**SOME PHARMACOLOGICAL STUDIES
ON SODIUM FUSIDATE
IN MALE RABBITS**

B11490

**THESIS PRESENTED
BY**

GAMAL MOHAMED SAAD

(B.V.Sc., Fac. Vet. Med. Alex. Univ., 1993)

**FOR
THE DEGREE OF M.V.Sc.
(PHARMACOLOGY)**

**Presented
To**

**FACULTY OF VETERINARY MEDICINE
ALEXANDRIA UNIVERSITY**

1999

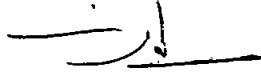

بسم الله الرحمن الرحيم

جامعة الاسكندرية
كلية الطب البيطرى
قسم الفسيولوجيا والأقربازين
والكيمياء الحيوية

قرار لجنة الحكم و المناقشة

قررت لجنة الحكم و المناقشة بجلستها فى يوم الخميس الموافق ٩٩/٨/٢٦ ترشيح السيد
ط ب/ جمال محمد سعد عبد الغنى للحصول على درجة الماجستير فى العلوم الطبية البيطرية
(تخصص فلرماكولوجى)

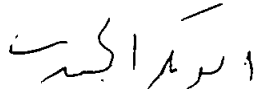

أعضاء لجنة الحكم و المناقشة

أ.د / مصطفى عبد العزيز محمد

استاذ ورئيس قسم الفارماكولوجيا

وعيد كلية الطب البيطرى بكفر الشيخ سابقا

أ.د / أبو بكر يوسف الجندى

استاذ ورئيس قسم الفارماكولوجيا

كلية الطب البيطرى جامعة القاهرة

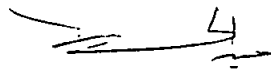

أ.د/ عبد السلام فوزى الصلوى

استاذ ورئيس قسم الفارماكولوجيا

والفسيولوجيا والكيمياء الحيوية

كلية الطب البيطرى جامعة الاسكندرية

أ.د/ عبد الحبيب عبد العظيم فايد

استاذ الفسيولوجيا كلية الطب البيطرى جامعة الاسكندرية

د/ ابراهيم محمد العشملى

استاذ مساعد الفارماكولوجيا بكلية الطب البيطرى جامعة الاسكندرية

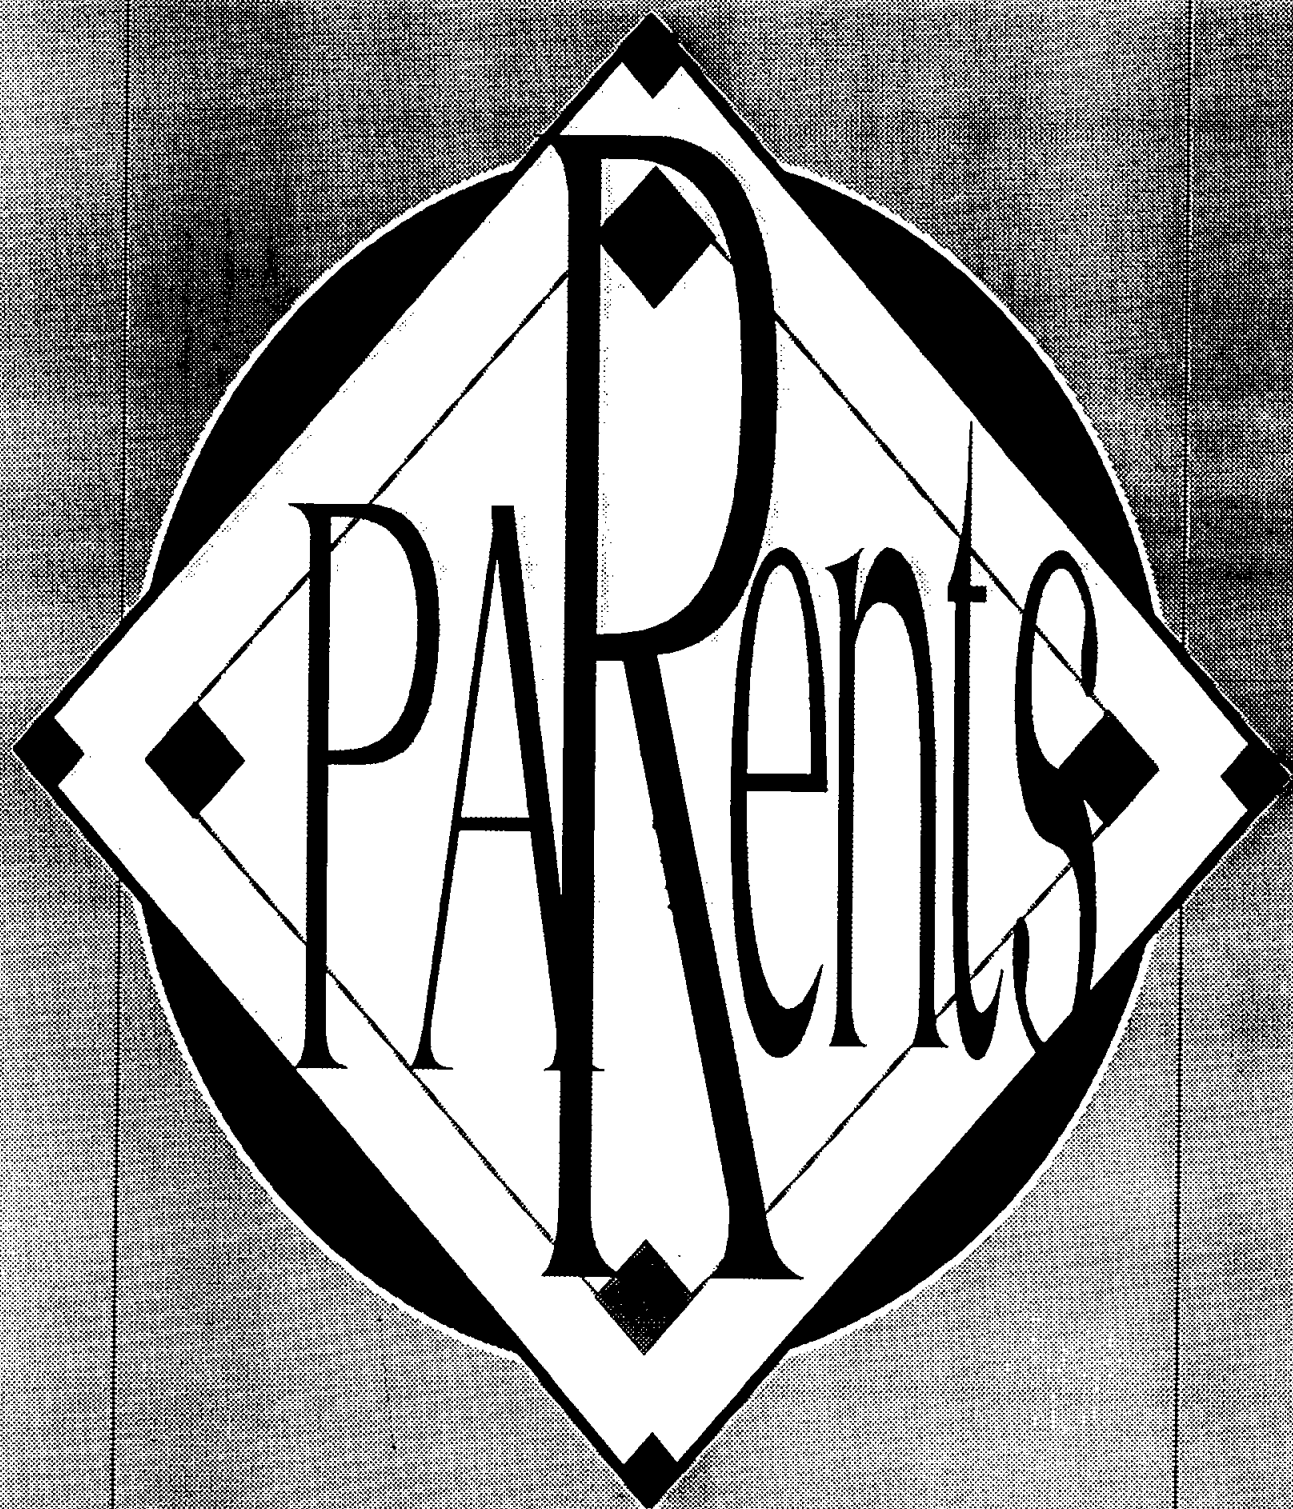

**UNDER SUPERVISION
OF**

Prof. Dr. / ABD EL-SALAM F. EL-SAWI
PROFESSOR OF PHARMACOLOGY AND HEAD
OF PHARMACOLOGY, BIOCHEMISTREY AND
PHYSIOLOGY DEPARTMENT
FACULTY OF VETERINARY MEDICINE
ALEXANDRIA UNIVERSITY

Prof. Dr. / ABD EL-HASSEB FAYED
PROFESSOR OF PHYSIOLOGY
FACULTY OF VETERINARY MEDICINE
ALEXADRIA UNIVERSITY

Dr./IBRAHIM MOHAMED EL-ASHMAWY
ASSISTANT PROFESSOR OF PHARMACOLOGY
FACULTY OF VETERINARY MEDICINE
ALEXANDRIA UNIVERSITY

TO MY

FOR THEIR SUPPORT

ACKNOWLEDGMENT

* * * * *

I would like to express my appreciation and gratitude to Prof. Dr. Abd El-Salam El-Sawi, Professor of pharmacology, & Head of physiology, pharmacology and Biochemistry Department, Faculty of Veterinary Medicine, Alexandria University for his supervision, helpful advice, continuous encouragement, guidance and criticism .

Grateful thanks are also to Prof. Dr. Abd El-Hasseieb Fayed Professor of Physiology, Faculty of Veterinary Medicine, Alexandria University for his supervision.

I would like to express my gratitude and best thanks to Dr. Ibrahim Moh. El-Ashmawy, Assist. Prof. Of Pharmacology, Faculty of Veterinary Medicine, Alexandria University for his supervision and for his assistance during this work.

I wish to express my sincere thanks to Prof. Dr. Sayed El-Manakhly Prof. Of Pathology, Faculty of Veterinary Medicine, Alexandria University for his help in the histopathological examination.

CONTENTS

[illegible]

2.2.1. Blood samples were collected for haematological examination	29
2.2.2. Preparation of serum	30
2.3. Examination of epididymal sperm	30
2.3.1. Progressive motility	30
2.3.2. Epididymal sperm count	30
2.3.3. Epididymal sperm abnormalities percentage	31
2.4. Biochemical studies	32
2.4.1. Determination of serum aspartate aminotransferase and serum alanine aminotransferase.	32
2.4.2. Determination of total serum proteins	33
2.4.3. Determination of serum albumin	33
2.4.4. Determination of serum globulins	34
2.4.5. Determination of serum cholesterol	34
2.4.6. Determination of serum creatinine	34
2.4.7. Determination of serum urea	35
2.5. Histopathologic studies	35
2.6. Statistical analysis	35
RESULTS	36
1. Reproductive effects	36
1.1. Semen characters	36
1.1.1. Sperm motility	36
1.1.2. Sperm count	36
1.1.3. Sperm abnormalities	39
1.2. Index weight of the reproductive organs	39
1.3. Histopathology of the reproductive organs	44
1.3.1. Macroscopic findings	44
1.3.2. Microscopic findings	44
1.3.2.1. Testes	44
1.3.2.2. Ductus epididymides	45
1.3.2.3. Prostate gland	45
1.3.2.4. Seminal vesicle	45
2. Haematological effects	54
2.1. Packed cell volume (PCV) %	54

2.2. Haemoglobin %	54
2.3. Red blood corpuscles (RBCs) and white blood cells counts	57
2.4. Differential leucocytic count	57
2.5. Histopathology of the spleen	64
2.6. Index weight of spleen	64
3. Biochemical effects	69
3.1. Liver function tests	69
3.1.1. Alanine aminotransferase (ALT)	69
3.1.2. Aspartate aminotransferase (AST)	69
3.1.3. Serum total proteins, serum albumin and serum globulin	69
3.1.4. Cholesterol	70
3.1.5. Histopathology of the liver	77
3.1.6. Index weight of liver	78
3.2. Renal function tests	85
3.2.1. Serum urea	85
3.2.2. Serum creatinine	85
DISCUSSION	89

ARABIC SUMMARY	

LIST OF TABLES

Pages

Table (1):	The effect of intramuscular administration of sodium fusidate (10 or 20 mg/kg B.Wt.) twice daily for 7 consecutive days on sperm motility and sperm count of mature male rabbits.	37
Table (2):	The effect of intramuscular administration of sodium fusidate (10 or 20 mg/kg B.Wt.) twice daily for 7 consecutive days on sperm abnormalities of mature male rabbits.	40
Table (3):	The effect of intramuscular administration of sodium fusidate (10 or 20 mg/kg B.Wt.) twice daily for 7 consecutive days on the index weight of testes of mature male rabbits.	41
Table (4):	The effect of intramuscular administration of sodium fusidate (10 or 20 mg/kg B.Wt.) twice daily for 7 consecutive days on the index weight of epididymis and prostate gland of mature male rabbits.	42
Table (5):	The effect of intramuscular administration of sodium fusidate (10 or 20 mg/kg B.Wt.) twice daily for 7 consecutive days on PCV% and haemoglobin % of mature male rabbits.	55
Table (6):	The effect of intramuscular administration of sodium fusidate (10 or 20 mg/kg B.Wt.) twice daily for 7 consecutive days on erythrocyte and leucocytic counts of mature male rabbits.	58
Table (7):	The effect of intramuscular administration of sodium fusidate (10 or 20 mg/kg B.Wt.) twice daily for 7 consecutive days on blood neutrophils and lymphocytes of mature male rabbits.	60
Table (8):	The effect of intramuscular administration of sodium fusidate (10 or 20 mg/kg B.Wt.) twice daily for 7 consecutive days on blood monocytes and eosinophils of mature male rabbits.	62
Table (9):	The effect of intramuscular administration of sodium fusidate (10 or 20 mg/kg B.Wt.) twice daily for 7 consecutive days on the index weight (I.W.) of spleen of mature male rabbits.	68

Table (10):	The effect of intramuscular administration of sodium fusidate (10 or 20 mg/kg B.Wt.) twice daily for 7 consecutive days on serum activity of ALT and AST of mature male rabbits.	71
Table (11):	The effect of intramuscular administration of sodium fusidate (10 or 20 mg/kg B.Wt.) twice daily on serum total proteins and serum albumin of mature male rabbits.	73
Table (12):	The effect of intramuscular administration of sodium fusidate (10 or 20 mg/kg B.Wt.) twice daily for 7 consecutive days on serum globulin and serum cholesterol of mature male rabbits.	75
Table (13):	The effect of intramuscular administration of sodium fusidate (10 or 20 mg/kg B.Wt.) twice daily for 7 consecutive days on the index weight (I.W.) of liver of mature male rabbits.	84
Table (14):	The effect of intramuscular administration of sodium fusidate (10 or 20 mg/kg B.Wt.) twice daily for 7 consecutive days on serum urea and serum creatinine of mature male rabbits.	86
Table (15):	The effect of intramuscular administration of sodium fusidate (10 or 20 mg/kg B.Wt.) twice daily for 7 consecutive days on the index weight of kidney of mature male rabbits.	88
