ACKNOWLEDGEMENT

Thanks first and last to (God) to whom I owe his great care, support and guidance in every step in my life.

*I would like to express my deepest gratefulness to **Prof. Dr. Abd El-Sttar El-Deeb** Professor of Internal Medicine & Endocrinology, Faculty of Medicine, Ain Shams University, for giving me the chance to work under his generous supervision and continuous encouragement.*

*I wish to offer my deepest thanks and my sincere gratefulness to **Dr. Nermin Ahmed Sheriba**, Assistant professor of Internal Medicine & Endocrinology, Faculty of Medicine, Ain Shams University for here trustful help, advice and supervision.*

*I wish to offer my sincere gratefulness to **Dr. Raef Malak Botros**, Lecturer of Internal Medicine & Endocrinology, Faculty of Medicine, Ain Shams University for his continuous assistance and kind cooperation and advice. Also, I wish to offer my profound appreciation to **Dr. Magdi Abbas Abd-Elaziz** Fellow of Biochemistry, Ain Shams University Hospital for his assistance and kind*

cooperation. My profound appreciation and gratitude to my family for their unlimited help and continuous encouragement throughout this work and in every step in my life. I wish to offer my thanks to my colleagues for their kind help and support. Lastly, my thanks to all the persons who were the subjects of this study, and all who helped me through out this work.

List of Contents

	Page
Introduction and Aim of the Work	
Review of Literature	
Hepatitis C Virus Infection	
* Properties of viral particle	1
* The Genome of HCV and the Proteins Encoded	2
* Replication of HCV	6
* Genotyping of HCV	7
* Epidemiology and transmission of HCV	9
* Extrahepatic manifestations of HCV	13
* Natural history and clinical features of HCV infection	20
* Complications of HCV infection:	22
* Diagnosis of HCV	24
* Treatment of chronic Hepatitis C	32
Diabetes Mellitus	
* Definition and description of diabetes mellitus:	47
* Classification of diabetes mellitus	49
* Impaired glucose tolerance (IGT)	60
* Diagnostic Criteria for Diabetes Mellitus:	63
* Insulin Secretion, Action and Resistance	66
* The Assessment of Insulin Action in Vivo	75
Liver disease, Carbohydrate metabolism, And Diabetes Mellitus	
* Carbohydrate Metabolism and the Liver	77
* Hormonal control of Carbohydrate Metabolism	79
* Mechanisms of Hyperinsulinemia in Liver Disease:	81
* Other Metabolic Hormones in Liver Disease	88
* Hepatitis C and Diabetes Mellitus	92

Subjects and Methods	98
Results	105
Discussion	116
Conclusions & Recommendations	123
Summary	124
References	126

List of Figures

	Page
Fig. (1): Molecular anatomy of the HCV virion	1
Fig. (2): Organization of the hepatitis C virus genome and its associated proteins	3
Fig. (3): Suggested spatial distribution of the structural (C, E1, E2 and P7) and nonstructural (NS2) proteins of HCV	4
Fig. (4): Phylogenic analysis of NS5 sequences showing six major HCV types and more closely related subtypes within types 1 to 6	8
Fig. (5): Hepatitis C: ALT response patterns on IFN α	33

List of Tables

	Page
Table (1) Treatments evaluated in chronic hepatitis C.	32
Table (2) Etiologic classification of diabetes mellitus.	49
Table (3) Criteria for diagnosis of gestational diabetes.	55
Table (4): Criteria for the diagnosis of DM.	63
Table (5): Criteria for testing for diabetes in asymptomatic, undiagnosed individuals.	65
