# **Mitral Valve Reconstruction in Mitral Valve Regurgitation**

**Thesis**

*Submitted for Partial Fulfillment of Requirements for  
The M.D. Degree  
In*

**"Cardiothoracic Surgery"**

*By*

**Ahmed El-Zoheery Aly**

*(M.B., B.Ch. - M.Sc. "Cardiothoracic Surgery")*

67982

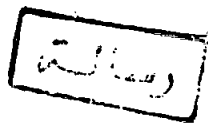

617-412  
A. E. I.

*Under the Supervision of*

**Prof. Dr. M. Magdy Mostafa Ali**

*Professor of Cardiothoracic Surgery*

*Faculty of Medicine - Ain Shams University*

**Prof. Dr. Ahmed B. El-Kerdany**

*Professor of Cardiothoracic Surgery*

*Faculty of Medicine - Ain Shams University*

**Prof. Dr. Ahmed Anwar El-Nory**

*Assistant Professor of Cardiothoracic Surgery*

*Faculty of Medicine - Ain Shams University*

**Faculty of Medicine  
Ain Shams University**

**2002**

Handwritten signatures and dates: 16/5/2002, 16/5/2002, 16/5/2002

# Acknowledgement

*First and foremost, I feel always indebted to Allah, The Most Beneficent and Merciful. Knowledge, science and wisdom are graces granted by Allah almighty only to mankind. Thus, we must always use them to glorify his gracious name.*

It is a great honor for me to take this opportunity to express my most profound gratitude and my deepest respect to **Prof. Dr. Mohamed Magdy Mostafa Ali**, Professor of Cardiothoracic Surgery, Faculty of Medicine, Ain Shams University, for proposing the idea of this study precious guidance, continuous encouragement, fatherly advice in all stages of this work and valuable help in revising and reforming this work.

I would like to express my sincere appreciation and deepest gratitude to **Prof. Dr. Ahmed Baheeg El-Kerdany**, Professor of Cardiothoracic Surgery, Faculty of Medicine, Ain Shams University, for his continuous encouragement, guidance, best supervision and cooperation in all stages of this work.

I wish also, to express my great thanks and gratitude to **Dr. Ahmed Anwar El-Nory**, Assistant Professor of Cardiothoracic Surgery, Faculty of Medicine, Ain Shams University, for his valuable assistance and constant supervision during the different stages of this work.

I wish also to thanks all the **Staff Members and Colleagues in the Department of Cardiothoracic Surgery** in Ain Shams University, for their continuous moral support and cooperation during the accomplishment of this work.

**Dedication  
To  
My Parents  
My Wife  
My Children  
Mayy & El-Zoheery**

# *Contents*

• Introduction and Aim of the Work.....	1
• Review of Literature .....	6
• Historical Aspects .....	6
• Embryology of the mitral valve apparatus.....	11
• Gross anatomy of the mitral valve apparatus .....	13
- The cardiac skeleton.....	13
- Mitral valve leaflets.....	17
- The mitral annulus .....	23
- The commissures of the mitral valve.....	24
- The chordae tendinae.....	26
- The papillary muscles.....	33
- The left ventricle .....	38
• Structures in danger during mitral valve repair ..	39
• Functional anatomy of the mitral apparatus .....	42
• Pathology of the mitral valve disease .....	48
• Hemodynamics effects of mitral valve regurgitation..	80
• Diagnosis of the mitral valve disease.....	89
• Surgical techniques of the mitral valve repair.....	104
- Basic principles .....	104
- Indication for mitral valve repair .....	106
- Preoperative preparation .....	113
- Surgical approaches to mitral valve.....	115
- Assessment of the mitral valve for repair .....	143
• Repair of restricted leaflet motion.....	147
• Repair of leaflet perforation .....	151
• Repair of annular dilatation .....	153

• Repair of leaflets prolapse .....	177
• Assessment after mitral valve repair.....	214
• Results of mitral valve repair.....	221
• Results of mitral valve in rheumatic valvulitis .....	221
• Results of mitral valve repair in ischemic mitral insufficiency .....	222
• Durability of mitral valve repair for degenerative disease.....	225
• Reconstructive surgery in congenital mitral valve insufficiency .....	225
• Patients & Methods.....	226
• Results .....	244
• Discussion .....	286
• Summary and Conclusion.....	312
• Recommendations.....	316
• References.....	317
• Arabic Summary.....	

## *List of Tables*

Table No.	Descriptions	Page No.
1	Echocardiographic score of mitral valve disease.	60
2	Pathology of valvular lesions.	77
3	Pathophysiological classification of mitral valve lesions.	79
4	Angiographic grading system for mitral regurgitation.	102
5	Mitral valve repair mortality.	224
6	Anatomical lesions of mitral valve complex and their reparative procedures planned after mitral valve analysis.	239
7	According to the functional analysis of the mitral valve patients were classified into four groups.	244
8	Distribution of the studied group of patients according to sex and age.	246
9	Preoperative NYHA functional class distribution.	247
10	Correlation between NYHA grades and age groups.	247
11	Preoperative correlation between the sex distribution and NYHA grades.	250
12	Correlation between preoperative leaflets motion and NYHA grades.	252
13	Shows clinical finding of the patients.	253
14	Degree of mitral valve regurgitation	254
15	Results of preoperative echocardiographic dimension and CT ratio.	255
16	Anatomical lesions of the mitral valve apparatus.	257

17	Operative procedure done for the studied group according to pathological findings.	259
18	Aortic cross clamp and bypass times.	260
19	Means of bypass and ischemic times, ventilation times and ICU stay time and hospital days.	261
20	Hospital morbidity detected among cases.	264
21	Postoperative echo data of survivals.	267
22	The results of the mitral valve repair of the 29 patients classified according to their NYHA grades.	268
23	Comparison between preoperative and postoperative results of NYHA classification.	269
24	Differences in rhythm (ECG) pre and postoperatively.	271
25	Difference in CT ratio before and after operation.	272
26	Grades of mitral valve regurgitation pre and post-operatively.	273
27	Comparison between pre and postoperative readings of ECHO.	274
28	Differences in ECHO, operative time, postoperative stay between cases according to the prognosis.	276
29	Evaluation of the studied cases postoperatively.	278
30	Correlation between postoperative evaluation and the preoperative factors & intraoperative factors.	279
31	The current status of patients and the functional analysis of the mitral valve.	280
32	Correlation between the preoperative and postoperative NYHA classification grades.	281
