**UTILIZATION OF GRAVIMETRY, MAGNETOMETRY AND
RADIOMETRY IN GEOLOGICAL MAPPING AND MINERAL
EXPLORATION, NORTH FEIRAN OASIS AREA, SINAI.**

THESIS

Submitted to the Department of Geology,
Faculty of Science, Suez Canal University

M

Partial fulfillment of the requirements for the
M. Sc. Degree in
GEOLOGY (APPLIED GEOPHYSICS)

BY

WALEED MOHAMED OSMAN HELAL
B. Sc. (Geology)

SUPERVISORS

Dr. EL-Sayed Mahmoud EL-Kattan

Professor of Geophysics, Department of
Ground Geophysics, Exploration

Division, Nuclear Materials Authority

Elayed M. Elkattan

Dr. EL-Arabi Hendi Shendi

Associate Professor of Applied

Geophysics, Department of Geology,

Faculty of Science, Suez Canal University

Shendi
A

Dr. Ali EL-Sayed Abbas

Lecturer of Geophysics, Department of Geological Engineering,

Faculty of petroleum and Mining Engineering, Suez Canal University.

Ali Abbas

1998

B 117V9

EXAMINER COMMITTEE

**Prof. Dr. Abd El-Raheem Imam
Bayoumi**

*Professor of Geophysics, Cairo
University*

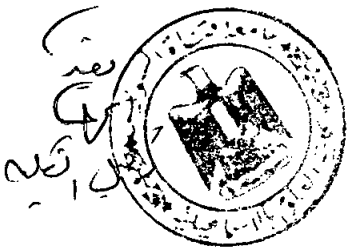

**Prof. Dr. Naser Mohamed
Hassan Abu Ashour**

*Professor of Geophysics, Ain
Shams University*

Dr. El-Arabi Hendi Shendi

*Associate Professor of applied
Geophysics, Suez Canal University*

TO MY FAMILY

Acknowledgment

I wish to express my deepest gratitude to **Professor Dr. El-Sayed Mahmoud El-Kattan** and **Dr. El-Arabi Hendi Shendi**, for their careful supervision, continuous valuable directions and their kind encouragement during this work.

My deep appreciation to my supervisor **Dr. Ali El-Sayed Abbas** for his careful supervision and valuable effort during this work and for his kind encouragement during this study.

I am specially grateful and wish to express my sincere thanks to **Prof. Dr. Ahmed A. Ammar**, Professor of Geophysics, Nuclear Materials Authority, for his continuous guidance, encouragement, and advice through this study.

I am very indebted to **Dr. Mohamed M. Mousa** and to my friend **Khaled M. Maamoon** for every thing they contributed me. Thanks for their great help and cooperation during this study and thanks for their valuable advice and sincere encouragement.

Sincere thanks are expressed also to my colleagues **Khaled M. Saber**, **Ahmed Abd Elhai**, **Mohamed Omar** and **Mohamed Abdel Latif** for their great help and encouragement during the work of this study.

ABSTRACT	xiii
INTRODUCTION	1
CHAPTER I: GEOLOGICAL BACKGROUND	5
I-1. General	5
I-2. Lithological Relationships	5
I-2-A. The Basement Rocks	6
I-2-B. The Sedimentary Rocks	8
a. Paleozoic sediments	8
a-i Cambrian	8
a-ii Carboniferous	8
b. Mesozoic sediments	9
b-i. Jurassic sediments	9
b-ii Cretaceous sediments	9
c. Cenozoic sediments	10
I-3. Structural Background	10
CHAPTER II : METHODOLOGY	14
II-1. Airborne Radiometric Survey Technique	14
II-1-A. General	14
II-1-B. Circle Of Influence	15
II-1-C. Natural Sources Of Radioactivity	15
II-1-D. The Survey Technique	17
a. Field procedure	17
b. Data processing	19

II-1-E. Statistical Analysis Techniques	19
a. The arithmetic mean	21
b. Standard deviation	22
c. The chi-square test	22
d. Statistical inference tests	24
d-i. Bartlett's test	24
d-ii. Analysis of variance (ANOVA) test	25
d-iii. Fisher's F-test	27
d-iv. Studentized t-test	28
II-2. Airborne Magnetic Survey Technique	30
II-2-A. General	30
II-2-B. Qualitative Interpretation	32
a. Total aeromagnetic intensity contour map	32
b. Reduced to pole (RTP) aeromagnetic map	33
c. Isolation of aeromagnetic anomalies	36
c-i. Graphical residualizing	37
c-ii. Surface-fitting residualizing methods	38
c-iii. Empirical gridding methods	38
c-iv. Second vertical derivative methods	39
c-v. Wave length filtering	39
d. Aeromagnetic stacked profiles	40
e. Interpreted magnetic structural-lineament maps	41
II-2-C. Quantitative Interpretation	43
a. Depth estimation techniques	43
a-i. Straight slope technique	44
a-ii. Half-maximum slope (Peter's) technique	44
a-iii. R .J .Bean's method	46
a-iv. Spectral analysis	47
II-3. Gravity Survey Technique	50
II-3-A. General	50
II-3-B. Qualitative Interpretation	51
a. Bouguer anomaly map	51

b. Regional-residual separation	53
II-3-C. Quantitative Interpretation	55
a. Depth estimation techniques	55
a-i.. Smith's method (1959)	56
a-ii. Spectral analysis	56
 CHAPTER III: INTERPRETATION OF AERORADIOMETRIC SURVEY DATA	 57
III-1. General	57
III-2. Qualitative Interpretation	59
III-2-A. Aeroradiometric Stacked Profiles	59
III-2-B. Relation Between Aeroradioactivity and Lithology	60
III-2-C. Relation Between Aeroradioactivity And Structure	65
III-3. Quantitative Interpretation	66
III-3-A. Application Of Statistical Analysis Techniques	66
III-3-B. Results of Statistical Analysis	69
a. Alkaline granite	69
a-i. Unit 1: Normal (typical) alkaline granite	69
a-ii. Unit 2: Highly radioactive alkaline granite	69
b. Monzogranites	70
b-i. Unit 3: Normal (typical) monzogranite	70
b-ii. Unit 4: Highly radioactive monzogranite	70
b-iii. Unit 5: Weakly radioactive monzogranite	70
c. Quartz diorite	71
c-i. Unit 6: Highly radioactive quartz diorite	71
c-ii. Unit 7: Very highly radioactive quartz diorite	71
c-iii. Unit 8: Weakly radioactive quartz diorite	71
c-iv. Unit 9: Moderately radioactive quartz diorite	71
d. Biotite Gneiss	72
d-i. Unit 10: Highly radioactive biotite gneiss	72
d-ii. Unit 11: Weakly radioactive biotite gneiss	72

e. Alluvial sediments	73
e-i. Unit 12: Alluvial sediments	73
III-3-C. Results of Statistical Inference Tests	74
a. Bartlett's test	74
b. Analysis of variance (ANOVA) test	75
c. Fisher's F-test	78
d. Student's t-test	78
III-3-D. Radiometric (Anomaly) Contour Map	81
 CHAPTER IV: INTERPRETATION OF AEROMAGNETIC SURVEY DATA	 84
IV-1. General	84
IV-2. Qualitative Interpretation	85
IV-2-A. Total Aeromagnetic Intensity Contour Map	85
IV-2-B. Reduced To Pole (RTP) Aeromagnetic Map	85
IV-2-C. Aeromagnetic Stacked Profiles' Map	87
IV-2-D. Isolation (Filtering) of RTP Aeromagnetic Data	88
a. Regional RTP aeromagnetic-component map	88
b. Residual RTP aeromagnetic-component map	89
IV-2-E. Interpreted Magnetic Structural-Lineament (IMSL) Maps	90
IV-3. Quantitative Interpretation	91
IV-3-A. Results of Depth Estimation Techniques	91
 CHAPTER V: INTERPRETATION OF GRAVIMETRIC SURVEY DATA	 94
V-1. General	94
V-2. Qualitative Interpretation	95
V-2-A. Bouguer Anomaly Map	95
V-2-B. Regional-Residual Separation (Filtering)	96

a. Regional anomaly map	96
b. Residual anomaly map	96
V-3. Quantitative Interpretation	98
V-3-A. Results of Depth Estimation Techniques	98
 CHAPTER VI: RESULTS OF STATISTICAL TREND ANALYSIS	101
 VI-1. General	101
VI-2. Techniques of Trend Analysis	103
VI-3. Discussion of The Results of Trend Analysis	104
 SUMMARY AND CONCLUSIONS	113
 REFERENCES	119
 ARABIC SUMMARY	

LIST OF FIGURES

<i>Figure No.</i>		<i>After Page</i>
1	Location map of the studied area	2
2	Reference map showing the three aeromagnetic surveyed areas of the Sinai Peninsula.	2
3	Geological map of the studied area (after the Geological Survey of Egypt, 1994).	5
4	Geological map of the studied area (after the Geological Survey of Israel, 1980).	5
5	Sketch map of major structural elements of Egypt, after El-Shazly (1977)	10
6	Percent of total signal coming from circle below detector as a function of aircraft altitude	15
7	Application of Straight slope method to a magnetic anomaly on profile No. (12).	44
8	Application of Peter's method to a magnetic anomaly on profile No. (21).	44
9	Bean's characteristics, (after Nettleton, 1976)	46
10	A-C interpretation graph for tabular body of limited width	46
11	Auxiliary graph for use with Figures 10 and 12 for determination of depth	46
12	Interpretation graph for bodies of large width/depth ratio	46
13	Power spectrum applied to the total R. T. P. aeromagnetic map of the studied area	48
14	Application of Smith's method to a gravity anomaly on profile No. (17).	56
15	Aeroradioactivity contour map of the studied area	58
16	Aeroradiometric Stacked profiles map of the studied area	59
