BEHAVIOR OF BOTTOM LOADED CONTINUOUS DEEP BEAMS

by

Ashraf Adly Farag

A Thesis Submitted to the Faculty of
Engineering at Cairo University
in Partial Fulfillment of the
Requirements for the Degree of
DOCTOR OF PHILOSOPHY
in
STRUCTURAL ENGINEERING

Under the Supervision of

Prof. Dr. Aly Abd El Rahman Youssef
Structural Department
Faculty of Engineering
Cairo University

Prof. Dr. Abd El Moneim Maamoun Omar
Structural Department
Faculty of Engineering
Tanta University

Dr. Adel Galal El Attar
Associate professor
Structural Department
Faculty of Engineering
Cairo University

Dr. Mashhour Ghoneim Ahmed Ghoneim
Associate professor
Structural Department
Faculty of Engineering
Cairo University

BEHAVIOR OF BOTTOM LOADED CONTINUOUS DEEP BEAMS

by

Ashraf Adly Farag

**A Thesis Submitted to the Faculty of
Engineering at Cairo University
in Partial Fulfillment of the
Requirements for the Degree of
DOCTOR OF PHILOSOPHY
in
STRUCTURAL ENGINEERING**

Approved by the Examining Committee :

Prof. Dr. Aly Abd El-Rahman Youssef , Thesis Main Advisor

Associate prof. Dr. Adel Galal El Attar , Advisor

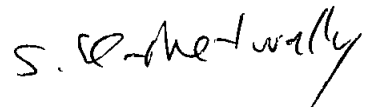

Associate prof. Dr. Mashhour Ghoneim Ahmed Ghoneim , Advisor

Prof. Dr. Ashraf Hassan El-Zanati , Member

Prof. Dr. Salah El-Din El-Said El-Metwally, Member

CONTENTS	iv
LIST OF TABLES	vii
	viii
NOTATIONS	xi
ACKNOWLEDGEMENTS	xiii
	xiv
CHAPTER 1 INTRODUCTION	1
1.1 Introduction	1
1.2 Types of Behavior	1
1.3 Problem Statement	2
1.4 Objectives	2
1.5 Organization of the Thesis	3
CHAPTER 2 EXPERIMENTAL PROGRAM	5
2.1 Introduction	5
2.2 Description of Specimens	5
2.3 Fabrication of Specimens	6
2.4 Material	7
2.4.1 Concrete	7
2.4.2 Reinforcing Steel	7
2.5 Test Setup	7
2.5.1 Direct Loading System	8
2.5.2 Indirect Loading System	8
2.6 Instrumentation	9
2.6.1 Steel Strains	9
2.6.2 Concrete Strains	9
2.6.3 Overall Deflection	10
2.7 Testing Procedure	10

CHAPTER 3 TEST RESULTS	Page 30
3.1 Introduction	30
3.2 Ultimate Loads	30
3.3 Maximum Shear Forces and Reactions at Failure	30
3.4 Crack Patterns and Modes of Failure	30
3.4.1 Top Loaded Specimen S2	31
3.4.2 Indirectly Loaded Specimens	31
3.5 Load Deflection Characteristics	34
3.6 Measured Steel Strains	36
CHAPTER 4 EVALUATION OF TEST RESULTS	59
4.1 Introduction	59
4.2 Effect of Loading Direction	60
4.3 Effect of Shear Span to Depth Ratio	62
4.4 Effect of Web Reinforcement Ratios	64
4.4.1 Effect of Vertical Web Reinforcement	65
4.4.2 Effect of Horizontal Web Reinforcement	66
CHAPTER 5 SHEAR FRICTION MODELS	90
5.1 Introduction	90
5.2 Extension of Shear Friction Model	91
5.2.1 Internal Forces In a Cracked R.C Deep Beam	91
5.2.2 Shear Friction Analogy	93
5.2.3 Coefficient of Shear Friction for Reinforced Concrete Beams	95
5.2.4 Modified Shear Friction Truss Model (MSFTM)	96
5.2.4.1 Total Shear Strength	96
5.2.4.2 Critical Crack Angle	97
5.3 Existing Shear Models	98
5.3.1 Siao's Model	98
5.3.2 Formula of Shear Strength by S.T. Mau and T.C. Hsu	100
5.3.3 Ramakrishnan and Ananthanarayana's Formula	102
5.3.4 De Paiva and Siess's Formula	102
5.3.5 Kong et al's Formula	103

5.3.6 ACI Code Model	Page 103
5.3.7 Simon A. Chen	104
5.4 Comparison between Different Models	105
5.5 Summary	108
CHAPTER 6 APPLICATION OF PLASTIC TRUSS MODEL TO INDIRECTLY LOADED CONTINUOUS DEEP BEAMS	133
6.1 Introduction	133
6.2 Truss Analogy for R.C. Beams	134
6.2.1 Variable Angle Conventional Truss Model	135
6.2.2 Strut and Tie Model	136
6.2.3 Effective Concrete Strength	137
6.2.4 Hybrid Plastic Truss Model	139
6.3 Development of Plastic Truss Model	139
6.4 Application of Plastic Truss Model to Continuous Deep Beams	141
6.4.1 Basic Assumptions	142
6.4.2 Top Loaded Continuous Deep Beam	143
6.4.3 Bottom Loaded Continuous Deep Beam	144
6.4.3.1 Conventional Plastic Truss Model	144
6.4.3.2 Modified Plastic Truss Model	146
6.5 Conclusion	148
CHAPTER 7 SUMMARY AND CONCLUSIONS	169
7.1 Summary	169
7.2 Conclusions	169
7.3 Recommendations for Future Researches	171
REFERENCES	172
APPENDIX A	180
APPENDIX B	181
APPENDIX C	183
APPENDIX D	188

LIST OF TABLES

	Page
Table (2.1) Geometric Details of Specimens	11
Table (2.2) Reinforcement Details of Specimens	11
Table (2.3) Average Concrete Strength of Test Specimens	12
Table (2.4) Results of Tension Test of Reinforcing Bars	12
 Table (3.1) Ultimate Loads and Maximum Central Deflection	 39
Table (3.2) Maximum Reactions and Shear Forces at Failure	39
 Table (4.1) Normalized Ultimate Vertical Stresses of Specimens	 68
 Table (5.1) Prediction of Ultimate Shear Force using "Author's MSFTM"	 109
Table (5.2) Critical Load Prediction	109
Table (5.3) Ultimate Shear Force According to "Siao's" Approach	110
Table (5.4) Ultimate Shear Force According to Formula of "Mau and Hsu"	110
Table (5.5) Ultimate Load using Different Formulas	111
Table (5.6) Comparison Between the Calculated and Experimental Ultimate Load using Different Formulas	111
 Table (6.1) Values of Concrete Efficiency Factor Proposed in Literature	 150
Table (6.2) Comparison Between Conventional Truss Model and Experimental Results	151
Table (6.3) Comparison Between Modified Plastic Truss Model and Experimental Results	151
