	: Lateral synovial fold
LT	: Ligamentum Teres
mHHs	: Modified Harris Hip Score
MRA	: Magnetic Resonance Arthrography
MRI	: Magnetic Resonance Imaging
MSF	: Medial synovial fold
OA	: Osteoarthritis

PAO	: Periacetabular osteotomies
PFL	: Pubofemoral ligament
SCFE	: Slipped Capital Femoral Epiphysis
TAL	: Transverse Acetabular Ligament
THA	: Total Hip Arthroplasty
THR	: Total Hip Replacement
VAS	: Visual Analogue Scale
ZO	: Zona orbicularis

List of Tables

Table No.	Title	Page No.
Table (1):	Use of Radiographic Imaging to Assess the Proximal Part of the Femur	31
Table (2):	Potential complications that are associated with arthroscopic procedures in and around the hip joint	63
Table (3):	Preoperative patient sheet	75
Table (4):	Modified Harris Hip Score	77
Table (5):	Demographic data distribution of the study group.....	88
Table (6):	Side distribution of the study group	88
Table (7-a):	Preoperative Alpha Angle measurements of the study group.....	90
Table (7-b):	Preoperative Anterior Offset measurements of the study group.....	89
Table (8-a):	Post-operative Alpha Angle measurements of the study group.....	94
Table (8-b):	Post-operative Anterior Offset measurements of the study group.....	93

List of Figures

Figure No.	Title	Page No.
Figure (1):	Arthroscopic view of (a) Cotyloid fossa (b) Acetabulum	7
Figure (2):	Acetabular Fossa	7
Figure (3):	Arthroscopic view of acetabular labrum	8
Figure (4):	Arthroscopic view femoral head with 30-degree arthroscope.	9
Figure (5):	View inferomedially from the anterior portal demonstrates where the inferior aspect of the anterior labrum (L) becomes contiguous with the transverse acetabular ligament (TAL) below the ligamentum teres (LT).	10
Figure (6):	Arthroscopic photo of the peripheral compartment showing the relationship of the zona orbicularis with the iliofemoral ligament (A) and the pubofemoral ligament	11
Figure (7):	Ap view of the hip showing iliofemoral and pubofemoral ligaments. Posterior view of the hip demonstrating ischiofemoral ligament.....	12
Figure (8):	Types of FAI, Cam, Pincer and mixed type	14
Figure (9):	Some causes of Cam type Femoroacetabular Impingement.	16
Figure (10):	AP view of the hip of a 21-year-old male with history of a right SCFE when he was 13 years old and underwent pinning fixation.	18
Figure (11):	C-Sign of Femoro-acetabular Impingement	24
Figure (12):	FADDIR test "Anterior Impingement test"	27

Figure (13):	FABER test "Patrick's test"	29
Figure (14):	Palpation of IT band in lateral position.	30
Figure (15):	Anteroposterior view of pelvis ⁴¹	32
Figure (16):	Frog lateral view.	33
Figure (17):	90° Dunn view.	35
Figure (18):	45° Dunn view.	36
Figure (19):	The false-profile view of the right hip	37
Figure (20):	Radiographs demonstrating a spherical femoral head and a femoral head with a Perthes-like deformity	38
Figure (21):	Alpha angle measurement in frog lateral view	39
Figure (22):	Head neck offset measurement in cross table lateral view.	40
Figure (23):	Three-dimensional CT reconstructions showing various cam-type deformities.	41
Figure (24):	Secondary radiological findings of FAI. A, B) Herniation pit. C) labral tear.....	42
Figure (25):	The operating table setup with a perineal foam post and traction setup.	45
Figure (26):	Room setup in supine position while doing hip arthroscopy	46
Figure (27):	Intraoperative photo showing provisional skin markings for portal placement.	48
Figure (28):	Anatomy of anterior, anterolateral and postero-lateral portal.....	48
Figure (29):	Anterior portal pathway/relationship to lateral femoral cutaneous nerve, femoral nerve, and lateral circumflex femoral artery.	50

Figure (30):	Antero-lateral portal pathway/relationship to superior gluteal nerve.	50
Figure (31):	Posterolateral portal pathway/relationship to the sciatic nerve and superior gluteal nerve.	51
Figure (32):	Anteroposterior (AP) fluoroscopic view of a right hip.	53
Figure (33):	Arthroscopic view of a right hip from the anterolateral portal.....	54
Figure (34):	A capsulotomy is performed by connecting the anterior and anterolateral portals.	54
Figure (35):	(A) Arthroscopic view from the posterolateral portal (B) Demonstrated are the posterior acetabular wall (PW), posterior labrum (PL), and the femoral head (FH).	55
Figure (36):	View inferomedially from the anterior portal demonstrates where the inferior aspect of the anterior labrum (L) becomes contiguous with the transverse acetabular ligament (TAL) below the ligamentum teres (LT).....	57
Figure (37):	(A) The operative area remains covered in sterile drapes while the traction is then released and the hip flexed 45 degrees. (B) Position of the hip without the overlying drape.	58
Figure (38):	(A) Peripheral compartment viewing medially (B) Demonstrated are the femoral neck (FN), medial synovial fold (MSF), and the zona orbicularis (ZO).	59
Figure (39):	Peripheral compartment viewing superiorly	59
Figure (40):	An AP radiograph is unremarkable	61
